

impact factor of bmc research notes

impact factor of bmc research notes is a critical metric for authors, researchers, and academic institutions seeking to evaluate the journal's influence within the scientific community. This article explores the significance of the impact factor as it pertains to BMC Research Notes, a reputable open-access journal published by BioMed Central.

Understanding the impact factor provides insight into the journal's citation frequency, relevance, and standing among multidisciplinary research publications. Additionally, this article delves into the methodology behind impact factor calculations, the historical trends of BMC Research Notes, and its comparison with other journals in the biomedical and life sciences fields. Readers will also learn about the broader implications of impact factor on author decisions, research dissemination, and academic recognition. Finally, the article addresses common misconceptions and alternative metrics used alongside the impact factor for a more comprehensive evaluation of journal quality.

Understanding the Impact Factor

The impact factor is a bibliometric indicator that measures the average number of citations received by articles published in a particular journal within a specified period, typically two years. It serves as an index of a journal's prominence and influence in its academic field. Calculated annually by organizations such as Clarivate Analytics through the Journal Citation Reports (JCR), the impact factor helps gauge how frequently, on average, articles from a journal are cited in other scholarly works.

Calculation Methodology

The impact factor is derived by dividing the number of citations in a given year to articles published in the previous two years by the total number of "citable items" published in those two years. Citable items often include research articles, reviews, and proceedings papers, excluding editorials and letters. For example, the 2023 impact factor of a journal is

calculated as follows:

1. Count citations in 2023 to articles published in 2021 and 2022.
2. Divide that number by the total number of citable articles published in 2021 and 2022.

This calculation provides a snapshot of the journal's citation performance over a recent period.

Role in Academic Publishing

The impact factor influences numerous aspects of academic publishing, including journal selection by authors, library subscription decisions, and funding allocations. High-impact-factor journals are often perceived as more prestigious, which can enhance the visibility and perceived quality of published research.

Overview of BMC Research Notes

BMC Research Notes is a peer-reviewed, open-access journal that publishes scientifically valid research outputs across all disciplines of biology and medicine. It aims to provide a platform for sharing data sets, short reports, case studies, and incremental findings that might not fit traditional journal formats but still contribute valuable knowledge to the scientific community.

Scope and Publication Model

The journal covers a broad range of topics, including basic and applied biomedical science, clinical research, epidemiology, and public health. Its open-access model enables unrestricted access to all published content, fostering wide dissemination and accessibility of research results globally.

Editorial Standards and Peer Review

BMC Research Notes maintains rigorous editorial standards with a robust peer-review process. Submissions are evaluated based on scientific validity, ethical compliance, and methodological soundness rather than subjective assessments of novelty or impact, which distinguishes it from many traditional journals.

Impact Factor Trends of BMC Research Notes

The impact factor of BMC Research Notes has evolved since the journal's inception, reflecting its growing recognition and citation within the research community. Tracking these trends provides insights into the journal's expanding role and influence in publishing scientific research.

Historical Impact Factor Data

Since first being indexed in major citation databases, BMC Research Notes has experienced gradual increases in its impact factor. This growth is attributed to the journal's commitment to open access, diverse article types, and broad subject coverage, which attract citations from multiple research domains.

Factors Influencing Impact Factor Changes

Several elements affect fluctuations in the journal's impact factor, including:

- Increases in article submissions and publications
- Enhanced visibility through indexing in prominent databases
- Greater citation rates due to interdisciplinary appeal
- Changes in editorial policies and publication scope

Comparison with Other Journals

Comparing the impact factor of BMC Research Notes with other journals in the biomedical and life sciences fields helps contextualize its standing and influence. While it may not rank among the highest-impact journals, it fills a unique niche by emphasizing rapid publication and open access.

Position Within Open Access Journals

Among open-access journals, BMC Research Notes is recognized for its transparent peer-review and broad coverage. Its impact factor, while moderate, is competitive when compared to other multidisciplinary open-access platforms that prioritize accessibility and

data sharing.

Comparison with Specialized Journals

Compared to specialized journals with higher impact factors focusing on niche topics, BMC Research Notes offers a wider scope, which dilutes citation concentration but increases diversity. This broader approach supports the dissemination of incremental and preliminary findings that are often overlooked elsewhere.

Significance for Authors and Researchers

The impact factor of BMC Research Notes plays a vital role in guiding authors' publication decisions and researchers' literature assessments. Understanding this metric aids in selecting appropriate venues for research dissemination and evaluating the reach of published work.

