beyond therapy ridgeland ms: Beyond Therapy, Beyond Science Anne Wilson Schaef, 1999-10-01 With candor, compassion and insight, Schaef convincingly explores and exposes the unspoken limitations of the scientific paradigm upon which this society is built and the frightening implications of a psychotherapy that is derived from that paradigm. She persuasively demonstrates that the field of psychotherapy as we know it not only cannot work, it works against us, supporting personal and societal addictions. She presents a new approach for healing the whole person that emerges from and supports a new scientific paradigm, one that allows us to not only heal ourselves but heal the planet as well.

beyond therapy ridgeland ms: Beyond Therapy Erving Polster, 2017 In Beyond Therapy, Erving Polster examines the role of life focus in three of society's most familiar activities: ordinary conversation, the arts, and religion. He shows the life focus movement to be an indivisible complement to just simply living. In proposing a paradigm shift from psychotherapy's priority for changing people's troubled lives into the complementary purpose of illuminating their lives, the author invites the participation of many people who do not seek remedial treatment for emotional or psychological problems. Polster incorporates a broader scenario for enhancing attention through community groups, showing that the convergence of people's minds on commonly important life themes creates enlightenment. This interlocked focus amplifies the ensuing conversational content and creates a meditation-like absorption. This kind of pointed focus, argues Polster, has the power to colour the lives of the participants. This work offers rationale and design for life focus community groups, and also creates a heightened identity for the life focus movement, providing other foundational ideas that help to unify diverse approaches. Mental health professionals will benefit from its wealth of specific exercises and instructions for program design. Polster provides leaders and group members with a well-rounded perspective on the basics of personal enlightenment and communal belonging.--Provided by publisher.

beyond therapy ridgeland ms: Beyond Therapy Anne Wilson Schaef, 1992 This book recounts the author's personal and professional journey as a therapist and her movement beyond therapy. She argues that the dominant scientific and psychotherapeutic worldviews perpetuate the addictive processes they seek to cure, and she describes, for the first time in writing, her living process work - the unique model she has devised for healing addictions. Finally, she presents a new theory culled from the theoretical and philosophical issues that have emerged from her journey and work.

beyond therapy ridgeland ms: Journey to Home Rachel B. Aarons, 2009-01-01 Journey to Home unlocks the mystery of what goes on behind the closed doors of therapists' offices. It provides an in-depth understanding of the therapy process on 3 different levels: 1.Theoretical: it explains the principles underlying not just a specific school of therapy but all schools of therapy; 2.Autobiographical: it takes a uniquely intimate look at this process through the author's own personal journey; 3.Self Help: it offers easy-to-follow and remarkably effective exercises drawn from the author's over 30 years of clinical experience. It is not only a description of the change process; it is also a guidebook to change. It goes beyond therapy into spirituality. Journey to Home is at once theoretical and personal, poetic and practical. It will appeal to everyone interested in psychological health and well-being.
