fry s open interview: International Handbook of Internet Research Jeremy Hunsinger, Lisbeth Klastrup, Matthew Allen, 2010-06-17 Internet research spans many disciplines. From the computer or information sciences, through engineering, and to social sciences, humanities and the arts, almost all of our disciplines have made contributions to internet research, whether in the effort to understand the effect of the internet on their area of study, or to investigate the social and political changes related to the internet, or to design and develop software and hardware for the network. The possibility and extent of contributions of internet research vary across disciplines, as do the purposes, methods, and outcomes. Even the epistemological underpinnings differ widely. The internet, then, does not have a discipline of study for itself: It is a field for research (Baym, 2005), an open environment that simultaneously supports many approaches and techniques not otherwise commensurable with each other. There are, of course, some inhibitions that limit explorations in this

field: research ethics, disciplinary conventions, local and national norms, customs, laws, borders, and so on. Yet these limits on the internet as a field for research have not prevented the rapid expansion and exploration of the internet. After nearly two decades of research and scholarship, the limits are a positive contribution, providing bases for discussion and interrogation of the contexts of our research, making internet research better for all. These 'limits,' challenges that constrain the theoretically limitless space for internet research, create boundaries that give definition to the field and provide us with a particular topography that enables research and investigation.

fry s open interview: Creak Francesco Venturi, 2025-08-08 This book explores what pulse phonation is, what it can do, and how it develops into a cultural practice. It is a multidisciplinary inquiry that merges theoretical frameworks with embodied practice to discuss the processes of producing and perceiving pulse phonation, its use and significance in contemporary discourse, its functions in the animal world, and its place in a broader reflection on voice and sound production. It presents a thorough investigation of pulse phonation to jointly take into consideration its sociocultural, bioacoustic, and creative dimensions. In the book, leading scholars and practitioners such as Nassima Abdelli-Beruh, Diana Sidtis, Katherine Meizel, and John Nix present a wide array of approaches, from sociolinguistics and voice anatomy to acoustic ecology and performance studies. These approaches include case studies of creaky voices across cultures and media; physiology and acoustics of the pulse register; creak singing including possibilities, perspectives, pedagogies; pulse phonation, embodiment, and gender; the "phenomenon of extreme vocal fry"; vocology, somatics, and the disease condition; the use of pulse phonation from live arts to film studies; composition, improvisation, and creation with creak; and the pulse register in animal vocalization. This groundbreaking publication concludes with a multifaceted series of testimonies from users and listeners of creaky voices.

fry s open interview: Post-Impressionists in England Barrie Bullen, 2024-03-08 First Published in 1988, *Post-impressionists in England* documents the response of English taste to modern French art from the first Post-Impressionist Exhibition in 1910 to the outbreak of the First World War. The notion of ‘Post-Impressionism’, unlike its earlier counterpart, Impressionism, was an exclusively English contribution to art history. Originally used to denote the work of Cezanne, Van Gogh, Gauguin, Matisse and the Fauve painters, it rapidly assimilated Futurism, Cubism and recent English work like Vorticism. By focusing on one aspect of an important and complex period in British cultural history, J.B. Bullen illuminates not only aesthetic questions but also the way in which those aesthetic issues were determined and conditioned by social and political concerns. Changes in English attitudes to art in this period were so rapid and were modified with such speed that the author has taken a strictly chronological approach to the subject. He sets out clearly the month-by-month developments in English attitudes and traces in detail the debates about modernism in England. To make matters clearer the book is divided into three major parts, each complementary to the others. The introduction surveys the period as a whole and places attitudes to art in the general context of the culture of the time. In the second part the extracts provide selected, concrete and particular examples of the huge range of material upon which the findings of the introduction are based; the writers represented include Roger Fry, Bernard Berenson, Desmond McCarthy, John Singer Sargent, Walter Sickert, Clive Bell, Virginia Woolf and Wyndham Lewis. In the third part a chronology sets out in tabular form month-by-month events- exhibitions and major publications- as they occurred in Britain and in France. This is a must read for scholars and researchers of British cultural history and art history.