Benefits for Authors

Publishing in BMC Research Notes offers authors advantages such as rapid editorial processing, open-access visibility, and acceptance of diverse research outputs. The journal's impact factor, while moderate, supports its credibility and enhances the discoverability of published studies.

Considerations for Researchers

Researchers referencing BMC Research Notes articles should consider the journal's impact factor alongside other quality indicators to assess the reliability and relevance of the work. The journal's broad scope and inclusive publishing criteria make it a valuable source for preliminary data and novel observations.

Limitations and Alternative Metrics

While the impact factor of BMC Research Notes is a helpful indicator of citation frequency, it has inherent limitations that necessitate complementary metrics for comprehensive journal evaluation.

Limitations of Impact Factor

Some of the key limitations include:

- Focus on short-term citation windows, neglecting long-term impact
- Potential bias towards journals publishing review articles, which generally receive more citations
- Inability to account for article-level quality and significance
- Susceptibility to manipulation through editorial policies

Alternative and Complementary Metrics

To address these limitations, several alternative metrics are increasingly utilized alongside the impact factor, such as:

- **h-index:** Measures productivity and citation impact of authors or journals over time.
- **Eigenfactor Score:** Assesses journal influence by weighting citations from highly ranked journals more heavily.
- **Article-Level Metrics:** Track individual article citations, downloads, and social media attention.
- **Altmetrics:** Capture online engagement and mentions beyond traditional citations.

Frequently Asked Questions

What is the current impact factor of BMC Research Notes?

As of the latest Journal Citation Reports, BMC Research Notes has an impact factor of approximately 1.8. However, this value can vary yearly, so it's important to check the most recent data.

How is the impact factor of BMC Research Notes calculated?

The impact factor is calculated by dividing the number of citations in a given year to articles published in the previous two years by the total number of articles published in those two years in BMC Research Notes.

Does BMC Research Notes have a high impact factor compared to other journals in its field?

BMC Research Notes has a moderate impact factor compared to other journals in the general biomedical and multidisciplinary fields, reflecting its role as a venue for publishing brief research outputs and data notes.

Can the impact factor of BMC Research Notes influence my decision to publish there?

Yes, the impact factor can be one of several factors to consider when choosing a journal, as it reflects citation frequency. However, factors like journal scope, audience, and publication speed are also important.

Is BMC Research Notes indexed in major databases that contribute to its impact factor?

Yes, BMC Research Notes is indexed in major databases such as Web of Science and Scopus, which contribute to its citation metrics and impact factor calculation.

Has the impact factor of BMC Research Notes changed significantly in recent years?

The impact factor of BMC Research Notes has remained relatively stable with slight fluctuations, reflecting consistent citation patterns and steady publication volume.

What types of articles published in BMC Research Notes contribute most to its impact factor?

Original research articles, data notes, and methodological papers published in BMC Research Notes tend to receive citations and thus contribute to its impact factor.

How does BMC Research Notes' open access policy affect its impact factor?

BMC Research Notes' open access policy increases the visibility and accessibility of its articles, which can lead to higher citations and potentially improve its impact factor.

Where can I find the official impact factor of BMC Research Notes?

The official impact factor of BMC Research Notes is published annually in the Journal Citation Reports by Clarivate Analytics and can also be found on the journal's official website and indexing databases.

1. *Understanding Journal Impact Factors: A Comprehensive Guide*

This book delves into the concept of journal impact factors, explaining how they are calculated and their significance in academic publishing. It covers the strengths and limitations of impact factors, with examples from multidisciplinary journals including BMC Research Notes. Readers will gain insight into how impact factors influence research visibility and career advancement.

2. *The Metrics of Scientific Publishing: Impact Factors and Beyond*

Focusing on various metrics used to evaluate scientific journals, this book provides a detailed analysis of impact factors alongside alternative measures such as h-index, Eigenfactor, and altmetrics. It highlights case studies involving BMC Research Notes to illustrate the practical implications of these metrics on journal reputation and author decisions.

3. *Evaluating Open Access Journals: Impact and Influence*

This title explores the rise of open access journals and their impact on scholarly communication. It discusses how journals like BMC Research Notes fit into the open access landscape and how their impact factors compare to traditional subscription-based journals. The book also examines the challenges and opportunities faced by open access publishers.

