Jaffe, editor of *With Signs and Wonders: An International Anthology of Jewish Fabulist Fiction*; author of *The Genealogy of Understanding* The personal, the artistic, and the spiritual collide with small, perfect explosions in these entrancing stories. Mary Jane Myers writes with great subtlety and poignancy, offering plenty of delights and surprises.--Ross King, author of *Mad Enchantment: Claude Monet and the Painting of the Water Lilies* Bitter, joyful, worn down, filled with wonder, acutely self-aware, and often deeply in need of perspective--such are the women at the center of Mary Jane Myers' compelling debut short story collection. Lonely and stuck in lives that have begun to feel stale, these ordinary women--administrative assistants, typists, accountants--awake unto themselves after brushes with the surreal. While light and playful in tone, the stories reflect the hollowness and toxicity that can come from ascribing too strictly to the popularly held values of our contemporary society and the confusion caused by wobbly religious beliefs in a secular world. Louise, an unassuming tourist, is accosted in a museum in Florence by the voice of Galileo's finger bone promising to grant her greatest wish in return for a simple favor. Diane narrowly escapes a toxic relationship and sinks into a depression when she becomes convinced the gods are speaking to her through a stone from the lava fields of Maui. Helen, who has always wanted someone with whom to appreciate classical music, ends up playing host to Franz Schubert, when she meets the young composer wandering in the woods near her home in the Santa Monica Mountains. Witty, revelatory—and at times chilling—*Curious Affairs* allows us to see the strangeness in the ordinary.

commercials in 2011 and 2012, Pepsi-Cola has played a leading role in drawing the American pop music industry into a synergetic relationship with advertising. This idea has been copied successfully by countless other brands over the years, and such commercial collaboration is commonplace today—but how did we get here? How and why have pop music aesthetics been co-opted to benefit corporate branding? What effect have Pepsi's music marketing practices in particular had on other brands, the advertising industry, and popular music itself? Soda Goes Pop investigates these and other vital questions around the evolving relationships between popular music and corporate advertising. Joanna K. Love joins musical analysis, historical research, and cultural theory to trace parallel shifts in these industries over eight decades. In addition to scholarly and industry resources, she draws on first-hand accounts, pop culture magazines, trade press journals, and other archival materials. Pepsi's longevity as an influential American brand, its legendary commercials, and its pioneering, relentless pursuit of alliances with American musical stars makes the brand a particularly instructive point of focus. Several of the company's most famous ad campaigns are prime examples of the practice of redaction, whereby marketers select, censor, and restructure musical texts to fit commercial contexts in ways that revise their aesthetic meanings and serve corporate aims. Ultimately, Love demonstrates how Pepsi's marketing has historically appropriated and altered images of pop icons and the meanings of hit songs, and how these commercials shaped relationships between the American music business, the advertising industry, and corporate brands. Soda Goes Pop is a rich resource for scholars and students of American studies, popular culture, advertising, broadcast media, and musicology. It is also an accessible and informative book for the general reader, as Love's musical and theoretical analyses are clearly presented for non-specialist audiences and readers with varying degrees of musical knowledge.
