

in the study of communication narratives

in the study of communication narratives, understanding how stories are constructed and conveyed plays a crucial role in analyzing human interaction and information exchange. Communication narratives serve as frameworks through which individuals and groups interpret experiences and share meaning. This article explores the multifaceted dimensions of narratives in communication, examining their theoretical foundations, types, functions, and methodological approaches. Additionally, it discusses the impact of culture, media, and technology on narrative communication, highlighting contemporary trends and challenges. By delving into these areas, the article provides a comprehensive overview of how narratives shape communication dynamics across various contexts. The following sections will guide readers through key concepts, analytical techniques, and practical implications in the study of communication narratives.

- Theoretical Foundations of Communication Narratives
- Types and Structures of Narratives in Communication
- Functions and Roles of Narratives
- Methodological Approaches to Analyzing Narratives
- Influence of Culture, Media, and Technology

Theoretical Foundations of Communication Narratives

The study of communication narratives is grounded in several theoretical frameworks that explain how stories influence understanding and interaction. Narrative theory posits that humans naturally organize experiences into stories to make sense of the world. This perspective emphasizes the structural elements of narratives such as plot, characters, and temporality. Additionally, social constructivist theories highlight how narratives contribute to the construction of social realities by shaping collective meaning and identity. Semiotics, the study of signs and symbols, also provides insight into how narratives function as systems of meaning within communication. Together, these theories offer a robust foundation for analyzing the role of narratives in conveying information and shaping perceptions.

Narrative Theory and Structure

Narrative theory focuses on the elements that compose a story and how these elements interact to produce meaning. Key components include the setting, plot, characters, conflict, and resolution. In communication, narratives follow a structure that guides the audience through a sequence of events, creating coherence and engagement. Understanding these structural features allows scholars to dissect the ways stories influence listener interpretation and response.

Social Constructivism and Narrative Identity

From a social constructivist viewpoint, narratives are instrumental in forming social identities and shared realities. Stories are not merely recountings of events but active processes that construct meaning within cultural and social contexts. This approach underscores the power of narratives to shape beliefs, values, and group cohesion through communication.

Types and Structures of Narratives in Communication

Communication narratives manifest in various forms, each serving distinct purposes and audiences. Recognizing the types and structures of narratives enhances the ability to analyze communication across different settings, including interpersonal, organizational, and mass media contexts. These narratives range from personal anecdotes to institutional storytelling and public discourse, each characterized by unique stylistic and structural features.

Personal and Interpersonal Narratives

Personal narratives are stories individuals tell about themselves, often reflecting identity, experiences, and emotions. Interpersonal narratives occur within dyadic or small group interactions, facilitating relationship-building and mutual understanding. These narratives typically emphasize subjective experience and emotional resonance.

Organizational and Institutional Narratives

Organizations use narratives to communicate values, culture, and strategic goals both internally and externally. Institutional narratives often follow formalized structures and are designed to influence stakeholder perceptions and behavior. These narratives play a critical role in branding and corporate communication.

Public and Media Narratives

Public narratives are widespread stories disseminated through mass media and public discourse. They shape collective opinions and social norms by framing issues in particular ways. Media narratives employ techniques such as framing, agenda-setting, and storytelling conventions to engage large audiences.

Common Narrative Structures

- Linear narratives: chronological storytelling with a clear beginning, middle, and end.
- Non-linear narratives: stories that use flashbacks, multiple perspectives, or fragmented timelines.
- Circular narratives: narratives that return to the starting point, emphasizing cyclical themes.

- Interactive narratives: stories that involve audience participation or multiple potential outcomes.

Functions and Roles of Narratives

Narratives fulfill numerous functions within communication, serving as vehicles for information transmission, persuasion, identity formation, and social connection. Understanding these roles is essential for comprehending how narratives operate in different communicative contexts and why they are so effective in influencing attitudes and behaviors.

Informational and Educational Functions

Narratives help organize and present information in an accessible and memorable way, enhancing learning and comprehension. Educational narratives use storytelling to contextualize facts, making complex information more relatable and retaining audience interest.

