cvs pharmacy technician program: A Way Forward Daniel P. Gitterman, Peter A. Coclanis, 2011-12-19 In the last half century, North Carolina and the South have experienced rapid economic growth. Much of the best analysis of this progress came from two North Carolina-based research organizations: the Southern Growth Policies Board and MDC (originally a project of the North Carolina Fund). Their 1986 reports are two of the best assessments of the achievements and limitations of the so-called Sunbelt boom. On November 17, 2011, the Global Research Institute at the University of North Carolina at Chapel Hill and the Institute for Emerging Issues at North Carolina State University co-hosted a public discussion to build on these classic reports and to offer fresh analyses of the current challenges facing the region. A Way Forward, which issued from this effort, features more than thirty original essays containing recommendations and strategies for building and sustaining a globally competitive South.

cvs pharmacy technician program: Shakedown Steven Malanga, 2010-10-16 As their infatuation with President Obama fades, millions of Americans anxiously ask, Is this the change we were waiting for? The current administration represents change, for sure, Steven Malanga argues - a momentous transformation of the fundamental structure of American politics. A self-interested coalition of public-sector unions and government-financed community activists (like the young Barack Obama) has become our era's characteristic political machine. In Shakedown, Mr. Malanga shows how this machine's single-minded goal is always bigger government and more public spending. The bill, he says, is now coming due for the relentless rise of this new political powerhouse. He chronicles how public-sector unions and the corrupt political hacks beholden to them have all but bankrupted once-rich states like California and New Jersey. He details the campaigns to undermine the successful and popular 1990s welfare reform and to revitalize the failed, wasteful War on Poverty programs that funnel taxpayer money to the advocacy groups that are integral cogs in the new political machine. And he provides a comprehensive summary of how these same advocacy groups spent decades helping undermine mortgage standards in the name of helping the poor - in the process enriching themselves and enabling the housing meltdown. As Americans anxiously ponder the future direction of their government and their economy, Shakedown explores the questions of who got us in this mess and why we need change - constructive change - more than ever.
