beachcliff sardines nutrition info: A Story of Maine in 112 Objects: From Prehistory to Modern Times Bernard P. Fishman, 2019-04-04 Founded in 1836, the Maine State Museum is America's oldest state museum and is known to many as "Maine's Smithsonian" because of the breadth and diversity of its holdings—nearly a million objects covering every aspect of the state's cultural, biological, and geological history—and the thousands of stories its collections tell. For this book the museum selected and photographed 112 artifacts and specimens that, together, tell an epic story of the land and its people from prehistoric times to the present. It is a story covering 395 million years, a story told with a walrus skull and fossils, tourmaline and spear points, mammoth

tusks and bone fishhooks, Norse coins and caulking irons, militia flags and survey stakes, treaty documents and wooden tankards, a temperance banner and a locomotive, Joshua Chamberlain's pistol and a cod tub trawl, a Lombard log hauler and a woman's WWII welding outfit, L. L. Bean boots and German POW snowshoes, and many more objects from the museum's collections. Short narratives written by museum curators are woven around each item—including photos of related objects—and the ensemble has been honed, polished, and introduced by museum director Bernard Fishman. This is a book that historians and Maine residents and visitors will delve into again and again, unearthing new treasures with each reading.

beachcliff sardines nutrition info: *Couple of Diets to Control Seizures* Gerald Yemoto, 2004-12 This is a book of two diets I tried to control my epileptic seizures. No medications seemed to control the seizures I had. Not until I seen the Charlie Foundation present an Introduction of the Ketogenic Diet, did I ever consider dieting would control my seizures. In August 1996 I began the ketogenic diet. The ketogenic diet controlled my seizure better than any medications I tried. Because of my age (adult) it was hard to seek professional help that practiced the diet, since it is practiced on children only. Dieticians of a Children's Hospital nearby did coach me though the diet. Not until seven years later did I notice that certain foods were being eaten just before I had a seizure, specifically pasta. I began researching the possible cause of seizures and gluten appeared. I looked back on my records while I was on the Ketogenic Diet and noticed I had certain foods before having seizures. Those foods had gluten in it. Gluten sensitivity is becoming more prevalent as it is studied. Being unsuccessful contacting the medical profession I decided to write a book of both diets that helped me controlling seizures. Both diets may even help weight loss.