Persuasive and Rhetorical Functions

In persuasive communication, narratives are powerful tools for shaping opinions and motivating action. Through emotional appeal and relatable characters, stories can influence attitudes and decisions more effectively than abstract arguments alone.

Identity Construction and Social Bonding

Narratives contribute to the construction of personal and collective identities by providing frameworks for understanding self and community. Sharing stories fosters social bonds and solidarity, reinforcing group values and cultural continuity.

Methodological Approaches to Analyzing Narratives

Analyzing communication narratives requires diverse methodological approaches that capture their complexity and contextual nuances. Researchers employ qualitative and quantitative methods to examine narrative content, structure, function, and impact. These approaches provide insights into how narratives operate within various communicative environments.

Content Analysis

Content analysis systematically categorizes narrative elements such as themes, motifs, and language patterns. This method allows researchers to identify dominant narratives and their variations across different media or populations.

Narrative Analysis

Narrative analysis focuses on the structure and organization of stories, exploring how plot development, temporality, and character roles contribute to meaning-making. This approach often involves close reading and interpretation of narrative texts or transcripts.

Discourse Analysis

Discourse analysis examines how narratives function within broader communicative practices, considering power relations, ideology, and social context. It reveals how stories shape and are shaped by societal norms and institutional frameworks.

Ethnographic and Interpretive Methods

Ethnographic approaches immerse researchers in communicative contexts to understand how narratives emerge and operate in real-life interactions. Interpretive methods prioritize participants' perspectives and the cultural significance of storytelling.

Influence of Culture, Media, and Technology

The study of communication narratives must account for the dynamic influences of culture, media, and technological advancements. These factors shape narrative forms, dissemination, and reception, transforming how stories are told and understood in contemporary society.

Cultural Variations in Narratives

Cultural backgrounds profoundly influence narrative themes, structures, and functions. Different cultures prioritize diverse storytelling traditions and values, affecting how narratives are constructed and interpreted. Recognizing these variations is vital for cross-cultural communication analysis.

Media's Role in Shaping Narratives

Mass media channels act as powerful platforms for disseminating narratives to wide audiences. Media organizations select and frame stories in ways that influence public perception and discourse. The media's role in agenda-setting and framing underscores its impact on narrative construction.

Technological Impact on Narrative Communication

Advancements in digital technology and social media have revolutionized narrative communication by enabling interactive, multimodal, and user-generated storytelling. These technologies facilitate rapid dissemination and diversification of narratives, while also posing challenges related to authenticity and information overload.

Emerging Trends in Narrative Communication

- Transmedia storytelling: narratives that unfold across multiple media platforms.
- Participatory narratives: audience involvement in story creation and evolution.
- AI-generated narratives: use of artificial intelligence to produce and analyze stories.
- Visual and multimedia narratives: integration of images, video, and sound with text.

Frequently Asked Questions

What role do narratives play in the study of communication?

Narratives serve as a fundamental method through which individuals construct and share meaning, allowing researchers to understand how people make sense of their experiences and communicate those meanings to others.

How can narrative analysis be applied in communication research?

Narrative analysis involves examining the structure, content, and context of stories told in communication to uncover underlying themes, cultural values, and social dynamics influencing interactions.

Why are personal narratives important in interpersonal communication studies?

Personal narratives help reveal individuals' identities, emotions, and relational dynamics, providing insight into how people build and maintain relationships through storytelling.

What is the difference between narrative and discourse analysis in communication?

While both analyze language use, narrative analysis focuses specifically on the stories people tell and their structure, whereas discourse analysis examines broader language patterns and power relations within communication.

How do cultural narratives influence communication practices?

Cultural narratives shape the shared meanings, norms, and expectations within communities, influencing how messages are constructed, interpreted, and responded to in communication.

What challenges do researchers face when studying narratives in communication?

Challenges include subjectivity in interpreting stories, variability in narrative forms across cultures, and difficulties in capturing the dynamic and context-dependent nature of narratives.

How has digital media impacted the study of communication narratives?

Digital media has expanded the platforms and forms of storytelling, introducing multimodal narratives and enabling more interactive and participatory communication, which requires new analytical approaches.

