impact world history textbook: (Re)Constructing Memory: School Textbooks and the

Imagination of the Nation James H. Williams, 2014-08-08 This book examines the shifting portrayal of the nation in school textbooks in 14 countries during periods of rapid political, social, and economic change. Drawing on a range of analytic strategies, the authors examine history and civics textbooks, and the teaching of such texts, along with other prominent curricular materials—children’s readers, a required text penned by the head of state, a holocaust curriculum, etc.. The authors analyze the uses of history and pedagogy in building, reinforcing and/or redefining the nation and state especially in the light of challenges to its legitimacy. The primary focus is on countries in developing or transitional contexts. Issues include the teaching of democratic civics in a multiethnic state with little history of democratic governance; shifts in teaching about the Khmer Rouge in post-conflict Cambodia; children’s readers used to define national space in former republics of the Soviet Union; the development of Holocaust education in a context where citizens were both victims and perpetrators of violence; the creation of a national past in Turkmenistan; and so forth. The case studies are supplemented by commentary, an introduction and conclusion.

impact world history textbook: Historical Justice and History Education Matilda Keynes, Henrik Åström Elmersjö, Daniel Lindmark, Björn Norlin, 2021-07-21 This book explores how the expectations of historical justice movements and processes are understood within educational contexts, particularly history education. In recent years, movements for historical justice have gained global momentum and prominence as the focus on righting wrongs from the past has become a feature of contemporary politics. This imperative has manifested in globally diverse contexts including societies emerging from recent, violent conflict, but also established democracies which are increasingly compelled to address the legacies of colonialism, slavery, genocides, and war crimes, as well as other forms of protracted discord. This book examines historical justice from an educational perspective, exploring the myriad ways that education is understood as a site of historical injustice, as well as a mechanism for redress. The editors and contributors analyse the role of history education in processes of historical justice broadly, exploring educational sites, policies, media, and materials. This edited collection is a unique and important touchstone volume for scholars, policy-makers, practitioners, and teachers that can guide future research, policy, and practice in the fields of historical justice, human rights and history education.

impact world history textbook: Textbooks and War Eugenia Roldán Vera, Eckhardt Fuchs, 2018-10-04 This volume reflects on the role played by textbooks in the complex relationship between war and education from a historical and multinational perspective, asking how textbook content and production can play a part in these processes. It has long been established that history textbooks play a key role in shaping the next generation’s understanding of both past events and the concept of ‘friend’ and ‘foe’. Considering both current and historical textbooks, often through a bi-national

comparative approach, the editors and contributors investigate various important aspects of the relationships between textbooks and war, including the role wars play in the creation of national identities (whether the country is on the winning or losing side), the effacement of international wars to highlight a country's exceptionalism, or the obscuring of intra-national conflict through the ways in which a civil war is portrayed. This pioneering book will be of interest and value to students and scholars of textbooks, educational media and the relationships between curricula and war.

impact world history textbook: The Constantly Reshaping Social Identities in the Middle East Gadi Hitman, Eyal Lewin, 2024-12-10 This book arises from papers presented at the first international academic conference by the Middle East and Central Asia Research Center (MECARC) at Ariel University, Israel. It compiles works that address gaps in academic literature, focusing on the influence of communities and leaders on socio-political identities. While much literature on the Middle East often centers on politics and security from a state-centric perspective, this book emphasizes the importance of identities and narratives within cultural, religious, and social contexts. The chapters explore diverse actors shaping identities, highlighting their impact across local, national, regional, and global levels. Aimed at specialists, advanced and undergraduate students in Middle Eastern Studies, Israel Studies, and comparative political science, this volume also appeals to a broader readership interested in the formation of collective identities, especially in the Mediterranean region. It offers insights that are accessible and engaging for those interested in popular social science.

impact world history textbook: Textbooks in School and Society Arthur Woodward, David L. Elliot, Kathleen Carter Nagel, 2013-08-21 Textbooks have been standard schoolroom fixtures for as long as most living citizens of this country can remember. Many turn-of-the-century students were introduced to reading through the moralistic McGuffey Readers and struggled through the rather drab and colorless pages of volumes on history, geography and civics. In contrast, today's textbooks contain not only narrative content accompanied by colorful photographs and graphics, but also section and chapter exercises that are extended through the use of worksheets and other materials. Moreover, the textbook and its related student materials are packaged together with teacher's editions and tests in grade-level sets that amount to content area programs rather than mere texts.