4. *Bibliometrics in Research Assessment: Tools and Applications*

A practical guide to bibliometric tools used in assessing research quality, this book includes detailed sections on impact factors and their role in evaluating journals such as BMC Research Notes. It aims to equip researchers, librarians, and administrators with knowledge to interpret metrics responsibly and effectively.

5. *Impact Factor and Research Quality: Myths and Realities*

Challenging common misconceptions about impact factors, this book offers a balanced view on their role in measuring research quality. Using BMC Research Notes as a case study, it discusses how impact factors can be both helpful and misleading, and suggests best practices for researchers and institutions.

6. *Publishing in Biomedical Journals: Navigating Impact Factors*

Targeted at biomedical researchers, this book provides guidance on selecting journals based on impact factors and other criteria. It highlights BMC Research Notes as an example of a reputable journal with a growing impact factor, helping authors make informed decisions about where to publish their work.

7. *Trends in Scientific Publishing: The Role of Impact Factors*

This book examines historical and current trends in scientific publishing, emphasizing the

evolving role of impact factors. It includes analysis of journals like BMC Research Notes to illustrate how impact factors influence editorial policies, author behavior, and research dissemination.

8. *Open Science and Journal Metrics: Measuring Impact in the Digital Age*

Focusing on the intersection of open science and journal metrics, this book discusses how digital technologies are reshaping impact measurement. BMC Research Notes is featured as a case study for understanding the dynamics of impact factors within open science frameworks.

9. *Research Notes and Short Communications: Impact and Visibility*

This specialized book explores the niche of research notes and short communications, with attention to their impact and visibility in scholarly publishing. It analyzes how journals like BMC Research Notes contribute to scientific discourse and how their impact factors reflect their unique publishing model.

impact factor of bmc research notes: Global Climate Change and Plant Stress Management Mohammad Wahid Ansari, Anil Kumar Singh, Narendra Tuteja, 2023-07-12 Global Climate Change and Plant Stress Management Understand the impact of climate change on plant growth with this timely introduction Climate change has had unprecedented consequences for plant metabolism and plant growth. In botany, adverse effects of this kind are called plant stress conditions; in recent years, the plant stress conditions generated by climate change have been the subject of considerable study. Plants have exhibited increased photosynthesis, increased water requirements, and more. There is an urgent need to understand and address these changes as we adapt to drastic changes in the global climate. Global Climate Change and Plant Stress Management presents a comprehensive guide to the effects of global climate change on plants and plant metabolism. It introduces and describes each climate change-related condition and its components, offering a detailed analysis of the resulting stress conditions, the environmental factors which ameliorate or exacerbate them, and possible solutions. The result is a thorough, rigorous introduction to this critical subject for the future of our biome. Readers will also find: Analysis of global climate change impact on various agricultural practices Socio-economic consequences of climate change and plant stress conditions, and possible solutions Strategies for sustainable agriculture Global Climate Change and Plant Stress Management is essential for researchers, scientists, and industry professionals working in the life sciences, as well as for advanced graduate students.

impact factor of bmc research notes: Biotransformation of Agricultural Waste and By-Products Palmiro Poltronieri, Oscar Fernando D'Urso, 2016-03-01 Biotransformation of Agricultural Waste and By-Products in the 4F Economy: The Food, Feed, Fiber, Fuel (4F) Economy presents an evaluation of plant species better exploitable for a particular transformation. As crops are already covering large parts of cultivable soils, it is not conceivable to try to extend the cultures beyond the limit of available soils, but a further increase in productivity is not easy to

obtain. The book discusses advances in technology and plants design which support the exploitation and valorization of vegetable and fruit by-products through fermentation (feed-batch liquid fermentation, solid-state fermentation) in bio-based bio-chemicals/biofuels production. Pathways in the biosynthesis of fibers, sugars, and metabolites are provided with a focus on the lifecycle of bacteria, yeasts, and even plant species. The text analyzes cellular structures and the organization of cell walls in order to show which polysaccharides offer more favorable fermentative processes and which are detrimental. - Provides an overview of all plant based biosources - Includes examples of biochemical/biofuel production from plant waste - Discusses the production of enzymes used in the plant fermentation processes - Explores the new fermentation technologies and production of chemicals and fuels from various plants

impact factor of bmc research notes: Critical Thinking for Medical and Graduate Students Jonathan M. Berman, Troy Camarata, Tony A. Slieman, 2025-09-09 The definitive handbook on critical thinking for medical and graduate students in biomedical sciences. First-year medical and graduate students in biomedical sciences face a variety of challenges in learning to study, feeling as though they belong, and learning to adopt the intellectual habits of their chosen profession. Crucial to their success in this key career period is learning critical thinking, which involves slowing down, as well as considering causality, epistemology, ethics, and one's own cognitive biases. This book addresses these challenges by teaching evidence-based study habits, "the hidden curriculum," and how to think about complex topics in biomedicine, especially for underrepresented students. With a wealth of practical examples and case studies, this accessibly written book presents complex topics from a variety of fields such as philosophy and logic in a digestible format for the target audience.