Can narratives be persuasive in communication? If so, how?

Yes, narratives are persuasive because they engage emotions, create relatable contexts, and help audiences connect with messages on a personal level, making arguments more memorable and impactful.

What theories underpin the study of narratives in communication?

Key theories include Narrative Paradigm Theory, which views humans as storytelling beings, and Social Constructionism, which emphasizes how narratives construct social realities and identities.

Additional Resources

1. "Narrative Theory: Core Concepts and Critical Debates"

This book offers a comprehensive exploration of narrative theory, focusing on how stories shape human communication. It examines key concepts such as narrative structure, temporality, and point of view, and discusses debates within the field. Ideal for students and scholars, it bridges theory with practical examples from various media.

2. "The Storytelling Animal: How Stories Make Us Human"

Jonathan Gottschall delves into the evolutionary roots of storytelling, arguing that narratives are fundamental to human nature. The book explains how stories influence communication, culture, and cognition. It combines scientific research with engaging anecdotes to reveal why storytelling is essential to our social lives.

3. "Communication as Culture: Essays on Media and Society"

James W. Carey's seminal work presents communication as a symbolic process that shapes culture through shared narratives. The essays explore how media and communication practices construct social reality. This collection is foundational for understanding the role of narrative in cultural communication.

4. "Narrative Communication: Theoretical and Applied Perspectives"

This text examines narrative communication from both theoretical and applied angles, addressing

how stories function in interpersonal, organizational, and mass communication contexts. It emphasizes the persuasive power of narrative and its use in fields like marketing and health communication. The book includes case studies to illustrate key concepts.

5. *"Storytelling in Organizations: Facts, Fictions, and Fantasies"*

This book investigates how narratives operate within organizational settings, influencing culture, identity, and power dynamics. It highlights storytelling as a tool for leadership, change management, and conflict resolution. The authors provide practical frameworks for analyzing and crafting organizational stories.

6. *"Narrative and Media"*

Focused on the intersection of narrative and various media forms, this book explores how storytelling adapts across platforms such as film, television, and digital media. It discusses narrative techniques and their impact on audience engagement and interpretation. The volume provides critical insights into the evolving nature of narrative communication in the digital age.

7. *"The Power of Stories: A Guide for Leading Multi-Racial and Multi-Cultural Congregations"*

This book addresses the use of narrative to foster understanding and unity in diverse communities. It offers strategies for leaders to utilize storytelling to bridge cultural divides and promote inclusive communication. Through real-life examples, it demonstrates the transformative power of shared narratives.

8. *"Narrative Identity and Everyday Life"*

This volume explores how individuals construct their identities through narrative communication in daily interactions. It discusses the role of personal stories in shaping self-concept and social relationships. The book combines theoretical insights with qualitative research on narrative identity.

9. *"The Rhetoric of Narrative in Education"*

This book examines the use of narrative as a rhetorical tool in educational contexts. It highlights how storytelling can enhance teaching, learning, and curriculum development by making content more relatable and memorable. The authors provide examples of narrative strategies employed in diverse educational settings.

in the study of communication narratives: A Multi-Perspective Approach to Narratives in Health Communication Julie E. Volkman, 2025-07-10 This edited volume offers an accessible avenue for improving health and well-being by demonstrating the power of narrative in advocating for yourself, your family, and your community. Leading scholars of health communication draw on a variety of perspectives, theories, and methodologies and incorporate their own personal experiences of narratives to demonstrate the compelling reasons why narratives should be studied and applied in a wide range of health contexts. Each chapter contains future directions for advancing research and

applying narratives to encourage readers to explore what narratives for health mean for themselves and others.

in the study of communication narratives: Narrative, Identity, and Academic Community in Higher Education Brian Attebery, John Gribas, Mark K McBeth, Paul Sivitz, Kandi Turley-Ames, 2017-03-16 Grounded in narrative theory, this book offers a case study of a liberal arts college's use of narrative to help build identity, community, and collaboration within the college faculty across a range of disciplines, including history, psychology, sociology, theatre and dance, literature, anthropology, and communication. Exploring issues of methodology and their practical application, this narrative project speaks to the construction of identity for the liberal arts in today's higher education climate. Narrative, Identity, and Academic Community focuses on the ways a cross-disciplinary emphasis on narrative can impact institutions in North America and contribute to the discussion of strategies to foster bottom-up, faculty-driven collaboration and innovation.

