There is so much exploitation, trauma, and moral injury in this sector that the average rate of burn-out is two years. Thanks to the good company around me, I have been able to sustain myself in this work for more than twenty-five years. Along the way, I have paid special attention to those who are most excluded, abandoned, and oppressed by the very systems that claim to care for them. I have critically and collaboratively reflected on my praxis over these years and, in this book, I draw together much of what I have learned so that others can start further ahead than I started.

frontline property management ft worth: *Private Equity Financing in Infrastructure and Real Estate* Josephine Gemson, Thillai Rajan A., 2023-04-08 This book provides a comprehensive overview of Private Equity (PE) financing in the infrastructure and real estate sectors. In doing so, it analyzes the impact of such investments in the two sectors, evaluates the types of financing strategies, and explores the value created by such investments. Infrastructure and Real Estate have emerged as a significant asset class for PE investors. In the last three decades, PE firms have invested significant amounts of capital in infrastructure and real estate – sectors which did not feature in their radar before 2000. Between 2000 and 2009, PE firms invested more than USD 200 billion in infrastructure. Real estate sector also witnessed investments of a similar scale as that of infrastructure. Fundraising for infrastructure and real estate was about USD 100 billion and USD 150 billion respectively in 2019, setting new records and reaching all-time highs. This book examines such PE investments – both at a global level and at an emerging economy level, to identify how PE firms have created an impact with their investments, to provide both ready capital and value-addition to sectors which seem to urgently need both. The book is divided into three sections – impact of PE investments, strategies used by PE firms, and value created by such investments. The findings of this research and the corresponding best practices are useful and applicable to students, academicians, researchers, financial institutions, policy makers and law makers, commercial banks and funding agencies, practitioners, the Government, and other parties who are directly or indirectly associated with the development of infrastructure and real estate; and could aid funding agencies,

practitioners and policy makers who are directly responsible for creating and developing infrastructure and real estate for their economies.