impact world history textbook: History Textbooks and the Wars in Asia Gi-Wook Shin, Daniel C. Sneider, 2011-02-08 Over the past fifteen years Northeast Asia has witnessed growing intraregional exchanges and interactions, especially in the realms of culture and economy. Still, the region cannot escape from the burden of history. This book examines the formation of historical memory in four Northeast Asian societies (China, Japan, South Korea, and Taiwan) and the United States focusing on the period from the beginning of the Sino-Japanese war in 1931 until the formal conclusion of the Pacific War with the San Francisco Peace Treaty of 1951. The contributors analyse the recent efforts of Korean, Japanese, and Chinese scholars to write a 'common history' of Northeast Asia and question the underlying motivations for their efforts and subsequent achievements. In doing so, they contend that the greatest obstacle to reconciliation in Northeast Asia lies in the existence of divided, and often conflicting, historical memories. The book argues that a more fruitful approach lies in understanding how historical memory has evolved in each country and been incorporated into respective master narratives. Through uncovering the existence of different master narratives, it is hoped, citizens will develop a more self-critical, self-reflective

approach to their own history and that such an introspective effort has the potential to lay the foundation for greater self- and mutual understanding and eventual historical reconciliation in the region. This book will be essential reading for students and scholars of Asian history, Asian education and international relations in East Asia.

impact world history textbook: *A Companion to Global Historical Thought* Prasenjit Duara, Viren Murthy, Andrew Sartori, 2014-01-21 *A COMPANION TO GLOBAL HISTORICAL THOUGHT* A Companion to Global Historical Thought provides an overview of the development of historical thinking from the earliest times to the present, directly addressing issues of historiography in a globalized context. Questions concerning the global dissemination of historical writing and the relationship between historiography and other ways of representing the past have become important not only in the academic study of history, but also in public arenas in many countries. With contributions from leading international scholars, the book considers the problem of “the global” – in the multiplicity of traditions of narrating the past; in the global dissemination of modern historical writing; and of “the global” as a concept animating historical imaginations. It explores the different intellectual approaches that have shaped the discipline of history, and the challenges posed by modernity and globalization, while illustrating the shifts in thinking about time and the emergence of historical thought. Complementing *A Companion to Western Historical Thought*, this book places non-Western perspectives on historiography at the center of discussion, helping scholars and students alike make sense of the discipline at the start of the twenty-first century.

impact world history textbook: *Democratic Education* Amy Gutmann, 1999-04-18 A groundbreaking classic that lays out and defends a democratic theory of education Who should have the authority to shape the education of citizens in a democracy? This is the central question posed by Amy Gutmann in the first book-length study of the democratic theory of education. The author tackles a wide range of issues, from the democratic case against book banning to the role of teachers' unions in education, as well as the vexed questions of public support for private schools and affirmative action in college admissions.

impact world history textbook: *Faith and Politics in South Asia* Astha Chadha, 2024-11-18 This book explores the role of faith and politics in shaping the international relations of South Asia. Adopting a neo-classical realist framework and a discourse-historical approach to analyze how religious actors construct their political identities and interests through the interpretation of sacred texts, or exegesis, the book makes several key contributions to the field of international relations. It introduces the concept of exegesis as a novel analytical tool to understand the role of religion in world politics. The book argues that exegesis is not only a theological exercise, but also a political one, as it shapes the worldviews, values, norms, and interests of religious actors. The author applies exegesis to three case studies of South Asia: the partition of India and Pakistan, the rise of Hindu nationalism in India, and the emergence of Islamic radicalism in Pakistan and resurging signs of the same in Bangladesh. The research then challenges the conventional assumptions of IR, such as the secularization thesis, the clash of civilizations, and the rational actor model, by showing how religious actors are not monolithic, homogeneous, or irrational, but rather diverse, heterogeneous, and strategic. The book offers a nuanced and comprehensive understanding of the role of religion in world politics, especially in the context of South Asia. Highlighting the diversity and complexity of the religious landscape in South Asia, which is home to various faiths, sects, movements, and ideologies, this book will be of interest to academics studying global politics, international relations, Asian Studies, and studies on religion and foreign policy.