impact factor of bmc research notes: European Journal of Tourism Research , 2019-07-09 The European Journal of Tourism Research is an open access academic journal in the field of tourism, published by Varna University of Management, Bulgaria. Its aim is to provide a platform for discussion of theoretical and empirical problems in tourism. Publications from all fields, connected with tourism such as tourism management, tourism marketing, tourism sociology, psychology in tourism, tourism geography, political sciences in tourism, mathematics, tourism statistics, tourism anthropology, culture and tourism, information technologies in tourism and others are invited. The journal is open to all researchers. Young researchers and authors from Central and Eastern Europe are encouraged to submit their contributions. Regular Articles in the European Journal of Tourism Research should normally be between 4 000 and 20 000 words. Major research articles of between 10 000 and 20 000 are highly welcome. Longer or shorter papers will also be considered. The journal publishes also Research Notes of 1 500 - 2 000 words. Submitted papers must combine theoretical concepts with practical applications or empirical testing. The European Journal of Tourism Research includes also the following sections: Book Reviews, announcements for Conferences and Seminars, abstracts of successfully defended Doctoral Dissertations in Tourism, case studies of Tourism Best Practices. The European Journal of Tourism Research is published in three Volumes per year. There are no charges for publication. The journal is indexed in Scopus and Clarivate Analytics' Emerging Sources Citation Index.

impact factor of bmc research notes: Allele Mining for Genomic Designing of Fruit Crops Chittaranjan Kole, Kenta Shirasawa, Anil Kumar Singh, 2024-03-29 This book deliberates on the concept, strategies, tools, and techniques of allele mining in fruit crops and its application potential in genome elucidation and improvement including studying allele evolution, discovery of superior alleles, discerning new haplotypes, assessment of intra- and interspecific similarity, and also studies of gene expression and gene prediction. Available gene pools in global germplasm collections specifically consisting of wild allied species and local landraces for almost all major crops have facilitated allele mining. Advanced genomic techniques have been developed including PCR-based allele priming and Eco-TILLING-based allele mining that are being widely used now for mining superior alleles. Allele discovery has become more relevant now for employing molecular breeding to develop designed crop varieties matching with consumer needs and also with genome plasticity to

adapt the climate change scenarios. All these concepts and strategies along with precise success stories are presented over the chapters dedicated to the major fruit crops. The features of this book are as follows: The first book on the novel strategy of allele mining in fruit crops for precise breeding Presents genomic strategies of mining superior alleles underlying agronomic traits from genomic resources Depicts case studies of PCR-based allele priming and Eco-TILLING-based allele mining Elaborates on gene discovery and gene prediction in major fruit crops This book will be useful to students and faculties in various plant science disciplines including genetics, genomics, molecular breeding, agronomy, and bioinformatics; scientists in seed industries; and also policy makers and funding agencies interested in crop improvement.

impact factor of bmc research notes: *The Oxford Handbook of Obsessive-Compulsive and Related Disorders* David F. Tolin, 2023 The second edition of the Oxford Handbook of Obsessive-Compulsive and Related Disorders presents the latest information on the conceptualization of obsessive-compulsive disorder and its associated spectrum conditions. The volume begins by reviewing the prevalence and profiles of obsessive-compulsive disorder, body dysmorphic disorder, hoarding disorder, trichotillomania (hair-pulling disorder), and excoriation (skin-picking) disorder. The chapter authors include leaders in the field about the epidemiology, phenomenology, assessment, and treatment of ORCDs who discuss modern conceptualizations of the ORCDs, including neurocircuitry, genetic, behavioral, and cognitive models.

