Overview of Illinois Physical Education State Standards

The Illinois physical education state standards provide a structured framework for delivering quality physical education programs in schools throughout the state. These standards outline clear objectives that focus on developing students' motor skills, knowledge of movement concepts, and attitudes toward physical activity and health. The framework promotes an understanding of the benefits of physical activity, encourages regular participation, and emphasizes safe and effective practices. The standards align with national physical education guidelines, ensuring that Illinois students receive education that meets or exceeds national benchmarks.

These standards are divided into multiple content areas, including movement skills, fitness management, personal and social responsibility, and knowledge

of health-enhancing physical activity. By setting consistent expectations, the Illinois physical education state standards aim to cultivate physical literacy, which is crucial for students' overall development and lifelong wellness.

High school standards require students to demonstrate proficiency in a variety of physical activities, apply fitness knowledge to personal health, and exhibit leadership and cooperation in group settings.

Examples of Grade-Level Standards

Each grade level includes benchmarks that guide instruction and assessment. Examples include:

- **Elementary Grades:** Demonstrate locomotor skills such as running, jumping, and hopping with control and coordination.

- **Middle School:** Understand and apply strategies in team sports, and develop personal fitness plans.
- **High School:** Analyze the effects of physical activity on body systems and demonstrate leadership in group physical activities.

illinois physical education state standards: Shape of the Nation Report National Association for Sport and Physical Education, 2006 For nearly 20 years the National Association for Sport and Physical Education (NASPE) has been conducting the Shape of the Nation Report every few years to summarize information for the profession and the public regarding the status of physical education in the American educational system. The preeminent national authority on physical education and a recognized leader in sport and physical activity, NASPE is partnering on the 2006 Shape of the Nation Report with the American Heart Association (AHA), a national voluntary health agency whose mission is to reduce disability and death from cardiovascular diseases and stroke. This joint project is important to both organizations because, in a time of increasing health risks and health care costs in America, prevention is key and exemplary physical education programs must be part of the solution for inactivity, obesity, and related chronic diseases. The challenge of the first Shape of the Nation Report in 1987 continues in this latest survey. That is, typically state mandates are broad and general, leaving many specifics open to interpretation. The purpose of this Shape of the Nation Report is to provide current information about the status of physical education in each state and the District of Columbia. This report will not only bring attention to the importance of quality, daily physical education programs for all school age children; it will also provide information that can be used as a basis for expanding and improving physical education programs in those states that need

assistance. The vision is that every student will become physically educated and thus possess the knowledge, skills, and confidence to be physically active and healthy for a lifetime. Appended are: (1) National Standards and Guidelines for K-12 Physical Education; (2) Federal Legislation Impacting Physical Education; (3) The Fight for Physical Education in the States; and (4) Public Policy Agenda for Physical Education Research. [This project was also sponsored by the volunteers and leaders of the American Heart Association.].

illinois physical education state standards: Adapted Physical Education National Standards National Consortium for PE for Individuals With Disabilities, 2019-03-18 Adapted Physical Education National Standards, Third Edition, thoroughly covers the latest Adapted Physical Education National Standards (APENS), offering current knowledge and best practices for teaching adapted physical education. This new edition solidifies the book's reputation as an essential resource for adapted physical educators. Representing the first major revision to the standards since 2006, Adapted Physical Education National Standards, Third Edition, fully explains the 15 national standards as established by the National Consortium for Physical Education for Individuals with Disabilities (NCPEID). In addition to updating the national standards, this resource offers educators and professionals two other important updates: a new web study guide and a fresh design of the text. The study guide includes important information and more than 1,100 sample test questions for educators who are studying to take the Certified Adapted Physical Educator (CAPE) exam. This new tool allows candidates to prepare for the exam by taking practice quizzes based on the content within each standard. For each practice quiz, the reader is presented with questions randomly drawn from a pool of questions for that standard, ensuring a wide variety of sample exam

possibilities. The candidate then receives a score and can review the correct and incorrect answers to determine areas for further study. Candidates can also view and download a comprehensive list of all questions for all standards. The new text design makes the content within each standard easier to read, providing a greater understanding of each level at a glance. Each of the 15 standards is presented in five levels. The level for a typical standard is organized this way: Level 1: the standard number and name Level 2: the major components of the standard Level 3: the standard's subcomponents—dependent pieces of knowledge of fact or principle related to the major component Level 4: adapted physical education content—additional knowledge regarding the subcomponents that teachers working with individuals with disabilities need to know Level 5: application of adapted physical education content from level 4 to teaching individuals with disabilities Levels 1 through 3 outline the basic instructional competencies that physical educators who teach students in integrated or segregated environments must be able to demonstrate. Those levels provide the foundation for levels 4 and 5. The standards are logical extensions of SHAPE America's 2017 National Standards for Initial Physical Education Teacher Education, SHAPE America's 2008 Advanced Standards for Physical Education, and the National Board for Professional Teaching Standards' 2014 Physical Education Standards. Adapted Physical Education National Standards, Third Edition, is useful for a variety of stakeholders: Physical education majors and in-service teachers who are preparing for the APENS exam Higher education faculty members who want to evaluate their adapted physical education preparation programs K-12 administrators who want to use APENS exam results for reviewing and hiring new teachers Parents of children who require adapted physical education instruction, to inquire at their child's IEP meeting about the qualifications of the physical educator for their child The book features an appendix of Frequently Asked Questions, a glossary of terms that includes abbreviations and acronyms in the field, and a summative list of references that were used by NCPEID committees in developing the APENS standards. It also includes an overview of NCPEID and a detailed description of how the standards and the certification exam were developed. Adapted Physical Education National Standards, Third Edition, will keep readers up to date on the standards, help them prepare for the CAPE exam, and help ensure that high-quality adapted physical education is available for all students who can benefit from it.
