big law practice areas: BigLaw Mitt Regan, Lisa H. Rohrer, 2021-01-12 The Great Recession intensified large law firms' emphasis on financial performance, leading to claims that lawyers in these firms were now guided by business rather than professional values. Based on interviews with

more than 250 partners in large firms, Mitt Regan and Lisa H. Rohrer suggest that the reality is much more complex. It is true that large firm hiring, promotion, compensation, and termination policies are more influenced by business considerations than ever before and that firms actively recruit profitable partners from other firms to replace those they regard as unproductive. At the same time, law firm partners continue to seek the non-financial rewards of being members of a distinct profession and are sensitive to whether their firms are committed to providing them. Regan and Rohrer argue that modern firms responding effectively to business demands while credibly affirming the importance of non-financial professional values can create strong cultures that enhance their ability to weather the storms of the modern legal market.

big law practice areas: Big Law in Latin America and Spain Manuel Gómez, Rogelio Pérez-Perdomo, 2017-11-22 This book, part of the Stanford Law School research project on the future of the legal profession, thoroughly examines the future of “big law,” defined as the large and mid-size multiservice highly specialized law firms that provide sophisticated, complex and generally costly legal work to multinationals, large and mid-size domestic corporations, and other business clients. By systematically gathering, assessing, and analyzing the best available quantitative and qualitative data on the first tier of the corporate legal services market of Latin America and Spain, and interviewing a broadly representative sample of corporate legal officers, law firm partners, and other stakeholders in each of the countries covered, this book provides a nuanced perspective on changes in “big law” during the last two decades until the present. It also explores the factors that are driving these changes, and the implications for the future of legal profession, legal education and its relationship with the corporate sector and society in general.

big law practice areas: Lawyers in 21st-Century Societies Richard L Abel, Hilary Sommerlad, Ole Hammerslev, Ulrike Schultz, 2022-05-05 This book presents an invaluable collection of essays by eminent scholars from a wide variety of disciplines on the main issues currently confronting legal professions across the world. It does this through a comparative analysis of the data provided by the reports on 46 countries in its companion volume: *Lawyers in 21st-Century Societies: Vol. 1: National Reports* (Hart 2020). Together these volumes build on the seminal collection *Lawyers in Society* (Abel and Lewis 1988a; 1988b; 1989). The period since 1988 has seen an acceleration and intensification of the global socio-economic, cultural and political developments that in the 1980s were challenging traditional professional forms. Together with the striking transformation of the world order as a result of the fall of the Soviet bloc, neo-liberalism, globalisation, the financialisation of capitalism, technological innovations, and the changing demography of lawyers, these developments underscored the need for a new, comparative exploration of the legal professional field. This volume deepens the insights in volume 1, with chapters on legal professions in Africa, Latin America, the Islamic world, emerging economies, and former communist regimes. It also addresses theoretical questions, including the sociology of lawyers and other professions (medicine, accountancy), state production, the rule of law, regional bodies, large law firms, access to justice, technology, casualisation, cause lawyering, diversity (gender, race, and masculinity), corruption, ethics regulation, and legal education. Together with volume 1, it will inform and challenge conceptions of the contemporary profession, and stimulate and support further research.

big law practice areas: Plunder Brendan Ballou, 2023-05-02 The authoritative exposé of private equity: what it is, how it kills businesses and jobs, how the government helps, and how we stop it Private equity surrounds us. Firms like Blackstone, Carlyle, and KKR are among the largest employers in America and hold assets that rival those of small countries. Yet few understand what these firms are or how they work. In *Plunder*, Brendan Ballou explains how private equity has reshaped American business by raising prices, reducing quality, cutting jobs, and shifting resources from productive to unproductive parts of the economy. Ballou vividly illustrates how many private equity firms buy up retailers, medical practices, prison services, nursing-home chains, and mobile-home parks, among other businesses, using little of their own money to do it and avoiding debt and liability for their actions. Forced to take on huge debts and pay extractive fees, companies purchased by private equity firms are often left bankrupt, or shells of their former selves, with consequences to communities that long depended on them. Perhaps most startling is Ballou's insight into how this is happening with the active support of various arms of the government. But, as Ballou reveals in an agenda for reining in the industry, private equity can be stopped from wreaking further havoc.

big law practice areas: The Lawyer Bubble Steven J Harper, 2016-03-08 A noble profession is facing its defining moment. From law schools to the prestigious firms that represent the pinnacle of a legal career, a crisis is unfolding. News headlines tell part of the story—the growing oversupply of new lawyers, widespread career dissatisfaction, and spectacular implosions of pre-eminent law firms. Yet eager hordes of bright young people continue to step over each other as they seek jobs

with high rates of depression, life-consuming hours, and little assurance of financial stability. The Great Recession has only worsened these trends, but correction is possible and, now, imperative. In *The Lawyer Bubble*, Steven J. Harper reveals how a culture of short-term thinking has blinded some of the nation's finest minds to the long-run implications of their actions. Law school deans have ceded independent judgment to flawed U.S. News & World Report rankings criteria in the quest to maximize immediate results. Senior partners in the nation's large law firms have focused on current profits to enhance American Lawyer rankings and individual wealth at great cost to their institutions. Yet, wiser decisions—being honest about the legal job market, revisiting the financial incentives currently driving bad behavior, eliminating the billable hour model, and more—can take the profession to a better place. A devastating indictment of the greed, shortsightedness, and dishonesty that now permeate the legal profession, this insider account is essential reading for anyone who wants to know how things went so wrong and how the profession can right itself once again.