in the study of communication narratives: Handbook of Communication in Anaesthesia, Pain Management, and Intensive Care, 2024-09-03 Communication in anaesthesia, pain management, and intensive care can have profound impacts on patients and healthcare colleagues. Good communication can result in better patient outcomes and experiences of the hospital setting, whereas poor communication is frequently at the heart of adverse incidents, complaints, and litigation. This handbook outlines two model frameworks to improve communication: one to give structure to an interaction and one that explores language structures and the layers of meaning to our words. The frameworks are essential tools for communicating with children, obstetric patients, and those with needle phobia. A practical guide, the book is packed with useful tips to enhance interactions with both patients and colleagues. Numerous examples and vignettes clearly demonstrate ideas that will improve patient care, safety, and bring out the best in everyone around. Fully updated with new clinical guidelines and literature, the second edition includes new chapters on how to talk to patients in pain, featuring motivational interviewing techniques, and on social media. Increased coverage of managing challenging situations, includes communicating with distressed relatives, dealing with complaints, and working with interpreters. The contributors and editors are senior clinicians from North America, Europe, and Australasia, working at the coalface of perioperative and critical care. Blending theory, science, and practicality, this book complements resources for communication skills teaching in anaesthesia and other related professional groups.

in the study of communication narratives: Microhistories of Communication Studies Pat Gehrke, 2018-04-19 The story of an academic discipline is usually conveyed in grand movements and long spans, but it can also be told through the lives of individual scholars, through the development of specialties, through the creation and change of departments, and through the formation and transformation of organizations. Using twelve histories of micro-dimensions of communication studies, this volume shows how sometimes small decisions, single scholars, individual departments, and marginalized voices can have dramatic roles in the history and future of an academic discipline. As a compilation of micro-histories with macro-lessons this volume stands alone in communication studies. Read as a companion to A Century of Communication Studies, the National Communication Association's centennial volume, it offers rich detail, missing links, and local narratives that fully flesh out the discipline. In either case, no education in communication studies is complete without an understanding of the themes, challenges, and triumphs embodied by the twelve micro-histories offered in this book. This book was originally published as two special issues of Review of Communication.

in the study of communication narratives: Alterity and Narrative Kathleen Glenister Roberts, 2012-02-01 Drawing from the fields of rhetoric, cultural studies, literature, and folkloristics, Kathleen Glenister Roberts argues that identity and the history of alterity in the West can be understood more clearly through narrative motifs. She provides analyses of these motifs including infanticide, universalism, the Tower of Babel, the warrior Other, the noble savage, entropology, and the trickster. With current intellectual conflict as its subtext, this book posits that identity is always negotiated toward Otherness. Roberts interrogates narrative constructions of Western biases toward

non-Western Others, with each chapter addressing a Western historical moment through an exemplary narrative. This process shows that by imagining and objectifying Others, Western cultures were creating their own Selves. In confronting the ethnocentrism of past historical moments, Roberts invites us to recognize it in the present—in a new way. Alterity and Narrative asks that we afford Others the ability to transcend their own ethnocentrism, and therefore avoid well-meaning but naïve calls for cultural sensitivity.

in the study of communication narratives: Narratives and Social Change Emiliana Mangone, 2022-04-01 This book is an important contribution to narrative research and highlights how narratives can produce social change. The author demonstrates this through an analysis of concepts like future, uncertainty and risk, both in terms of individual impact and as collective forms of social life. The book reconstructs the relationships between future, uncertainty and risk through everyday how narratives exert power over individual and social life by influencing individual or collective decisions and choices. Narratives also change future prospects, thus producing social change. Some of the examples the author draws out for discussion are - in specific - the narration of the migration flows in the Mediterranean Sea, and the narration of the pandemic emergency from COVID-19. The result of different narratives has been the emergence of new ideologies and of a complex series of dynamics in which the local ends up becoming global and vice versa. Highly topical and interdisciplinary in its approach, this book is of interest to researchers and students of the sociology of culture and communication, media and communication studies, social and cultural psychology and cultural anthropology.

