in 1776 an economics book titled: Promoting Prosperity in Mississippi Brandon N. Cline, Russell S. Sobel, Claudia R. Williamson, 2018-02-13 In this book, we identify key areas for Mississippi economic policy reform. Twenty-one scholars, ten of which are from or work in Mississippi, have contributed original policy research. All twenty chapters were written specifically for Mississippi with a shared goal to promote prosperity in the state. While some of the chapters contain complex policy reforms, we have made every effort to present the concepts and ideas in a

Each chapter was written independently and offers unique insight into different areas of state policy reform. While the topics covered range from tax reform, education reform, healthcare, corporate welfare, occupational licensing and business regulatory reform to criminal justice reform, and natural disaster recovery efforts, there is a clear unifying framework underlying the conclusions reached in each chapter. The theme throughout is that economic growth is best achieved through free market policies, policies which are based on limited government, lower regulations, lower taxes, minimal infringement on contracting and labor markets, secure private property rights, low subsidies, and privatization. Policy based on these principles allows Mississippians to have more rights and more choices in their lives.

in 1776 an economics book titled: Fundamentals and Simplified Principles of Economics Gezahagn Kudama, 2019-12-04 Document from the year 2019 in the subject Economics - Other, grade: University, Wollega University, language: English, abstract: Several people imagine that economics is about money. In fact, this is true to some extent this is true since economics has a lot to do with money: with how much money people are paid; how much they spend; what it costs to buy various items; how much money firms earn; how much money there is in total in the economy. Even if the large number of areas in which our lives are concerned with money, economics is more than just the study of money (Sloman, 2006). In general, the subject matter of economics is generally divided into four parts. They are Production, Consumption, Exchange and Distribution. Production means producing things or creation or addition of utilities to the goods and services to make them capable of satisfying various wants. Consumption deals with human wants and their satisfaction. Exchange refers to transfer of goods and services through the medium of money. Finally, distribution refers to the sharing of income from production by four factors of production namely, land, labor, capital and organization (Sloman, 2006).
