in the movie october sky questions and answers: Leaving to Learn: How Out-of-School Learning Increases Student Engagement and Reduces Dropout Rates Elliot Washor, Charles Mojkowski, 2013-10-11 In this provocative book, authors Washor and Mojkowski observe that beneath the worrisome levels of dropouts from our nation's high school lurks a more insidious problem: student disengagement from school and from deep and productive learning. To keep students in school and engaged as productive learners through to graduation, schools must provide

experiences in which all students do some of their learning outside school as a formal part of their programs of study. All students need to leave school—frequently, regularly, and, of course, temporarily—to stay in school and persist in their learning. To accomplish this, schools must combine academic learning with experiential learning, allowing students to bring real-world learning back into the school, where it should be recognized, assessed, and awarded academic credit. Learning outside of school, as a complement to in-school learning, provides opportunities for deep engagement in rigorous learning.

in the movie october sky questions and answers: **Butterflies on a Sea Wind** Anne Rudloe, 2012-11-06 This memoir by a marine biologist “sings the life of a beginning Zen practitioner. . . . [with] a haunting, beautiful appreciation of the natural world.”(Publishers Weekly) Anne Rudloe was attracted to Zen as a college student. But it seemed premature for a twenty-one-year-old to focus on the difficulties of life when she'd hardly begun to live. Twenty-five years later, she was ready to explore the spiritual discipline that originated in Asian monasteries more than a millennium ago. Rudloe's quest is compellingly chronicled in *Butterflies on a Sea Wind*, which combines the rigor of formal monastic Zen practice with the challenges of integrating Zen concepts into modern daily life. Her narrative describes both the physical and mental demands of Zen retreats and how she applied what she learned there to her work as a marine biologist in Florida, as well as to the rigors of raising children and caring for an elderly grandmother. In words that intimately draw in her readers, she describes how Zen helps us look inward and use the wisdom we find there to reach out to others. During the 1990s, the number of organized Buddhist centers in this country grew more than 40 percent, from 429 to 1,062. While there are many books about Zen on the market today, few give a clear picture of what it's like to actually sit down and begin a meditation practice and then apply it to a daily life. Likewise, few books discuss the types of issues most people face every day: raising a family and earning a living. *Butterflies on a Sea Wind* does all this and more.