in the study of communication narratives: Communication in Autism Joanne Arciuli, Jon Brock, 2014-10-15 Communication in Autism adopts a multidisciplinary approach to explore one of the most common developmental disorders associated with communication impairment. Perhaps the most fascinating thing about communication in autism is that variation is as extreme as it could possibly be. While some individuals with autism have age-appropriate language, a number have exceptional language skills; others have little or no spoken language. In between these extremes are individuals who experience significant linguistic impairments. These impairments can affect peer relations and literacy skills. The chapters in this volume provide comprehensive coverage of both the theoretical underpinnings and the practical aspects of autistic communication. The result is a volume that showcases the wide range of methodologies being used in this field of research. It is invaluable for scientists, service providers, parents, individuals with autism, and students learning about communication and autism (e.g., in psychology, speech pathology, and education).

in the study of communication narratives: Landscape Narratives Matthew Potteiger, Jamie Purinton, 1998-03-20 This text covers the most popular types of landscapes designed today, from garden and park design, historic preservation and restoration, to community and regional planning.

in the study of communication narratives: How to Be an Ethnographer Monika Kostera, Paweł Krzyworzeka, 2023-06-01 Offering a practical guide on How to be an Ethnographer, this book will be a valuable resource for advanced students and early career researchers of organization studies, anthropology and sociology. It will also be a useful introduction to scholars exploring ethnography as a new research method.

in the study of communication narratives: Aid, Politics and the War of Narratives in the US-Pakistan Relations Hussain Nadim, 2022-07-22 This book analyses the aid, politics and the war of narratives between the US and Pakistan under the Kerry Lugar Berman Act (2009–2013), using the security-development nexus as a framing discourse and taking a decolonial approach to the subject. The book explores the politics of US foreign aid to Pakistan, with regard to the issues of 'sovereignty' and 'agency', to analyse the notions of aid, power and narratives in the asymmetrical US-Pakistan relations. Based on primary interviews and extensive data analysis of US foreign aid datasets, the book specifically argues that foreign aid is based under the hubris of the security-development nexus, which encourages a dialectical power struggle between the US and Pakistan, and between the civil and military actors inside Pakistan, which use the indivisibility of security and development to advance their strategic interests over each other. This book is a timely

analysis given the recent political turmoil in Pakistan that saw the ouster of Prime Minister Imran Khan who blamed the Biden Administration for orchestrating a “regime change” conspiracy against his government. Interdisciplinary and relevant to academic and policy debates, this book will be of interest to researchers in the fields of Development Studies, International Relations, Policy Studies, Area Studies and, in particular, South Asian Politics.

in the study of communication narratives: Designing Learning with Multimodality in English Medium of Education (EME) Classrooms Across Asia Fei Victor Lim, Jack Pun, 2025-06-12 This book provides evidence-based and pedagogically-focused analyses of a variety of multimodal resources to scaffold learning in contexts of English-Medium Education (EME) in Asia. The contributing authors are active researchers in the field of EME and multimodality across the primary, secondary and tertiary levels, from Hong Kong, Indonesia, Japan, Singapore, South Korea, Taiwan and Thailand. They explore both the latest theoretical conceptions on the design of EME, by harnessing the affordances of multimodality, as well as practical applications of multimodal pedagogies for the teaching and learning of specific subjects, particularly STEM subjects. They provide examples of EME lessons with annotated notes to showcase good practice.

in the study of communication narratives: The Rhetoric of Moral Protest Christian Lahusen, 2013-11-07 No detailed description available for The Rhetoric of Moral Protest.