impact world history textbook: *The Transnational Redress Movement for the Victims of Japanese Military Sexual Slavery* Pyong Gap Min, Thomas Chung, Sejung Sage Yim, 2020-02-10 This

book examines the redress movement for the victims of Japanese military sexual slavery in South Korea, Japan, and the U.S. comprehensively. The Japanese military forcefully mobilized about 80,000-200,000 Asian women to Japanese military brothels and forced them into sexual slavery during the Asian-Pacific War (1932-1945). Korean comfort women are believed to have been the largest group because of Korea's colonial status. The redress movement for the victims started in South Korea in the late 1980s. The emergence of Korean comfort women to society to tell the truth beginning in 1991 and the discovery of Japanese historical documents, proving the responsibility of the Japanese military for establishing and operating military brothels by a Japanese historian in 1992 accelerated the redress movement for the victims. The movement has received strong support from UN human rights bodies, the U.S. and other Western countries. It has also greatly contributed to raising people's consciousness of sexual violence against women at war. However, the Japanese government has not made a sincere apology and compensation to the victims to bring justice to the victims.

impact world history textbook: The Palgrave Handbook of Conflict and History

Education in the Post-Cold War Era Luigi Cajani, Simone Lässig, Maria Repoussi, 2019-06-28
This Handbook provides a systematic and analytical approach to the various dimensions of international, ethnic and domestic conflict over the uses of national history in education since the end of the Cold War. With an upsurge in political, social and cultural upheaval, particularly since the fall of state socialism in Europe, the importance of history textbooks and curricula as tools for influencing the outlooks of entire generations is thrown into sharp relief. Using case studies from 58 countries, this book explores how history education has had the potential to shape political allegiances and collective identities. The contributors highlight the key issues over which conflict has emerged – including the legacies of socialism and communism, war, dictatorships and genocide – issues which frequently point to tensions between adhering to and challenging the idea of a cohesive national identity and historical narrative. Global in scope, the Handbook will appeal to a diverse academic audience, including historians, political scientists, educationists, psychologists, sociologists and scholars working in the field of cultural and media studies.

impact world history textbook: National Identity and Educational Reform Elizabeth

Worden, 2014-02-18 National identity in Moldova remains contested despite repeated attempts by governments, historians, and educators to cultivate a shared sense of national belonging through the development of history textbooks. Concern over professional status and distrust of the government's motivations halted these reforms, demonstrating that the success of such efforts greatly depends on teachers' and citizens' social memory and everyday lives. This volume looks at educational reform and the struggle over national identity in the history classroom from the perspectives of five different groups: elected politicians, Ministry of Education officials, textbook authors and historians, teachers, and students. Each chapter explores the actors' motivations and agendas regarding reform, their role in promoting or obstructing the reform process, and their opinions about the ensuing controversy. Drawing on months of fieldwork and original research, author Elizabeth Worden examines the importance of teachers and students in the success or failure of a reform initiative.

impact world history textbook: *Instrumentalizing the Past* Jan Rydel, Stefan Troebst,

2022-09-20 In today's world, we can point to many international disputes and interstate conflicts fueled by past events. Historical resentments or memories of past suffering or fame are often used to justify political, economic and even territorial demands. Inter-state disputes and historical conflicts should be understood as evidence of political and social tensions related to active, serious differences in the assessment of the common past. The book explains the role of such conflicts in international relations and suggests ways of classifying them. It presents examples of the internationally relevant instrumentalisation of history from different regions of the world and outlines ways of overcoming them.

impact world history textbook: Inter/Cultural Communication Anastacia Kurylo, 2012-07-23

Today, students are more familiar with other cultures than ever before because of the media,

Internet, local diversity, and their own travels abroad. As such, traditional intercultural communication textbooks which focus solely on the ‘differences’ approach aren’t truly effective for today’s students, nor for this field’s growth. Using a social constructionist framework—which explores how culture is constructed and produced in the moments in which it is experienced—Inter/Cultural Communication provides today’s students with a rich understanding of how culture and communication affect and effect each other. Inter/Cultural Communication improves upon current textbooks in four significant ways: (1) It provides a differences approach and a social constructionist approach; (2) It explores the consequences of cultural moments on immediate communication and on larger scale social issues; (3) It is descriptive, not prescriptive, of how culture is communicated; and (4) It introduces intercultural topics, rather than interpersonal topics. Weaving multiple approaches together in order to provide students with a comprehensive understanding of and appreciation for the diversity of cultural and intercultural communication, this text allows them to become more aware of their own identities and how powerful those identities can be in facilitating change—both in their own lives and in the lives of others. In addition, the book will help students deal with unfamiliar cultures and understand those with whom they come in contact when they travel, in their communities, in the workplace, in their home, and online.
