Maintain Authenticity

image small business saturday: Fintech, Small Business & the American Dream Karen G. Mills, 2019-03-12 Small businesses are the backbone of the U.S. economy. They are the biggest job creators and offer a path to the American Dream. But for many, it is difficult to get the capital they need to operate and succeed. In the Great Recession, access to capital for small businesses froze, and in the aftermath, many community banks shuttered their doors and other lenders that had weathered the storm turned to more profitable avenues. For years after the financial crisis, the outlook for many small businesses was bleak. But then a new dawn of financial technology, or "fintech," emerged. Beginning in 2010, new fintech entrepreneurs recognized the gaps in the small business lending market and revolutionized the customer experience for small business owners. Instead of Xeroxing a pile of paperwork and waiting weeks for an answer, small businesses filled out applications online and heard back within hours, sometimes even minutes. Banks scrambled to catch up. Technology companies like Amazon, PayPal, and Square entered the market, and new possibilities for even more transformative products and services began to appear. In Fintech, Small Business & the American Dream, former U.S. Small Business Administrator and Senior Fellow at

Harvard Business School, Karen G. Mills, focuses on the needs of small businesses for capital and how technology will transform the small business lending market. This is a market that has been plagued by frictions: it is hard for a lender to figure out which small businesses are creditworthy, and borrowers often don't know how much money or what kind of loan they need. New streams of data have the power to illuminate the opaque nature of a small business's finances, making it easier for them to weather bumpy cash flows and providing more transparency to potential lenders. Mills charts how fintech has changed and will continue to change small business lending, and how financial innovation and wise regulation can restore a path to the American Dream. An ambitious book grappling with the broad significance of small business to the economy, the historical role of credit markets, the dynamics of innovation cycles, and the policy implications for regulation, *Fintech, Small Business & the American Dream* is relevant to bankers, fintech investors, and regulators; in fact, to anyone who is interested in the future of small business in America.

image small business saturday: The 2.5% Lida Hujić, 2021-02-01 *The 2.5%* (small group - big influence) introduces a ground-breaking model for cool's cyclical reinvention, which explains how idiosyncratic ideas become the norm. A fresh interpretation of Everett Rogers' widely applied 'innovations diffusion', the novelty is its focus on the Innovator (the first type on the innovations diffusion curve, preceding the Early Adopter). Innovators only constitute 2.5% of the population but this globally scattered minority of rule breakers is influential. They are the creators of new trends and new consumption patterns that will shape the mainstream. Based on insider knowledge of

cutting-edge cultures, academic rigour and marketing agility, this robust model is designed to inspire future-proof ideas for market research, innovation and communications professionals but also anyone interested in where trends come from and how and why people adopt them. Very insightful, sure to be a success - Marcelo Amstalden Möller (formerly Global Director, International Brands & Craft Portfolio, HEINEKEN Group B. V; Vice President, Global Brand & Corporate Marketing Communications · Wolters Kluwer) Extraordinarily engaging - Peter Nash (Chair of Programme Committee, inaugural ESOMAR FUSION Conference) A fantastic new analytical narrative [...] fun, thought-provoking [and] well worth a read Dr Nick Baker, Chief Research Officer, SAVANTA; Non-exec Chair of the MARKET RESEARCH SOCIETY (MRS) Very inspiring [and] groundbreaking - Akiko Hoshi (Head of Qualitative Research Advancement, INTAGE QUALIS, Japan) Fully illustrated with original images (not stock photography!), the story features truly inspiring characters and connects the dots between the seemingly unconnected. Readers will be globe trotting: from Detroit, where fascinating communities of makers have taken matters into their own hands (following the city's bankruptcy), to London's uber gentrified neighbourhood of Shoreditch where generations of artists and creative types have acted as its advance troops, from underground market gardeners using left over coffee beans to grow mushrooms in Paris to roof top urban farmers in Hong Kong, from raves in St Petersburg to citizenship protests in New York City, from fashion parties to fashionable clubs and many more. What all the protagonists have in common is their vision to generate (economic) value whilst also creating value for society and their ability to influence brands and corporate businesses to follow suit. This generation of Innovators drove the climate and social inclusivity that started to dominate the corporate and societal agenda in the years following the COVID pandemic. The ideas for the model were developed over three decades, which we call 'cool cycles of reinvention'. The first two decades (1987 - 2007) were presented in The First to Know (how hipsters and mavericks shape the zeitgeist - see here: www.thefirsttoknow.info). Ideas were then put to test in real time over a third (2007 - 2017). The cultural framework proved reliable and The 2.5% was born, introducing the-first-to-know innovation diffusion model. Like the visionary characters it celebrates, The 2.5% is breaking new grounds. It doesn't fit categories. It doesn't lend itself to ticking boxes. The story goes on...It doesn't stop with the book! #the2point5percent <https://www.tftk.info/the-2-5>