in the study of communication narratives: The Multiverse as Theory in Postmodern Speculative Fictional Narratives Angélica Cabrera Torrecilla, Francisco Sáez de Adana, 2024-11-15 The Multiverse as Theory in Postmodern Speculative Fictional Narratives considers the concept of the multiverse beyond the immediacy of being merely an excuse or scenario for the development of stories, instead positioning the multiverse as a theoretical method in which speculative fiction narratives can explore diverse issues to bridge ideas across cultural, social, and philosophical analysis. Taking a cross-cultural approach, the book centres around the critical engagements that literary and media texts have with the representations of the multiverse, beyond considering this subject as a mere rhetorical flourish or a passing fad. A diverse and international team of authors engage with the multiverse from the point of view of “other worlds,” understanding it not as the appearance of another independent world, but as the collision of two or more different worlds into one of them. From this key finding, the multiverse encourages us to pay attention to the influence that fiction exerts on narratives and world-building, providing possible frameworks to rethink critical aspects of temporality, space, self, society, and culture in contemporary times. This pioneering work will interest students and scholars working in the areas of media and cultural studies, comparative literature, popular culture studies, speculative fiction, and transmedia studies.

in the study of communication narratives: Infrastructure Communication in International Relations Carolijn van Noort, 2020-11-09 This book demonstrates how infrastructure projects and the communications thereof are strategized by rising powers to envision progress, to enhance the actor’s international identity, and to substantiate and leverage the actor’s vision of international order. While the physical aspects of infrastructure are important, infrastructure communication in international relations demands more scholarly attention. Using a case-study approach, Carolijn van Noort examines how rising powers communicate about infrastructure internationally and discusses the significance of these communication practices. The four case studies include BRICS’s summit communications about infrastructure, Brazil’s infrastructure promises to Africa, China’s communication of the Belt and Road Initiative in East Africa, and Kazakhstan’s news media coverage of China’s Belt and Road Initiative. Van Noort highlights the fact that the link between infrastructure, identity, and order-making is arbitrary and thus contested in practice, with rising powers operationalizing infrastructure communication in international relations in varied ways. She argues that both communication organization and the visibility of strategic narratives on infrastructure influence the international communication of infrastructure vision and action plans, with different levels of success. Infrastructure Communication in International Relations is a welcome and timely book of interest to students and scholars in the fields of international relations, global communications, and the politics of infrastructure.

in the study of communication narratives: Global Advertising Practice in a Borderless World

Robert Crawford, Linda Brennan, Lukas Parker, 2017-07-14 Cultural and regional differences in creating and managing advertising require unique responses to a dynamic, rapidly globalising business environment. To be global in advertising is no longer to be homogenised or standardised, it is to be at the leading edge of social and cultural trends that are changing the world as we know it. *Global Advertising Practice in a Borderless World* covers a wide range of adaptive advertising practices, from major and emerging markets, in mainstream and digital advertising. It focuses on understanding how the globalisation of advertising works in practice, explored in three sections: globalising advertising in a media and communications context; advertising in a global world; and global advertising in a digital world. Covering past, present and potential futures, through an impressive ensemble of global advertising practitioners and academics, the book combines academic rigour with practical insights to provide a comprehensive analysis of the changing dynamics between advertising and globalisation. It will be of great interest to researchers, educators and advanced students in advertising, global branding, international marketing, international business media, communication and cultural studies.

in the study of communication narratives: *Health Communication for Social Justice*

Vinita Agarwal, 2023-10-24 This textbook combines whole person and social justice perspectives to educate students on the role of communication in promoting inclusive and person-centered healthcare practices. This book explores health inequities experienced by disadvantaged and marginalized populations and outlines the actions students can take to address these challenges. The book demonstrates how physical, mental, and emotional health is connected to equitable understandings of individual, community, and environmental health. It considers how social, interpersonal, and systemic factors such as personal relationships, language, literacy, religion, technology, and the environment affect health equity. To present strategies and invite action to support the goals of the whole person, social justice activist approach, the book provides contemporary examples, interviews with communication scholars, and case studies that examine local communities and the everyday contexts of health meaning making. This textbook serves as a core or supplemental text for graduate and upper-level undergraduate courses in health communication. Online resources include PowerPoint slides and an instructor manual containing sample syllabi, assignments, and test questions. They are available online at www.routledge.com/9781032081038.

