impact mhc management llc: Sustainable Goat Production in the Changing Climate
Veerasamy Sejian, M.V. Silpa, D. Thirunavukkarasu, 2025-06-01 Sustainable Goat Production in the Changing Climate aims to make the global scientific and academic communities aware of the potential of goats as a livestock of the future. When compared to more popular meat sources like cattle and swine, goats have a lower carbon footprint and can aid in mitigating the effects of climate change, as well as improving food production, poverty and equity issues. This book will discuss the implications of climate change on goat production systems and emphasize the physiological potential of goats to adapt to erratically changing climatic conditions. Furthermore, the book includes chapters on strategies to mitigate the effects of climate change on goat production and highlights novel technologies used to assess the impact of heat stress in goats. Technology transfer strategies and policy-related issues will also be covered. Written and edited by an international team of experts on goats, livestock, animal agriculture, and climate-smart food systems, Sustainable Goat Production in the Changing Climate will appeal to a broad audience, from researchers to livestock specialists, veterinarians, and policymakers in food and sustainability. - Explores the potential of goats as future livestock species for animal-origin foods - Summarizes the impact of climate change on goats and goat production systems - Proposes technological interventions, ranging from management to bio-technological solutions - Identifies gaps in technology transfer activities and policymaking and provides solutions

impact mhc management llc: *Second Generation Cell and Gene-Based Therapies* Alain Vertes, Nathan J. Dowden, Devyn Smith, Nasib Qureshi, 2020-02-07 Second Generation Cell and Gene-Based Therapies: Biological Advances, Clinical Outcomes, and Strategies for Capitalisation serves as the only volume to the market to bridge basic science, clinical therapy, technology development, and business in the field of cellular therapy/cytotherapy. After more than two decades of painstaking fundamental research, the concept of therapeutic cells (stem cells, genes, etc.), beyond the concept of vaccines, is reaching clinical trial, with mounting confidence in the safety and efficacy of these products. Nonetheless, numerous incremental technical advances remain to be achieved. Thus, this volume highlights the possible R&D paths, which will ultimately facilitate clinical delivery of cutting edge curative products. The next waves of innovation are reviewed in depth for hematopoietic stem cells, mesenchymal stem cells, tissue engineering, CAR-T cells, and cells of the immune system, as well as for enabling technologies such as gene and genome editing. Additionally, deep dives in product fundamentals, history of science, pathobiology of diseases, scientific and technological bases, and financing and technology adoption constraints are taken to unravel what will shape the cytotherapy industry to the horizon 2025 and beyond. The outcome is not simply a scientific book, but a global perspective on the nascent field combining science,

business, and strategic fundamentals. - Helps readers learn about the most current trends in cell-based therapy, their overall effectiveness from a clinical prospective, and how the industry is moving therapies forward for capitalization - Perspectives section at the end of each chapter summarizes key learnings, hypotheses, and objectives highlighted and combines scientific and business insights - Edited and authored by scientists representing both basic and clinical research and industry, presenting a complete story of the current state and future promise of cellular therapies