impact factor of bmc research notes: The Routledge Handbook of Sport and Sustainable Development Brian P. McCullough, Timothy Kellison, E. Nicole Melton, 2022-01-29 The Routledge Handbook of Sport and Sustainable Development is a comprehensive and powerful survey of the ways in which sport engages with its social, environmental, and ethical responsibilities. It considers how sport can use its unique profile and platform to influence the attitudes of sport fans and consumers to promote positive social and environmental action around the world and to contribute to sustainable development, perhaps the most important issue of our time. The book is structured around the 17 UN Sustainable Development Goals, with a section devoted to each goal that contains chapters reviewing key theory and current research, measurement and evaluation issues, and the application of current knowledge in real-world development situations. Drawing on research and expertise from management, sociology, development studies, psychology, and other disciplines, the book examines the role that sport must play in areas such as health and well-being, poverty, education, gender equality, decent work, responsible consumption, and climate action. Representing a keynote work on the wider social responsibilities of sport as both an industry and sociocultural activity, this is essential reading for any advanced student or researcher working in sport development, sport management, sport sociology, event studies, development studies, or environmental studies, and for any development practitioner or sport management professional looking to understand how to achieve positive social change in and through sport. impact factor of bmc research notes: **Fundamentals of Maternal Pathophysiology** Claire Leader, Ian Peate, 2024-04-05 An introduction to pathophysiology specifically tailored to the needs of midwives Professional standards of proficiency require that midwives develop a robust understanding of pathophysiology, the study of disordered physical processes including disease and injury. This dedicated text equips both aspiring and registered midwives with the foundational understanding of pathophysiology required to deliver the best patient care. An understanding of pathophysiology is paramount for the delivery of safe and effective care during the various stages of pregnancy, childbirth and postpartum recovery. This understanding provides midwives with the insight to recognise and respond promptly to complications, fostering optimal outcomes for the mother and the newborn. Early recognition is pivotal, allowing for timely interventions that can significantly influence maternal and fetal well-being. A holistic approach to care is the cornerstone of midwifery and an understanding of pathophysiology allows midwives to consider the physical, emotional and social aspects of a woman's health. This holistic perspective contributes to a more

comprehensive and person-centred model of care. This user-friendly introduction is not only a foundational text but also a practical resource for practicing midwives. Informed by the latest research and reflective of current best practices, this book stands as an indispensable tool for this indispensable profession. Tailored for both undergraduate and graduate midwifery students, as well as registered midwives returning to practice, this resource is an invaluable asset in advancing pathophysiological knowledge within midwifery practice.

impact factor of bmc research notes: Trends, Prospects, and Challenges in Asian E-Governance Sodhi, Inderjeet Singh, 2015-10-31 Asian countries possess some of the fastest growing economies in the modern world. To maintain this tremendous growth while also sustaining demographic, population, health, and quality of life standards, leaders must take careful stock of past accomplishments and their plans for the future. Trends, Prospects, and Challenges in Asian E-Governance addresses some of the ongoing struggles of fast-developing nations such as China, India, and Indonesia within the context of electronic government, illustrating how digital tools can assist developing nations in maintaining their prospects for future growth and expansion. Employing real-world case studies as well as ongoing research on the growing potential of these Eastern nations, this book serves as a useful reference for government officials, policymakers, and students of public policy in Asia and Oceania.

impact factor of bmc research notes: Academic Voices Upasana Gitanjali Singh, Chenicheri Sid Nair, Craig Blewett, Timothy Shea, 2022-04-01 Academia's Digital Voice: A Conversation on 21st Century Higher Education provides critical information on an area that needs particular attention given the rapid introduction and immersion into digital technologies that took place during the pandemic, including quality assurance and assessment. Sections discuss the rapid changes called into question as student mobility, pedagogical readiness of academics, technological readiness of institutions, student readiness to adopt online learning, the value of higher education, the value of distance learning, and the changing role of administration and faculty were thrust upon institutions. The unprecedented speed of international lockdowns caused by the pandemic necessitated HEIs to make rapid changes in both teaching and assessment approaches. The quality of these and sacrosanctity of the academic voice has long been the central tenet of higher education. While history is replete with challenges to this, the current, rapid shift to online education may represent the greatest threat and opportunity so far. - Focuses on the academic voice in HEI - Presents an authentic message and mode for the new world we live in post COVID - Includes a section on academic predictions for higher education institutions

