i forgot in spanish language: ¿Qué Onda? Cynthia Bejarano, 2005-10-01 Angel was born in Arizona and is part of the in-crowd. She likes clubbing, dancing, and going to car shows. Betzayra is from Mexico City and, despite polio-related disabilities, is the confident group leader of the Mexican girls. Arturo is also from Mexico City; he dresses more fashionably than most other boys and is taunted by the Chicanos. Evelyn was born in Arizona, but her mother was from Mexico and she hangs out with Mexican kids because she thinks they're nicer than Chicanos. How these and some two dozen other young Latinas and Latinos interact forms the basis of a penetrating new study of identity formation among Mexican-origin border youths, taking readers directly into their world to reveal the labyrinth they navigate to shape their identities. For Latina/o adolescents who already find life challenging, the borderland is a place that presents continual affirmations of and contradictions about identity—questions of who is more Mexican than American or vice versa. This book analyzes the construction of Mexicana/o and Chicana/o identities through a four-year ethnographic study in a representative American high school. It reveals how identity politics impacts young people's forms of communication and the cultural spaces they occupy in the school setting. By showing how identities are created and directly influenced by the complexities of geopolitics and sociocultural influences, it stresses the largely unexplored divisions among youths whose identities are located along a wide continuum of "Mexicanness." Through in-depth interviews and focus groups with both Mexicana/o and Chicana/o students, Cynthia Bejarano explores such topics as the creation of distinct styles that reinforce differences between the two groups; the use of language to further distinguish themselves from one another; and social stratification perpetuated by internal colonialism and the "Othering" process. These and other issues are shown to complicate how Latinas/os ethnically identify as Mexicanas/os or Chicanas/os and help explain how they get to this point. In contrast to research that views identity as a reflection of immigration or educational experiences, this study embraces border theory to frame the complex and conflicted relations of adolescents as a result of their identity-making processes. This intimate glimpse into their lives provides valuable information about the diversity among youths and their constant efforts to create, define, and shape their identities according to cultural and social structures.

i forgot in spanish language: Cuba Diaries Isadora Tattlin, 2025-04-08 Isadora Tattlin is the American wife of a European energy consultant posted to Havana in the 1990s. Wisely, the witty Mrs. Tattlin began a diary the day her husband informed her of their new assignment. One of the first entries is her shopping list of things to take, including six gallons of shampoo. For although the Tattlins were provided with a wonderful, big house in Havana, complete with a staff of seven, there wasn't much else money could buy in a country whose shelves are nearly bare. The record of her daily life in Cuba raising her two small children, entertaining her husband's clients (among them Fidel Castro and his ministers and minions), and contending with chronic shortages of, well . . . everything (on the street, tourists are hounded not for money but for soap), is literally stunning. Adventurous and intuitive, Tattlin squeezed every drop of juice--both tasty and repellent--from her experience. She traveled wherever she could (it's not easy--there are few road signs or appealing places to stay or eat). She befriended artists, attended concerts and plays. She gave dozens of parties, attended dozens more. Cuba Diaries--vividly explicit, empathetic, often hilarious--takes the reader deep inside this island country only ninety miles from the U.S., where the average doctor's salary is eleven dollars a month. The reader comes away appalled by the deprivation and drawn by the romance of a weirdly nostalgic Cuba frozen in the 1950s.

i forgot in spanish language: Critical Consciousness in Dual Language Bilingual Education Lisa M. Dorner, Deborah Palmer, Claudia G. Cervantes-Soon, Dan Heiman, Emily R. Crawford, 2022-12-13 This book features case studies that address dual language bilingual education (DLBE) programs, which offer content instruction in two languages to help youth develop fluent bilingualism/biliteracy, high academic achievement, and sociocultural competence. While increasingly popular, the DLBE model is a framework that comes with unique hurdles and challenges. Applying a pioneering critical consciousness approach, the volume provides readers with narratives, awareness, and tools to support culturally and linguistically diverse students and their families. Organized around four major areas--policy, leadership, family and community engagement, teaching and teacher learning--the volume's case studies bring together stories from policymakers, educational leaders, family and community members, and teachers. The case studies spotlight examples in which power imbalances have been identified and shifted through critically conscious actions and offer insight into how to ensure all DLBE programs are nurturing, empowering, multilingual environments for all students, particularly racialized, immigrant, and transnational students. Accessible and varied, the case studies address important topics such as anti-Black racism, digital access, disability, school-district relations, working with undocumented families, and more. Each chapter includes a case narrative, teaching notes, discussion questions, and/or teaching activities to support stakeholders who wish to develop and enact equity in their DLBE policies,

classrooms, and professional development. A key resource for supporting student needs and transformative inquiry in the classroom, this book is ideal for graduate students, professors, leaders, educators, and other stakeholders in bilingual education and language education.

i forgot in spanish language: *Pachucas and Pachucos in Tucson* Laura L. Cummings, 2009-11-15 When the Zoot Suit Riots ignited in Los Angeles in 1943, they quickly became headline news across the country. At their center was a series of attacks by U.S. Marines and sailors on young Mexican American men who dressed in distinctive suits and called themselves pachucos. The media of the day portrayed these youths as miscreants and hoodlums. Even though the outspoken First Lady, Eleanor Roosevelt, quickly labeled them victims of race riots, the initial portrayal has distorted images ever since. A surprising amount of scholarship has reinforced those images, writes Laura Cummings, proceeding from what she calls "the deviance school of thought." This innovative study examines the pachuco phenomenon in a new way. Exploring its growth in Tucson, Arizona, the book combines ethnography, history, and sociolinguistics to contextualize the early years of the phenomenon, its diverse cultural roots, and its language development in Tucson. Unlike other studies, it features first-person research with men and women who—despite a wide span of ages—self-identify as pachucos and pachucas. Through these interviews and her archival research, the author finds that pachuco culture has deep roots in Tucson and the Southwest. And she discovers the importance of the pachuco/caló language variety to a shared sense of pachuquismo. Further, she identifies previously neglected pachuco ties to indigenous Indian languages and cultures in Mexico and the United States. Cummings stresses that the great majority of people conversant with the culture and language do not subscribe to the dynamics of contemporary hardcore gangs, but while zoot suits are no longer the rage today, the pachuco language and sensibilities do live on in Mexican American communities across the Southwest and throughout the United States.

i forgot in spanish language: *The Social Condition of Deaf People* Sara Trovato, Anna Folchi, 2022-05-09 This book is about the social condition of Deaf people, told through a Deaf woman's autobiography and a series of essays investigating how hearing societies relate to Deaf people. Michel Foucault described the powerful one as the beholder who is not seen. This is why a Deaf woman's perspective is important: Minorities that we don't even suspect we have power over observe us in turn. Majorities exert power over minorities by influencing the environment and institutions that simplify or hinder lives: language, mindsets, representations, norms, the use of professional power. Based on data collected by Eurostat, this volume provides the first discussion of statistics on the condition of Deaf people in a series of European countries, concerning education, labor, gender. This creates a new opportunity to discuss inequalities on the basis of data. The case studies in this volume reconstruct untold moments of great advancement in Deaf history, successful didactics supporting bilingualism, the reasons why Deaf empowerment for and by Deaf people does and does not succeed. A work of empowerment is effective if it acts on a double level: the community to be empowered and society at large, resulting in a transformation of society as a whole. This book provides instruments to work towards such a transformation.
