Overview of the Fresh Start Business Grant 2023

The fresh start business grant 2023 is a government-backed initiative aimed at supporting new and existing small businesses that contribute to local economic development. This grant is part of a broader effort to encourage entrepreneurship, job creation, and innovation, especially in communities recovering from economic downturns or facing structural challenges. By providing non-repayable funds, the grant reduces financial barriers that often hinder startups and small enterprises from scaling their operations. The program is structured to promote diversity, inclusivity, and sustainability within the business sector.

Purpose and Goals of the Grant

The primary purpose of the fresh start business grant 2023 is to provide seed capital and growth funding to businesses that demonstrate potential for long-term success. The goals include:

- Encouraging entrepreneurship among underrepresented groups
- Promoting sustainable and innovative business practices
- Supporting job creation and economic revitalization
- Enhancing competitiveness of small businesses in local and global markets

Key Updates in 2023

In 2023, the fresh start business grant program introduced several key updates to improve accessibility and impact. These include expanded eligibility criteria, increased funding limits, streamlined application procedures, and enhanced support services such as business mentoring and training. These changes reflect feedback from previous grant cycles and a commitment to making the grant more responsive to current economic conditions and business needs.

fresh start business grant 2023: *Enhancing Resilience by Boosting Digital Business Transformation in Ukraine* OECD, 2024-05-22 Digital technologies not only offer a vast potential to enhance firm productivity, they can also help enhance resilience and support economic recovery in times of war. The government has made significant strides in accelerating the digital transformation and has reinforced support for digitalisation since the onset of Russia's full-scale invasion in February 2022. While digital technologies have brought significant benefits to the country, Ukraine's SMEs are yet to fully tap into the potential of digitalisation. Beyond war-related challenges, lack of awareness, digital skills shortages, sectoral specificities, and financial constraints complicate their digital development. The government aims to further promote SME digitalisation and is currently preparing its SME Strategy 2024-27. Throughout 2023, the OECD provided guidance to Ukraine on how to help SMEs leverage digitalisation for productivity, resilience, and recovery. This report presents an overview of the findings, looking at i) ways to strengthen the national and subnational institutional and policy framework for SME digitalisation; ii) avenues for targeted digitalisation support services for SMEs, building on the OECD's blueprint; and iii) specific ways digitalisation can help SMEs weather war-related challenges.

fresh start business grant 2023: *A Practical Guide for Startup Valuation* Sinem Derindere Köseoğlu, 2023-09-25 This book sheds new light on the most important contemporary and emerging startup valuation topics. Drawing on the first-hand professional experience of practitioners, professionals, and startup experts from various fields of finance, combined with a sound academic foundation, it offers a practical guide to startup valuation and presents applications, practical examples, and case studies of real startup ecosystems. The book discusses pressing questions, such as: Why are startups in California higher valued than those in New York? Or why do startups based in London receive higher valuations than those in Paris, Berlin, or Milan, even when they are based in similarly-sized economies, share the same industries, and often even have the same investors? Answering these questions, the authors present key topics, such as hierarchical and segmented approaches to startup valuation, business plans, and sensitivity analysis, many methods

such as venture capital valuation, first Chicago valuation, scorecard valuation, Dave Berkus valuation, risk factor summation valuation, and discounted cash flow valuation, in addition to business valuation by data envelopment analysis and real options analysis, as well as critical conceptual issues in the valuation such as expected returns of the venture capital and price versus value concepts, among others. The book will help angel investors, venture capitalists, institutional investors, crowd-based fractional investors, and investment fund professionals understand how to use basic and advanced analytics for a more precise valuation that helps them craft their long-term capital-raising strategy and keep their funding requests in perspective. It will also appeal to students and scholars of finance and business interested in a better understanding of startup valuation.