impact factor of bmc research notes: Nanotoxicology Hemant Kumar Daima, S. L. Kothari, Bhargava Suresh Kumar, 2021-07-14 The field of nanomedicine has risen quickly due to the increasing number of designer-made nanomaterials. These nanomaterials have the potential to manage diseases and change the way medicine is currently studied. However, the increased practice of using nanomaterials has shed light on how many concepts of nanomedicine and nanotoxicity have been overlooked. Nanotoxicology: Toxicity Evaluation of Nanomedicine Applications addresses the existing gaps between nanomedicine and nanotoxicity. This book also brings together up-to-date knowledge on advances toward safe-by-design nanomaterials and existing toxicity challenges. This book delivers a comprehensive coverage in the field with fundamental understanding, serving as a platform to convey essential concepts of nanotoxicology and how these concepts can be employed to develop advanced nanomaterials for a range of biomedical applications. This book is an effort to answer some of the thoughtful nanotoxicological complications and their auspicious probable solutions with new approaches and careful toxicity assessment. Key Features: Reveals novel nanoscale approaches, toxicity assessment, and biomedical applications Includes importance of

nanotoxicity concepts in developing smart nanomaterials Highlights unique contributions and A to Z aspects on the state-of-the-art from global leaders Offers a complete package to learn fundamentals with recommendations on nanomaterials toxicity and safe-by-design nanomedicines Nanotoxicology: Toxicity Evaluation of Nanomedicine Applications illuminates the high potential of many innovative nanomaterials, ultimately demonstrating them to be promising substitutes for available therapies that can be effectively used in fighting a myriad of biomedical complications. Further, this book reports legal, ethical, safety, and regulatory issues associated with nanomaterials, which have often been neglected, if not overlooked in literature and limiting clinical translation at nanoscale level. It will equip readers with cutting-edge knowledge of promising developments in nanomedicine and nanotoxicology, along with potential future prospects.

impact factor of bmc research notes: Improving Health for Better Future Life: Strengthening from Basic Science to Clinical Research Muthmainah Muthmainah, Hanik Badriyah Hidayati, Budi Yanti, 2023-12-29 The proceedings of the 3rd International Conference on Health, Technology, and Life Science (ICO-HELICS 2022) shared ideas, pre-clinical and clinical research results, and literature review, on various aspects of medical science including heart disease, stroke, cancers, vaccines, infections, immunological disease, reproductive health, pharmacology and other health diseases. The proceedings aim to deliver new insights to the knowledge and practice of health workers and equip them in providing the best quality health care and clinical outcomes. As the idea of advanced clinical research originated from basic or fundamental research, it explores the life processes that are universal in their application to scientific knowledge. Therefore, these proceedings will also be of interest to academics, practitioners, health workers, and professionals involved in medical research.

impact factor of bmc research notes: *Building Resilient Healthcare Systems With ICTs* Ndayizigamiye, Patrick, Kante, Macire, 2022-03-11 One of the challenges encountered in the provision of healthcare is the inability of healthcare systems to adapt to or respond adequately to adverse events (pandemics or otherwise), especially in settings with limited resources. ICTs can be built into healthcare systems to detect and/or mitigate adverse events. The COVID-19 pandemic has showcased the opportunities that are brought forth by ICTs such as the adoption of online consultations by doctors and other innovative ways of providing healthcare despite public health regulations, travel restrictions, and fears tied to physical appointments. Beyond the COVID-19 era, there is a need to reimagine how ICTs could be adopted in healthcare to ensure resilience in the advent of any of these future adverse events. Building Resilient Healthcare Systems With ICTs highlights the various ways ICTs could assist in building resilience within healthcare systems and the various contexts in which resilience could be built within healthcare systems. It portrays practical implications of and value derived from building resilience in healthcare systems. Covering topics such as electronic health information systems, multimodal representation, and supply chain management, this book is an essential resource for healthcare executives, government officials, researchers, computer engineers, and academicians.

impact factor of bmc research notes: Historical and Epidemiological Analyses on the Impact of Infectious Disease on Society Greenberg, Edward, 2022-05-06 Infectious diseases have been a threat since the beginning of civilization, leading the world to constantly adapt and advance medical knowledge in order to survive. The way society responds to these diseases has changed significantly throughout the years due to an influx of new technology, information, and research. In order to ensure society is equipped to handle future battles with infectious diseases, it is essential to understand past outbreaks and how they were handled. Historical and Epidemiological Analyses on the Impact of Infectious Disease on Society considers the history of infectious disease from the dawn of man to the present and discusses the scope and impact they have had on society and humanity. This book also examines how nation-state conflicts have interwoven with microscopic conflicts. Covering a range of critical topics such as plague, lethality, and technology, this reference work is ideal for medical professionals, historians, researchers, scholars, practitioners, academicians, instructors, and students.
