i identify as a problem: Problem-solving Sociology Monica Prasad, 2021 A broad resource that offers tools for how to conduct problem-solving sociology in order to deepen and reformulate our understanding of society. Most students arrive in graduate sociology programs eager to engage with the pressing social and political issues of the day. Yet that initial enthusiasm does not always survive the professional socialization of graduate school. In Problem-Solving Sociology, Monica Prasad shows graduate students and early career sociologists how to conduct research that uses sociological theory to help solve real-world problems, and how to use problem-solving to improve sociological theory. Prasad discusses how to be objective when examining issues of injustice and oppression, and provides methodological strategies and plenty of exercises for research aimed at creating change. She gives examples throughout of problem-solving research conducted at all levels, from undergraduate theses to the major figures of the discipline. She also considers how to respond to some common objections; where problem-solving fits into the landscape of sociological practice; and how to build a life in problem-solving.