fresh start business grant 2023: Digital Opportunities in African Businesses Marcio Cruz, 2024-09-18 Adoption of digital technologies is widely acknowledged to boost productivity and employment, stimulate investment, and promote growth and development. Africa has already benefited from a rapid diffusion of information and communications technology, characterized by the widespread adoption of mobile phones. However, access to and use of digital technology among firms is uneven in the region, varying not just among countries but also within them. Consequently, African businesses may not be reaping the full potential benefits offered by ongoing improvements in digital infrastructure. Using rich datasets, Digital Opportunities in African Businesses offers a new understanding of the region's incomplete digitalization--namely, shortfalls in the adoption and effective use of digital technology by firms to perform productive tasks. The research presented here also highlights the challenges in addressing incomplete digitalization, finding that the cost of machinery, equipment, and software, as well as the cost of connectivity to the internet, is significantly more expensive in Africa than elsewhere. Digital Opportunities in African Businesses outlines ways in which the private sector, with support from policy makers, international institutions, and regulators, can help bring down these costs, stimulating more widespread digitalization of the region's firms, thereby boosting productivity and, by extension, economic development. This book will be relevant to anyone with an interest in furthering digitalization across Africa. ----- It is clear that new digital technologies are opening up new opportunities for economic growth. But will African firms be able to take advantage of them? If so, how? To gain traction on these questions, we first need careful empirical research on what firms are currently doing, and rigorous thinking about what is getting in the way of greater adoption. This book delivers on both dimensions. It marries carefully collected new evidence with thoughtful, no-nonsense analysis of firm behavior and how markets are evolving. It is highly recommended reading for researchers and policymakers alike. -- Eric Verhoogen, Professor of International and Public Affairs

and of Economics, Columbia University

fresh start business grant 2023: *Gender Equality in the EU and Ukraine* Agata Włodkowska, Maryana Prokop, Oleksandra Struk, 2025-06-27 This book provides a comprehensive analysis of gender equality and women's rights in Ukraine and the European Union, focusing on both political security and economic- social dimensions. The first part examines European gender policy standards in Ukraine, feminist foreign policy, women's involvement in political protests, and the influential roles of First Ladies like Brigitte Macron, Agata Kornhauser- Duda, and Olena Zelenska in promoting gender equality. It also explores gendered aspects of military service, the portrayal of female refugees, and the EU's response to sexual violence in the context of Russia's war against Ukraine. The second part addresses economic and social issues, including the intersection of gender equality with sustainable development, gender- responsive budgeting, and women's roles in business. It highlights women's contributions to nonprofit organizations and discusses the experiences of Ukrainian female students in Poland as well as the status of single mothers in Ukraine and the UK. The study is relevant for policy formulation by institutions working on gender equality, foreign affairs, and human rights. It is also a valuable resource for universities, research institutes, think tanks, and civil society organizations involved in gender equality, human rights, and peacebuilding in Ukraine and Europe. The interdisciplinary nature of the publication, which integrates research from politics, law, sociology, international relations, economics, and pedagogy, makes it applicable to both general and specialized courses. It is dedicated to researchers and students in the social sciences, offering key insights for courses in gender studies, political science, international relations, human rights studies, eastern policy of EU, development studies, and European integration, and providing a foundation for critical reflection on gender equality policies and EU integration.

fresh start business grant 2023: Supremacy Parmy Olson, 2024-09-10 WINNER OF THE THE FINANCIAL TIMES AND SCHRODERS 2024 BUSINESS BOOK OF THE YEAR AWARD In November of 2022, a webpage was posted online with a simple text box. It was an AI chatbot called ChatGPT, and was unlike any app people had used before. It was more human than a customer service agent, more convenient than a Google search. Behind the scenes, battles for control and prestige between the world's two leading AI firms, OpenAI and DeepMind, who now steers Google's AI efforts, has remained elusive - until now. In Supremacy, Olson, tech writer at Bloomberg, tells the astonishing story of the battle between these two AI firms, their struggles to use their tech for good, and the hazardous direction they could go as they serve two tech Goliaths whose power is unprecedented in history. The story focuses on the continuing rivalry of two key CEOs at the center of it all, who cultivated a religion around their mission to build god-like super intelligent machines: Sam Altman, CEO of OpenAI, and Demis Hassabis, the CEO of DeepMind. Supremacy sharply alerts readers to the real threat of artificial intelligence that its top creators are ignoring: the profit-driven spread of flawed and biased technology into industries, education, media and more. With exclusive access to a network of high-ranking sources, Parmy Olson uses her 13 years of experience covering technology to bring to light the exploitation of the greatest invention in human history, and how it will impact us all.
