free online sane training: *New Directions in Psychiatry* Maurizio Pompili, Roger McIntyre, Andrea Fiorillo, Norman Sartorius, 2020-06-08 This book focuses on hot issues faced by clinicians in everyday clinical practice, and provides in-depth analyses of both met and unmet needs in the management of psychiatric disorders. It has been repeatedly shown that the needs of patients, relatives, the community at large and those of the governmental bodies only partially overlap. For instance, patients in their families are more concerned about quality of life, treatment, autonomy, and independent living; whereas governmental stakeholders are typically more concerned about relapse prevention and reduction of hospitalizations. As such, a volume bridging the gap between theoretical notions and practical understanding of patients' untreated aspects of their psychiatric disorders is much needed. Instead of focusing on traditional descriptions of psychopathology and diagnostic criteria, the volume guides readers to core problems for each topic, taking into account

new approaches in the classification of mental disorders as proposed by DSM-5. It elaborates on much-debated controversial problems such as the assessment and treatment of psychomotor agitation, and non-adherence to treatment that impacts on the psychiatric context. With its unique approach, this volume appeals to anyone with an interest in the field, including researchers, clinicians, and trainees.

free online sane training: Handbook of Good Psychiatric Management for Borderline Personality Disorder and Alcohol Use Disorder Lois W. Choi-Kain, Hilary Connery, 2024-10-03 Six percent of people in North America will develop borderline personality disorder (BPD) in their lifetime, and about 46% of them will have alcohol use disorder (AUD) at the same time. Alcohol use exacerbates the symptoms of both diseases, rendering treatment more challenging and increasing the risk of suicide. Integrated treatments have been lacking. Good Psychiatric Management for Borderline Personality Disorder and Alcohol Use Disorder meets the urgent need for such an integrated approach. It provides clearly articulated descriptions of both BPD and AUD, outlining clinical patterns and how to diagnose them with confidence. Relying on general psychiatric principles with which most clinicians are already familiar, as well as up-to-date standards of care for both BPD and AUD, the handbook pays particular attention to areas of potential synergy, providing clinical logic for addressing complex, real-world cases. Topics include the following: • Progress assessment, psychoeducation, and goal setting; • Managing suicidality and nonsuicidal self-harm; • Pharmacotherapy; • Multimodal treatments, including mutual-help groups and family intervention; and • Level-of-care considerations. The authors stress that, in the absence of evidence-based manualized therapy for treating BPD and AUD simultaneously, clinicians already have the tools to increase treatment retention, reduce the risk of suicide and death, and provide a sensible road map in the face of interpersonal, behavioral, and emotional challenges inherent to recovery for both conditions.

free online sane training: China's Formal Online Education under COVID-19 Zehui Zhan, Liming Huo, Xiao Yao, Baichang Zhong, 2021-09-27 This book investigates how schools, enterprises and families in China have coped with the formal online education in the light of government policy throughout the COVID-19 epidemic outbreak, with special focus on the problems they have encountered and possible solutions. Using grounded theory, over 1000 posts retrieved from public online forums were analyzed under a 4*4 framework, referring to four special time nodes (proposal

period, exploratory period, full deployed period, exiting period) and four major subjects (government, schools, enterprises, families). The book identifies four main issues faced by massive online education during the epidemic: platform selection in proposal period, teacher training in exploratory period, resource integration in full deployed period, and flexibility of returning to schools in exiting period. These findings enlighten us with a deeper understanding of the process of online learning in an educational emergency, helping to develop best countermeasures in similar situations, as well as to provide paths to follow for other countries. The book will appeal to teachers, researchers and school administrators of the online education and education emergency management, as well as those who are interested in Chinese education during the COVID-19 outbreak in general.
