As schools emptied, remote learning rapidly expanded through online services and video chatrooms. Unfortunately, this disrupted many students and teachers who were not accustomed to remote classrooms. This challenge has forced K-12 teachers to think differently about teaching. Unexpectedly and with little time to prepare, they have been confronted with redesigning their curriculum and instruction from face-to-face to online virtual classrooms to protect students from the COVID-19 virus while ensuring that these new online initiatives remain sustainable and useful in the post-pandemic world. As teachers learn to take advantage of the affordances and strengths of the multiple technologies available for virtual classroom instruction, their instruction both in online and face-to-face will impact what and how students learn in the 21st century. The Handbook of Research on Transforming Teachers' Online Pedagogical Reasoning for Engaging K-12 Students in Virtual

The initial section provides foundational pedagogical ideas for constructing engaging virtual learning environments that leverage the unique strengths and opportunities while avoiding the weaknesses and threats of the online world. Blosch, 2020-10-19 \* Get Ready for School Chinese Writing Workbook 2 is for preschoolers and children who are starting to learn to write Chinese. Get them interested and learn Chinese characters through animals \* Your child will learn in MULTIPLE WAYS - colouring, writing, visualising (or choose one way that suits your child) \* UNIQUE METHOD (not found anywhere): We teach Chinese characters broken down into PARTS (not strokes only). A part can be a stroke or a Chinese Alphabet. \* 50 Animal Names in Chinese (including the 12 Chinese Zodiac Animals) \* Animal pictures for colouring. \* Learning is enhanced through activities to recall characters learnt \* Simplified Chinese characters (used in China, Singapore education systems) METHODOLOGY Many learners dread Chinese writing drills - repeating pages and pages of the same Chinese characters. Writing can be fun if done moderately and in varied ways. Your child will be engaged because we \* Limit writing exercises to not more than 15 repetitions per vocabulary \* Create varied activities (e.g. varying word sizes, alternating between similar-looking characters, creating tracing and colouring options) \* Provide more than one way to learn - colour, write, visualise \* Enhance learning through careful selection of vocabulary that builds foundation (e.g. the character 牛 cow/bull appears in other

animals - snail 乌龟 and buffalo 水牛 In our books, we teach Chinese characters broken down into PARTS (not strokes only). A part can be a stroke or a Chinese Alphabet. A Chinese Alphabet is a repetitive component that is made up of 2 to 6 strokes. Learning Chinese Alphabets before learning Chinese characters helps to reduce memory work - don't remember a character by disintegrated strokes, remember it by PARTS (strokes and alphabets) and do it systematically. How much time does a learner need to spend learning to write Chinese characters? Do you need to write every Chinese character that you learn? How many times do you need to write a Chinese character? Is it effective to write a full page of the same Chinese character repeatedly? How to remember all the strokes in a Chinese character easily? If your purpose is to develop the ability to RECALL the Chinese characters you learn, writing the characters is only one way to register them in your mind. More importantly, you need to be able to VISUALISE it, that is able to see \* the components in the character, \* how they are combined and \* the order they are combined. What your child will learn: \* Identify the PARTS (strokes and Chinese Alphabets) in Chinese characters. This will help to build a strong foundation for higher learning \* Learn in MULTIPLE WAYS - colouring, writing, visualising (or choose one way that suits your child) \* Understand the MEANING of the Chinese characters through PICTURES. (Pronunciation and English meaning included) \* Develop hand dexterity to write big and small characters (or focus on big characters first and finish the small characters later)

**free teacher pay teacher downloads: Engaging Virtual Environments** Joanne Ricevuto, Laura McLaughlin, 2023-07-03 In a classroom setting interaction among students is the norm. How do you replicate that informality, spontaneity, and focus online? This book provides you with a framework to think about the different kinds of engagement you want to foster -- whether participation, collaboration, or quick feedback -- and then introduces you to available online tools, some of which may be in your LMS, offers practical tips, and guides you to how make the most of commonly available technologies to achieve your goals. Within the context and progression of a course -- from developing a welcome page, presenting yourself and the purpose of your course, to icebreakers, assignments, and alternative forms of assessment -- the authors introduce you to a range of easy-to-use online tools that they have introduced to the faculty and teachers in their classes, and that foster active learning and student engagement. In doing so they provide a checklist that you can also access and print from the Web, to help you review additional tools from the wide and ever-growing range of tools that are available online and determine whether they are appropriate for what you want to accomplish. This book will help you connect with students, whether you're teaching synchronously or asynchronously, regardless of the devices students may be using; develop community; and introduce you to gamification to add enjoyment and variety to your students' experience of your class. Recognizing that using new tools with confidence requires practice, the authors offer ideas for implementing them in private online spaces. Each chapter concludes with reflection questions that can be addressed individually by the reader or within a learning community to encourage faculty to work together and support each other in virtual teaching and learning. This book addresses the challenge of embracing new models of course offerings to students in the evolving landscape of virtual learning.

**free teacher pay teacher downloads: How I earned \$7339 and so can you.** Isaac Medina, 2019-11-16 In one day I earned \$880 dollars. While watching Netflix I earned \$45 dollars. Doing four

hours of work, thirty days later I earned \$1,239 dollars. All I am saying is - you can too. Want to make money? Stop trying to reinvent the wheel. It has already been proven that you can make money online and there are several large online companies that want you to partner with them to make money. They want to help you make money online because they make money when you make money. Take for instance the multi-billion dollar company Amazon. They offer you several different ways to partner with them. Why do they do that? The answer is simple, they want you to make money and if you make money - they make money. I have partnered with several online companies and each company has done most of the work for me, I just make money. Yes, it sounds far fetched but that is what I do. I create products and I let Amazon, Google, and other companies online sell my products. They do most of the work, Amazon doesn't even charge me a fee to store, promote and sell my products. I am not saying it is easy. What I am saying is that according to reports I have read, more than 7 million people are working (their own business) online and are making a full time living doing so. The question is, do you want to do the same?
