fordham counseling psychology phd: Career Development Interventions for Social Justice Margo A. Jackson, Allyson K. Regis, Kourtney Bennett, 2019-01-02
Career development interventions can serve as one means to constructively address the problems of inequitable access to educational and occupational options and achievement that promote health and well-being across the lifespan. Career Development Interventions for Social Justice: Addressing Needs across the Lifespan in Educational, Community, and Employment Contexts offers practical examples of career development interventions that may be adapted to constructively address social justice needs at various points across the lifespan (ranging from elementary school ages to older adults) in educational, community, and employment contexts. Tailored to the needs and context of a specific underserved group of individuals, each intervention integrates relevant career development theory, research, ethical considerations, elements of sound program design and evaluation, and professional competencies for best practices in multicultural career counseling and social justice advocacy. Unique to this book are the contributions of authors, including practicing professional counselors and psychologists, who share their personal reflections of self-awareness from privileged and marginalized identities regarding potential biases and resources of relevance to their chapter's intervention. In the process of designing and providing career development services for individuals from marginalized groups, it is imperative for counselors to continually reflect on and consult about their own biases and resources for empathic understanding and effectiveness with those whom we serve.

fordham counseling psychology phd: Handbook of Multicultural School Psychology Emilia C. Lopez, Sara G. Nahari, Giselle B. Esquivel, Sherrie L. Proctor, 2012-02-27
This comprehensive handbook offers a beautifully balanced view of the emerging field of multicultural school psychology. The opening section provides an historical overview of how the field has developed, and succeeding sections discuss multicultural issues related to consultation, instructional interventions, alternative assessment, academic assessment, vocational assessment, culturally sensitive counseling models, and working with families and special populations. Theory, research, and practice are integrated throughout. Key features of this exciting new book include: Interdisciplinary Perspective - Many chapters are written by authors from different disciplines, all of whom have multicultural expertise. The last chapter provides summarizing commentaries written by leaders in different disciplines. Scientist-Practitioner Focus - Evidence-based interventions for culturally and linguistically diverse students are provided for major competency areas such as consultation, counseling, and special programs (e.g., bilingual and multicultural education). Assessment Focus - Multicultural and bilingual assessment issues are discussed in the chapters covering language, cognitive, personality, behavioral, neuropsychological, vocational, acculturational, and academic assessment. Special Populations Focus - The needs of special populations such as culturally different parents, gifted and talented children, preschool children, migrant families, and children with low and high incidence learning disabilities are discussed in section VI. This book is appropriate for graduate courses and seminars dealing with multicultural school psychology. It is also a useful reference for researchers and practicing school psychologists and the libraries serving them.

fordham counseling psychology phd: *An Intersectional Approach to Counseling Children and Adolescents With Health Conditions* Jennie Park-Taylor, Merle Keitel, 2024-05-01 The purpose of the present book, *An Intersectional Approach to Counseling Children and Adolescents with Health Conditions*, is to provide mental health professionals and students of counseling, medicine, psychology, social work, and other helping professions, with useful information and helpful suggestions for their work with children and adolescents who experience significant health issues. The chapter authors rely on an intersectional understanding of the human experience and specifically focus on how diverse youth experience, understand, and seek support for specific health conditions and illnesses. Considering contemporary research that has shed light on some of the ways individuals' multiple social identities interconnect and interact to compound experiences of illness, health psychology researchers would benefit from applying an intersectional lens in their explorations of the micro and macro-level variables that influence pathways towards health and illness for different groups. For mental health practitioners, an intersectional perspective on diverse children and adolescents' experiences of specific health conditions will more likely lead to innovative and inclusive interventions that target change at multiple levels. We are confident that our book will be of great use to mental health practitioners and students who plan to or are currently working with children and adolescents with significant health issues. Readers of the book can focus on a specific health condition that is common among children/adolescents and develop their knowledge, skills, and awareness of the cultural and systemic considerations in working with children/adolescents and their families. Particular attention can be paid to the ways in which the clients' and the counselors' intersectional social identities may influence counseling children and adolescents with significant health issues.
