incarnate word physical therapy: Learning to Lead in Physical Therapy Jennifer Green-Wilson, Stacey Zeigler, 2024-06-01 A timely and essential book for physical therapist and physical therapist assistant students, faculty, and practitioners, as well as clinical educators, Learning to Lead in Physical Therapy provides information on identifying, developing, and demonstrating effective leadership skills for daily practice. Drs. Jennifer Green-Wilson and Stacey Zeigler explain that in a health care field that's constantly evolving, leadership skill development must be a high priority in physical therapy education and practice. Leadership skills are critical for physical therapists and physical therapist assistants throughout the course of their careers—in an informal leadership role with patients, in collaboration and advocacy for interdisciplinary care, and in formal leadership positions as they continually adapt to new expectations. With an evidence-based framework, the authors incorporate a workbook-style text with written prompts, activities, tools, quotes, and personal vignettes from practicing clinicians to explore concepts including: Discovering your individual strengths, developing your leadership style, and learning to lead through mentorship and coaching Communicating effectively, incorporating teamwork and collaboration, becoming an inclusive leader, and leading through conflict Effecting change through leadership, ethical decision-making, and serving others This book is easily incorporated within a single course or across multiple courses throughout a curriculum. Academic and clinical faculty and practitioners will also find this book easy to use for personal growth with its activity-based guidance through each chapter. Included with the text are online supplemental materials for faculty use in the classroom. Physical therapists and physical therapist assistants have the unique opportunity to be leaders at all levels—in their practices, the health care system, and their communities at large. Learning to Lead in Physical Therapy is an essential text in preparing students, faculty, and practitioners of all levels for these crucial leadership roles and responsibilities.

incarnate word physical therapy: Home Care for Older Adults Using Interprofessional Teams Danita H. Stapleton, Sekeria Bossie, 2023-10-16 This textbook fosters a deeper understanding of how home healthcare goals for older adults can be achieved through interprofessional collaboration. The contributors create a context where allied health and healthcare professionals can acquire and exchange knowledge about their diverse disciplines and practices for the betterment of the home care population. The book also reinforces what the COVID-19 pandemic made quite apparent to health institutions and providers: patients can receive adequate and acceptable care within the home setting. The pandemic also highlighted the important role that interprofessionalism can play in attaining desired patient outcomes. Statistics reveal that the population of persons over the age of 65 years is the largest that it has ever been. This volume focuses on older adult patients because caring for these individuals from an interprofessional perspective is now more important than ever. Through the ten chapters of this edited book, the contributors including home care providers offer their perspectives on interprofessional collaboration and the provision of quality home care services. They use the Interprofessional Education Collaborative's (IPEC) four core competencies as a framework for improving the collaborative practice of home health care for older adult patients with complex medical issues. Among the topics covered: Medical Social Work and Case Management Skilled Nursing Physical Therapy Occupational Therapy Behavioral Health Care Other Relevant Home Care Services: Prosthetics and Orthotics, Pharmacy Services, Durable Medical Equipment and Nutritional Services Home Care for Older Adults Using Interprofessional Teams is intended for advanced undergraduate and graduate students in health or allied health programs and can be used as a primary text for interprofessional education courses. The text benefits students, instructors, and faculty who have stakes in obtaining positive health outcomes for older adult patients. Today, more and more programs are requiring the development of interprofessional competencies. This book provides a forum where students can obtain in-depth knowledge of teaming, as well as the roles and functions of various care providers.

incarnate word physical therapy: Normative Motherhood: Andrea O'Reilly, 2023-03-23 A central aim of motherhood studies is to examine and theorize normative motherhood. Where does it come from? What are its defining features and demands? How does it work as a regulatory discourse and practice across differences of age, class, race, ability, sexuality, and region? What is the impact of normative motherhood on women's lives? What does an intersectional analysis of normative motherhood reveal? How is normative motherhood reflected and enacted in public policy, workplace practices, family arrangements and so on? How is normative motherhood represented and resisted in literature, art, photography, and film? How do or may women resist normative motherhood? This collection explores these questions of normative motherhood under three interrelated topics: Regulations, Representations, and Reclamations.