in the study of communication narratives: *Countering Online Propaganda and Extremism*

Corneliu Bjola, James Pamment, 2018-12-07 Exploring the 'dark side' of digital diplomacy, this volume highlights some of the major problems facing democratic institutions in the West and provides concrete examples of best practice in reversing the tide of digital propaganda. Digital diplomacy is now part of the regular conduct of International Relations, but Information Warfare is characterised by the exploitation or weaponisation of media systems to undermine confidence in institutions: the resilience of open, democratic discourse is tested by techniques such as propaganda, disinformation, fake news, trolling and conspiracy theories. This book introduces a thematic framework by which to better understand the nature and scope of the threats that the weaponization of digital technologies increasingly pose to Western societies. The editors instigate interdisciplinary discussion and collaboration between scholars and practitioners on the purpose, methods and impact of strategic communication in the Digital Age and its diplomatic implications. What opportunities and challenges does strategic communication face in the digital context? What diplomatic implications need to be considered when governments employ strategies for countering disinformation and propaganda? Exploring such issues, the contributors demonstrate that responses to the weaponisation of digital technologies must be tailored to the political context that make it possible for digital propaganda to reach and influence vulnerable publics and audiences. This book will be of much interest to students of diplomacy studies, counter-radicalisation, media and communication studies, and International Relations in general.

in the study of communication narratives: *The SAGE Handbook of Process Organization*

Studies Ann Langley, Haridimos Tsoukas, 2016-12-14 The SAGE Handbook of Process Organization Studies provides a comprehensive and timely overview of the field. This volume offers a compendium of perspectives on process thinking, process organizational theory, process research methodology and empirical applications. The emphasis is on a combination of pedagogical contributions and in-depth reviews of current thinking and research in each of the selected areas, combined with the development of agendas for future research. The Handbook is divided into five sections: Part One: Process Philosophy Part Two: Process Theory Part Three: Process Methodology Part Four: Process Applications Part Five: Process Perspectives

in the study of communication narratives: Stories, Meaning, and Experience Yanna B. Popova, 2015-06-26 This is a book about the human propensity to think about and experience the world through stories. 'Why do we have stories?', 'How do stories create meaning for us?', and 'How is storytelling distinct from other forms of meaning-making?' are some of the questions that this book seeks to answer. Although these and other related problems have preoccupied linguists, philosophers, sociologists, narratologists, and cognitive scientists for centuries, in *Stories, Meaning, and Experience*, Yanna Popova takes an original interdisciplinary approach, situating the study of stories within an enactive understanding of human cognition. Enactive approaches to consciousness and cognition foreground the role of interaction in explanations of social understanding, which includes the human practices of telling and reading stories. Such an understanding of narrative makes a decisive break with both text-centred approaches that have dominated structuralist and early cognitivist views of narrative meaning, as well as pragmatic ones that view narrative understanding as a form of linguistic implicature. The intersubjective experience that each narrative both affords and necessitates, the author argues, serves to highlight the active, yet cooperative and communal, nature of human sociality, expressed in the numerous forms of human interaction, of which storytelling is one.

in the study of communication narratives: Museum Learning Jill Hohenstein, Theano Moussouri, 2017-10-16 As museums are increasingly asked to demonstrate not only their cultural, but also their educational and social significance, the means to understand how museum visitors learn becomes ever more important. And yet, learning can be conceptualised and investigated in many ways. Coming to terms with how theories about learning interact with one another and how they relate to 'evidence-based learning' can be confusing at best. *Museum Learning* attempts to make sense of multiple learning theories whilst focusing on a set of core learning topics in museums. Importantly, learning is considered not just as a cognitive characteristic, as some perspectives propose, but also as affective, taking into consideration interests, attitudes, and emotions; and as a social practice situated in cultural contexts. This book draws attention to the development of theory and its practical applications in museum situations such as aquariums, zoos, botanical gardens and historical re-enactment sites, among others. This volume will be of interest to museum studies students, practitioners and researchers working in informal learning contexts, and will help them to reflect on what it means to learn in museums and create more effective environments for learning.
