images of teacher appreciation: Proactive Images for Pre-Service Teachers Jeremy Delamarter, 2019-03-23 This book provides tools to help pre-service teachers and teacher-preparation programs identify, evaluate, and respond to misaligned expectations early in the teacher-preparation sequence. Plato tells the story of prisoners who mistake the shadows on the wall of their cave for flesh-and-blood reality. These “shadow narratives” dominated their expectations, and when confronted with a three-dimensional reality that bore little resemblance to the shadows, the prisoners were blinded by the light. Surrounded by images and rhetoric that reduce the fullness of teaching to flat, two-dimensional representations, today's pre-service teachers tend to develop expectations of teaching that resemble the shadows more than they resemble reality. These misaligned expectations often lead to practice shock: the painful and disillusioning cognitive dissonance that comes about when unsustainable expectations collide with real-world practice. Intended as a proactive manual for mitigating practice shock, this book shines a light on the shadows by giving pre-service teachers the tools to examine, confront, and revise their own misaligned expectations of teaching before they reach the point of crisis.

images of teacher appreciation: *Teachers' Career Trajectories and Work Lives* Martin Bayer, Ulf Brinkjaer, Helle Plauborg, Simon Rolls, 2009-06-25 The working and career lives of teachers have changed radically over the last two decades. Reforms have turned education into a commodity and pupils into ‘consumers’. Yet not since 1992 has there been a comprehensive overview of research findings on teachers’ working lives. This anthology plugs the gap by collecting various scholarly contributions and perspectives on teachers’ career trajectories and work lives. The material includes an introduction to previous research within the field, presents a range of contemporary research and offers suggestions as to what lies ahead. Among the contributors are leading educational academics who describe a variety of national contexts, illustrating how problems and challenges relating to the teaching profession manifest themselves and are tackled in different countries. The anthology also shows just how many aspects of teachers’ career trajectories and work lives transcend national boundaries. Common international themes include stronger ties between education and the economy, and a growing importance placed on how students’ skills relate to the perceived needs of the labour market. There is also a greater degree of political interference in curriculum goals and processes, and an expanding obsession with evaluation. In many countries, a whole generation of teachers are reaching retirement age, ‘changing the guard’ with a crop of new

young recruits who are ever harder to attract. At a time when there is an increasing focus on issues such as teacher recruitment, retention and professional development, this anthology offers insight and inspiration to teacher educators and educational policy makers as well as to current and prospective teachers. It also aims at encouraging research into the field of teachers' working lives.

images of teacher appreciation: Music, Education, and Religion Alexis Anja Kallio, Philip Alperson, Heidi Westerlund, 2019-09-20 Essays examining the role of religion in music education from a variety of perspectives. Music, Education, and Religion: Intersections and Entanglements explores the critical role that religion can play in formal and informal music education. As in broader educational studies, research in music education has tended to sidestep the religious dimensions of teaching and learning, often reflecting common assumptions of secularity in contemporary schooling in many parts of the world. This book considers the ways in which the forces of religion and belief construct and complicate the values and practices of music education—including teacher education, curriculum texts, and teaching repertoires. The contributors to this volume embrace a range of perspectives from a variety of disciplines, examining religious, agnostic, skeptical, and atheistic points of view. Music, Education, and Religion is a valuable resource for all music teachers and scholars in related fields, interrogating the sociocultural and epistemological underpinnings of music repertoires and global educational practices. “The book serves as a study volume for all those who are active in this field and provides both systematic reflections and useful empirical studies. A further impressive feature is the regional and religious breadth of the content presented and examined.” —Wolfgang W. Müller, Reading Religion

Media Rakefet Erlich Ron, Shahar Gindi, 2023-06-09 Using Israel as a case study, this book examines teachers' approaches to Controversial Political Issues (CPI) in the classroom. The book focuses on the democratic responsibilities that teachers face in an era where social media use is ubiquitous, and polarization and fake news are increasingly common.