incarnate word physical therapy: *Crossing Boundaries* Patrick M. Green, Mathew Johnson, 2023-07-03 Are there better ways to address community challenges than expending funds on

international service-learning? In attempting to wed learning and service, are we exploiting the “other” for new, or recycled, aims? As these questions attest, of all types of service-learning, international service-learning (ISL) most starkly illuminates the tensions between the liberatory and oppressive potentials of practice. This book explores the ramifications of realizing a new age of service-learning that pushes beyond single episodic course-based projects to rebalance student learning and community outcome priorities, and provides insight into what it looks like in its execution. In describing eleven international programs designed to achieve reciprocal, sustained relationships in which learning is co-created, the contributors reveal their struggles to change the balance of power relationships and move to a more transformative practice. Common themes are the developmental nature of this work; the recognition that it takes multiple attempts, often over years, for an individual or an institution to get this work even nearly right; that resolving the challenges of unequal resources, power, and privilege can never be completely erased; and that attention has to be given to the micro-level details. What emerge are seven guiding principles that define the nature of partnerships in liberatory practice, and that apply to all forms of service learning. They must be: strategic--linked to the mission and expertise of the institution; long-term; multifaceted--allowing both partners to play a multiplicity of roles; developmental in building capacities; contextualized in historic and cultural understanding; fully reciprocal; and create the potential for community-driven change. In addressing the problematic nature of ISL, and of service-learning in general, this book interrogates whether its experiences create the necessary conditions for the formation of individual values, convictions, and action; and whether their pivotal teaching and learning moments are indeed replicable and transferable across individual, institutional and even cultural contexts. Its conclusions and insights will be of intense interest to administrators and practitioners alike.

incarnate word physical therapy: Biologically Inspired Cognitive Architectures 2024

Alexei V. Samsonovich, Tingting Liu, 2024-12-09 This book reports on original approaches intended to support the development of biologically inspired cognitive architectures. It bridges together different disciplines, including artificial intelligence, linguistics, neuro- and social sciences, psychology and philosophy of mind, among others. The chapters are based on contributions presented at the 2024 Annual International Conference on Brain-Inspired Cognitive Architectures for Artificial Intelligence (the 15th Annual Meeting of the BICA Society, BICA*AI 2024), organized in collaboration with the 17th Conference on Artificial General Intelligence (AGI 2024) and held on August 13-16, 2024, in Seattle, WA, USA. They cover emerging methods, theories and ideas towards the realization of general-purpose humanlike artificial intelligence or fostering a better understanding of the ways the human mind works. All in all, this book provides engineers, mathematicians, psychologists, computer scientists and other experts with a timely snapshot of recent research and a source of inspiration for future developments in the broadly intended areas of artificial intelligence and biological inspiration.

incarnate word physical therapy: Musculoskeletal Injuries in the Military Kenneth L.

Cameron, Brett D. Owens, 2015-09-09 This authoritative reference examines the causes of--and offers workable solutions to--the widespread problem of musculoskeletal injuries among armed forces personnel. Specific chapters on combat, non-combat, training, and fitness injuries shed necessary light on the nature and scope of the epidemic, including impact on active service members and the resulting quality of life issues in veterans. An overview of these injuries by anatomic region highlights treatment, disability, and prevention issues in military settings. The book also translates the standard public health model for preventing injuries into military context, giving professionals guidelines for developing strategies tailored to the unique strengths and risks of this population. Featured in the coverage: · The burden of musculoskeletal injuries in the military. · Traumatic combat injuries. · Deployment and non-battle injuries. · Epidemiology of musculoskeletal injuries by anatomic region. · Application of the public health model for injury prevention. · Barriers to injury prevention in the military. Its depth of detail makes *Musculoskeletal Injuries in the Military* critical reading for orthopedic surgeons, physical therapists, athletic trainers, military leaders, military and VA healthcare staff including physicians and policymakers, public health and injury prevention

professionals, occupational health and safety professionals, musculoskeletal injury and disease researchers, and veterans' health advocacy groups.

incarnate word physical therapy: Assessment in Education Shelleyann Scott, Donald E. Scott, Charles F. Webber, 2015-10-20 This book provides key insights into how educational leaders can successfully navigate the turbulence of political debate surrounding leading student assessment and professionalised practice. Given the highly politicised nature of assessment, it addresses leaders and aspiring leaders who are open to being challenged, willing to explore controversy, and capable of engaging in informed critical discourse. The book presents the macro concepts that these audiences must have to guide optimal assessment policy and practice. Collectively, the chapters highlight important assessment purposes and models, including intended and unintended effects of assessment in a globalised context. The book provides opportunities to explore cultural similarities and particularities. It invites readers to challenge taken-for-granted assumptions about ourselves and colleagues in other settings. The chapters highlight the cultural clashes that may occur when cross-cultural borrowing of assessment strategies, policies, and tools takes place. However, authors also encourage sophisticated critical analyses of potential lessons that may be drawn from other contexts and systems. Readers will encounter challenges from authors to deconstruct their assessment values, beliefs, and preconceptions. Indeed, one purpose of the book is to destabilise certainties about assessment that prevail and to embrace the assessment possibilities that can emerge from cognitive dissonance.

incarnate word physical therapy: The Inspiring Life of Texan Héctor P. García Cecilia García Akers, 2016-04-04 As a Mexican immigrant, Dr. Hector P. Garcia endured discrimination at every stage of his life. He attended segregated schools and was the only Mexican to graduate from the University of Texas Medical Branch, Galveston, in 1940.
