Official Fuel Economy Ratings

The official fuel economy ratings for the 2007 Acura TL provide a baseline for understanding its efficiency. These ratings are determined by the Environmental Protection Agency (EPA) and reflect the miles per gallon (MPG) the vehicle achieves under standardized test conditions. The 2007 Acura TL was available with different engine configurations, which influenced its fuel economy figures.

4-Cylinder vs V6 Engine Fuel Economy

The majority of 2007 Acura TL models were equipped with a 3.2-liter V6 engine producing approximately 270 horsepower. This engine option was paired with either a 5-speed automatic transmission or a 6-speed manual transmission, depending on the trim and buyer preference. EPA ratings for this configuration typically ranged around 18 MPG in the city and 26 MPG on the highway. There was no 4-cylinder engine option available for the 2007 TL, as

Acura prioritized V6 powertrains to balance performance with efficiency in this midsize luxury segment.

Transmission Influence on EPA Ratings

The 6-speed manual transmission versions of the 2007 Acura TL often achieved slightly better fuel economy compared to the automatic transmission models. The EPA estimated manual transmission models to reach up to 20 MPG city and 28 MPG highway, whereas automatic models were rated closer to 18 MPG city and 26 MPG highway. The manual transmission allows for more driver control over gear changes, which can translate into improved fuel efficiency under certain driving conditions.

Engine and Transmission Impact on Fuel Efficiency

The engine and transmission choices significantly impact the 2007 Acura TL fuel economy. The V6 engine delivers robust power but also demands more fuel compared to smaller engines. Transmission type affects how efficiently the engine power is utilized and can lead to differences in mileage.

V6 Engine Characteristics

The 3.2-liter V6 engine in the Acura TL is designed for smooth acceleration and solid highway cruising. While this engine offers strong performance, its fuel consumption reflects the balance between power output and efficiency. The engine employs variable valve timing technology to optimize combustion and reduce fuel wastage, enhancing overall economy without sacrificing responsiveness.

Automatic vs Manual Transmission Efficiency

The 5-speed automatic transmission features electronically controlled shifting and lock-up torque converter technology to improve fuel economy. However, the automatic system can sometimes be less efficient than a manual transmission due to slight delays in gear changes and torque converter slippage. In contrast, the 6-speed manual transmission enables the driver to maintain engine operation in optimal RPM ranges, potentially improving fuel efficiency when driven skillfully.

Real-World Fuel Economy Experience

While EPA ratings provide standardized fuel economy figures, real-world

driving conditions often lead to variations in actual mileage. Owner reports and independent tests reveal how the 2007 Acura TL performs in everyday use.

City Driving Fuel Economy

In urban environments, frequent stops, idling, and lower speeds reduce fuel efficiency. Many 2007 Acura TL owners report achieving between 16 and 19 MPG during city driving, slightly below EPA estimates. Factors such as traffic congestion, air conditioning use, and driving style contribute to this variation.

Highway Driving Fuel Economy

On highways, where steady speeds and minimal stops prevail, the 2007 Acura TL demonstrates improved fuel economy. Typical highway mileage ranges from 24 to 28 MPG as reported by drivers. Maintaining consistent speeds and using cruise control can help realize better mileage closer to or exceeding official EPA figures.

Combined Fuel Economy

When averaging city and highway driving, the combined fuel economy for the 2007 Acura TL tends to fall between 19 and 22 MPG. This range reflects a balance between stop-and-go traffic and longer highway trips common in everyday driving scenarios.

Factors Affecting Fuel Economy

Several variables influence the fuel economy of the 2007 Acura TL beyond engine and transmission specifications. Understanding these factors helps identify ways to optimize efficiency and anticipate mileage results.

1. **Driving Habits:** Aggressive acceleration, speeding, and frequent braking increase fuel consumption.
2. **Vehicle Maintenance:** Proper tire inflation, timely oil changes, and clean air filters improve fuel efficiency.
3. **Load and Cargo:** Carrying excess weight or roof racks increases aerodynamic drag and fuel use.
4. **Environmental Conditions:** Cold weather, wind resistance, and hilly terrain affect gas mileage negatively.

5. **Fuel Quality:** Using recommended octane fuel and quality gasoline can optimize engine performance.

Tips to Improve 2007 Acura TL Fuel Economy

Owners seeking to maximize the fuel economy of their 2007 Acura TL can adopt several strategies that reduce fuel consumption without compromising vehicle performance.

- **Maintain Steady Speeds:** Use cruise control on highways to maintain consistent speeds and reduce unnecessary acceleration.
- **Regular Maintenance:** Keep the engine tuned and replace worn components to ensure optimal fuel combustion.
- **Check Tire Pressure:** Properly inflated tires reduce rolling resistance and improve mileage.
- **Reduce Excess Weight:** Remove unnecessary items from the trunk and avoid carrying heavy loads.
- **Limit Air Conditioning Use:** Use air conditioning sparingly as it increases engine load and fuel consumption.
- **Avoid Idling:** Turn off the engine during extended stops to conserve fuel.

Comparison with Competing Models

When evaluating the 2007 Acura TL fuel economy, it is helpful to compare it with similar midsize luxury sedans from the same period. Competitors include the BMW 3 Series, Lexus ES, and Mercedes-Benz C-Class.

BMW 3 Series

The 2007 BMW 3 Series, equipped with a variety of engines including inline-6 options, generally offers comparable fuel economy to the Acura TL. EPA ratings for the BMW 328i model approximate 18 MPG city and 27 MPG highway, closely matching the TL's figures. However, real-world fuel economy varies based on driving style and engine choice.

Lexus ES 350

The Lexus ES 350, powered by a 3.5-liter V6, typically achieves slightly lower fuel economy, with EPA ratings near 19 MPG city and 27 MPG highway. The ES prioritizes comfort and smooth ride quality, often resulting in similar or marginally less efficient fuel use compared to the Acura TL.

Mercedes-Benz C-Class

The 2007 Mercedes-Benz C-Class offers fuel economy in a similar range, with ratings around 18 MPG city and 26 MPG highway for its V6 variants. The C-Class emphasizes luxury and performance, with fuel economy aligning closely with the Acura TL's efficiency.

Overall, the 2007 Acura TL fuel economy stands competitive within its class, balancing performance and fuel efficiency effectively for a midsize luxury sedan of its time.