fry s open interview: *Chop Fry Watch Learn* Michelle T. King, 2024-05-07 A New York Times Book Review Editors' Choice This delicious book is a must-read for cooks and food lovers. —Lizz Schumer, *People* A spirited new history of Chinese food told through an account of the remarkable life of Fu Pei-mei, the woman who brought Chinese cooking to the world. In 1949, a young Chinese housewife arrived in Taiwan and transformed herself from a novice to a natural in the kitchen. She launched a career as a cookbook author and television cooking instructor that would last four decades. Years later, in America, flipping through her mother’s copies of Fu Pei-mei’s Chinese cookbooks, historian Michelle T. King discovered more than the recipes to meals of her childhood. She found, in Fu’s story and in her food, a vivid portal to another time, when a generation of middle-class, female home cooks navigated the tremendous postwar transformations taking place across the world. In *Chop Fry Watch Learn*, King weaves together stories from her own family and contemporary oral history to present a remarkable argument for how understanding the story of Fu’s life enables us to see Chinese food as both an inheritance of tradition and a truly modern creation, influenced by the historical phenomena of the postwar era. These include a dramatic

increase in the number of women working outside the home, a new proliferation of mass media, the arrival of innovative kitchen tools, and the shifting diplomatic fortunes of China and Taiwan. King reveals how and why, for audiences in Taiwan and around the world, Fu became the ultimate culinary touchstone: the figure against whom all other cooking authorities were measured. And Fu's legacy continues. Her cookbooks have become beloved emblems of cultural memory, passed from parent to child, wherever diasporic Chinese have landed. Informed by the voices of fans across generations, King illuminates the story of Chinese food from the inside: at home, around the family dinner table. The result is a revelatory work, a rich banquet of past and present tastes that will resonate deeply for all of us looking for our histories in the kitchen.

fry s open interview: *Live and Let Fry* Sue Williams, 2018-04-30 For Cass Tuplin, proprietor of the Rusty Bore Takeaway (and definitely not an unlicensed private investigator), it's weird enough that her neighbour Vern has somehow acquired a lady friend. But then he asks Cass to look into the case of the dead rats someone's dumped on Joanne's doorstep. She's barely started when Joanne goes missing, leaving hints of an unsavoury past. Then a private investigator from Melbourne turns up asking questions about Joanne's involvement in a fatal house fire—and before you can say 'unauthorised investigation' Cass is back on the case. Sue Williams is the author of a crime series set in Rusty Bore, population 147. Sue was raised in country Victoria and hotly denies this provided any inspiration for her writing. She is a science and travel writer and a chartered accountant who also holds a PhD in marine biology. These days, Sue lives in Melbourne with her husband. Her previous two Cass Tuplin books are *Murder with the Lot* and *Dead Men Don't Order Flake*. 'Sue Williams is Australia's answer to New Jersey's Janet Evanovich.' NZ Listener 'Finely wrought and highly amusing...a wonderful new series in the comedy crime genre.' Australian 'This book is like going to visit your regional relatives and having a bunch of their friends pop by for a chat. It's comforting, slightly dishevelled, wildly entertaining...Live and Let Fry is self-aware, observant, and with a fresh take on a crime hero, this is as irresistible as potato cakes after a swim.' Readings 'This is a book best not read on the quiet carriage of public transport, as the giggles, snickers and guffaws likely to be emitted may disturb other commuters...Fans of the series will not be disappointed.' BookMooch 'Sue Williams has her recipe down pat: an engaging heroine with a sense of humour as dry as the landscape.' Adelaide Advertiser 'There is no doubt about the value of escapist literature in a world fraught with so many seemingly intractable problems. This book unashamedly belongs to that escapist genre. There can scarcely be better therapy than to immerse oneself for a time in a world where good triumphs over evil and where there is the prospect of a happy ending.' ArtsHub
