french language lessons montreal: The Reconquest Of Montreal Marc Levine, 1991-08-07 Although Montreal has been a bilingual city since 1760 and demographically dominated by French-speakers for well over a century and a quarter, it was not until the late 1960s that full-fledged challenges to the city's English character emerged. Since then, two decades of agitation over the question linguistique as well as the enactment of three language laws have altered the places of French and English in Montreal's schools, public administration, economy, and even commercial signs. In this book, Marc Levine examines the nature of this stunning transformation and, in

particular, the role of public policy in promoting it. The reconquest of Montreal by the French-speaking majority makes for interesting history. It includes episodes of intense conflict and occasional violence and tells the fascinating story of how an economically disadvantaged and culturally threatened linguistic community mobilized politically and used the state to redistribute group power in Canada's second largest city. In addition, the history of Montreal's language question offers analysts of urban politics and public policy an excellent case study of some of the central issues facing cities containing more than one major linguistic community. After tracing the politicization of the language question in the 1960s and 1970s, Levine analyzes the impact of the three controversial language laws enacted by the Quebec provincial government between 1969 and 1977. Exhaustively researched, *The Reconquest of Montreal* is the definitive study of the most explosive issue in Quebec political life. In the series *Conflicts in Urban and Regional Development*, edited by John R. Logan and Todd Swanstrom.

french language lessons montreal: Youth, Language, and Identity Diane Gérin-Lajoie, 2011 This book is a path-breaking examination of identity construction among minority-language youth. Based on a three-year study at two English-language high schools in the Montreal area, it builds on Diane Gérin-Lajoie's previous work on Francophone minority identity in Ontario and extends her analysis to Canada's other official language minority: anglophones living in Quebec. The book begins with an overview of the social and educational reality of Quebec's anglophone minority, and then presents the findings on students' language practices. The central chapters sketch identity portraits of the study's participants, and the later chapters pursue analyses of the themes raised by the study. The result is an original contribution to the understanding of language and identity that will be of interest to school administrators and teachers working in minority-language communities in Canada, and to scholars working on issues of minorities in the social sciences.

french language lessons montreal: Pioneer Science and the Great Plagues Norman F. Cheville, 2021-03-15 *Pioneer Science and the Great Plagues* covers the century when infectious plagues—anthrax, tuberculosis, tetanus, plague, smallpox, and polio—were conquered, and details the important role that veterinary scientists played. The narrative is driven by astonishing events that centered on animal disease: the influenza pandemic of 1872, discovery of the causes of anthrax and tuberculosis in the 1880s, conquest of Texas cattle fever and then yellow fever, German anthrax attacks on the United States during World War I, the tuberculin war of 1931, Japanese biological warfare in the 1940s, and today's bioterror dangers. Veterinary science in the rural Midwest arose from agriculture, but in urban Philadelphia it came from medicine; similar differences occurred in Canada between Toronto and Montreal. As land-grant colleges were established after the American Civil War, individual states followed divergent pathways in supporting veterinary science. Some employed a trade school curriculum that taught agriculturalists to empirically treat animal diseases and others emphasized a curriculum tied to science. This pattern continued for a century, but today some institutions have moved back to the trade school philosophy. Avoiding lessons of the 1910 Flexner Report on medical education reform, university-associated veterinary schools are being approved that do not have control of their own veterinary hospitals, diagnostic laboratories, and research institutes—components that are critical for training students in science. Underlying this change were twin idiosyncrasies of culture—disbelief in science and distrust of government—that spawned scientology, creationism, anti-vaccination movements, and other anti-science scams. As new infectious plagues continue to arise, *Pioneer Science and the Great Plagues* details the strategies we learned defeating plagues from 1860 to 1960—and the essential role veterinary science played. To defeat the plagues of today it is essential we avoid the digital cocoon of disbelief in science and cultural stasis now threatening progress.

french language lessons montreal: Language in Multicultural Education Farideh Salili, Rumjahn Hoosain, 2005-03-01 Many books on multicultural education focus on a country and provide indepth discussion of issues pertinent to that country at the time. Alternately, understanding of multicultural education is sought through comparison between a society of special interest and a reference society, often the United States. An interesting recent example is *Constructing Multicultural Education in a Diverse Society* by Ilghiz Sinagatullin (2003), drawing on the author's knowledge of Russia and more particularly the Republic of Bashkortostan, itself an ethnically and culturally diverse part of Russia. The approach taken in this volume is to focus on an aspect of diversity, and look at its ramifications across the world. This provides an understanding of the nature of multicultural education itself, as well as insights into local issues through the experience of other places.

french language lessons montreal: *Literacy Across Languages and Cultures* Bernardo M. Ferdman, Rose-Marie Weber, Arnulfo G. Ramirez, 1994-03-08 This book examines the linkage between literacy and linguistic diversity, embedding them in their social and cultural contexts. It illustrates that a more complete understanding of literacy among diverse populations and in multicultural societies requires attention to issues of literacy per se as well as to improving an educational process that has relevance beyond members of majority cultures and linguistic groups. The focus of the book is on the social and cultural contexts in which literacy develops and is enacted, with an emphasis on the North American situation. Educators and researchers are discovering that cognitive approaches, while very valuable, are insufficient by themselves to answer important questions about literacy in heterogeneous societies. By considering the implications of family, school, culture, society, and nation for literary processes, the book answers the following questions. In a multi-ethnic context, what does it mean to be literate? What are the processes involved in becoming and being literate in a second language? In what ways is literacy in a second language similar and in what ways is it different from mother-tongue literacy? What factors must be understood to better describe and facilitate literacy acquisition among members of ethnic and linguistic minorities? What are some current approaches that are being used to accomplish this? These are vital questions for researchers and educators in a world that has a large number of immigrants, a variety of multi-ethnic and multi-lingual societies, and an increasing degree of multinational activity. Beyond addressing applied concerns, attending to these questions can provide new insights into basic aspects of literacy.

french language lessons montreal: Negotiating Identities Diane Gerin-Lajoie, 2016-04-06 As members of an official linguistic minority in Canada, Anglophone teachers living and working in Quebec have a distinct experience of the relationship between language and identity. In *Negotiating Identities*, Diane Gerin-Lajoie uses a critical sociological framework to explore the life stories of Anglophone teachers and illustrate the social practices which connect them with their linguistic, cultural, and professional identities. Exploring the complexity of identity as a lived experience, *Negotiating Identities* demonstrates the strength of language as a political force in these educators' lives both in the classroom and outside it. Through comparisons with the other official linguistic minority in Canada, the Francophones, and particularly with Franco-Ontarians, this book tells the stories of Quebec's Anglophone teachers in their own words, providing a unique account of how these individuals make sense of their lives as residents of Quebec.

french language lessons montreal: Why France? Laura Lee Downs, Stéphane Gerson, 2011-11-11 France has long attracted the attention of many of America's most accomplished historians. The field of French history has been vastly influential in American thought, both within the academy and beyond, regardless of France's standing among U.S. political and cultural elites. Even though other countries, from Britain to China, may have had a greater impact on American history, none has exerted quite the same hold on the American historical imagination, particularly in the post-1945 era. To gain a fresh perspective on this passionate relationship, Laura Lee Downs and Stéphane Gerson commissioned a diverse array of historians to write autobiographical essays in which they explore their intellectual, political, and personal engagements with France and its past.

In addition to the essays, *Why France?* includes a lengthy introduction by the editors and an afterword by one of France's most distinguished historians, Roger Chartier. Taken together, these essays provide a rich and thought-provoking portrait of France, the Franco-American relationship, and a half-century of American intellectual life, viewed through the lens of the best scholarship on France.
