indeed social media assessment: Social Media and Politics Glenn W. Richardson Jr., 2016-11-21 This two-volume set explores the various ways social media are profoundly changing politics in America. The last decade has seen dramatic changes in the U.S. political process. The advent of social media and other new forms of expression have enabled an unprecedented number of citizens to enter the political arena by expressing their opinions about issues and candidates in ways that can influence untold numbers of voters and officials. But the vast majority of politicians have not fully grasped how social media has fundamentally changed the process of communication or adjusted to the dramatic shift in political power that is taking place. Written by experts on the intersections of politics, public opinion, and popular culture, this book examines how new media have brought political power to the people like never before, provided new channels through which politicians communicate and attempt to influence public opinion, and caused a game-changing shift in political power. Volume one focuses on how savvy politicians are learning to communicate in new ways via new media in order to enhance their political appeal. The second volume examines the various ways in which individuals or groups who use new/social media are affecting voters' decisions, applying pressure to elected or appointed officials, and influencing the direction of the country.

indeed social media assessment: E-Learning and Social Media Elinor L. Brown, Anna Krasteva, Maria Ranieri, 2016-05-01 International Advances in Education: Global Initiatives for Equity and Social Justice is an international research monograph series of scholarly works that focuses primarily on empowering children, adolescents, and young adults from diverse educational, socio-cultural, linguistic, religious, racial, ethnic, and socio-economic settings to become non-exploited/non-exploitive contributing members of the global community. The series draws on the international community of investigators, academics, and community organizers that have contributed to the evidence base for developing sound educational policies, practices, and innovative programs to optimize the potential of all students. Each themed volume includes multi-disciplinary theory, research, and practice that provides an enriched understanding of the drivers of human potential via education to assist readers in exploring, adapting, and replicating innovative strategies that enable ALL students to realize their full potential. Among these strategies are the integration of digital technologies (DT) and information and communication technologies (ICT) into contemporary education platforms. However, technology must be more than just a tool to deliver content and stimulate engagement; it must become a means to broaden access to learning, advance equity, promote social justice, and encourage social inclusion. Especially reaching out to address the academic and social needs of rural, impoverished, marginalized, and displaced populations. Though the digital divide continues to hinder educational attainment for underprivileged populations, ICTs are providing significant opportunities to deliver literacy and basic skills instruction to disadvantaged segments of the global population as well as engage, motivate, and customize learning to address local needs. Nonetheless, the availability of ICT is not a deterministic process. Other societal, cultural, political and contextual factors are of fundamental importance to acceptance and integration that enables people to benefit from technology. The relationship between educational access, instructional delivery, and ICT should be considered in more complex terms. In particular, digital technologies should be viewed as instructional tools that improve access to educational opportunities, strengthen cultural resources, promote social and economic equity, and provide students with the knowledge and competencies to prepare them for a future that cannot be predicted. Therefore, developing ICT and media capabilities that instill citizenship and stewardship in today's students is crucial to gleaning the social and cultural advantages of a contemporary global society that encourages full and equal citizenship. Citizenship education refers to two understandings of citizenship: as belonging and as engagement. The first is focused on national identity and valorizes the values of justice and democracy, as well as language and culture as the roots bridging the personality of children to the community of solidarity and shared norms. The second understanding of citizenship complements the 'roots' with 'roads', with the choices made by the individual, with the capacity to form and develop the child's personality into the actor and author of his/her educational, professional, and life projects. The adolescent prepares to become an active, committed, and engaged citizen with the intellectual capacity for critical thinking that leads to

responsible actions. Digital citizenship expresses the transformations of both belonging to and engaging in the information society and contributes to the development of generation “Y” with the aspiration to innovate and experiment, to explore the possibilities of the new digital world, to question authorities and instances of knowledge and power. Education addresses digital citizenship by opening more avenues for the intersection of Internet, imagination, and exploration. Volume 10, *E-learning & Social Media: Education and Citizenship for the Digital 21st Century*, addresses the use of technology in: developing and expanding educational delivery systems to reach rural populations, providing access to equitable education opportunities for disadvantaged and marginalized populations, and encouraging student civic engagement. The volume evaluates e-learning programs (distributed through the Internet, via satellite and hosted on social media) that promote equitable education for disadvantaged populations; examines the challenges and benefits of social media on student self-identity, collaboration, and academic engagement; shares promising practices associated with technology in education and e-citizenship in the 21st century, and advances the discussion on blending global citizenship education and social media that raises student awareness, accountability and social justice involvement.

indeed social media assessment: Film Criticism in the Digital Age Mattias Frey, Cecilia Sayad, 2015-04-20 Over the past decade, as digital media has expanded and print outlets have declined, pundits have bemoaned a “crisis of criticism” and mourned the “death of the critic.” Now that well-paying jobs in film criticism have largely evaporated, while blogs, message boards, and social media have given new meaning to the saying that “everyone’s a critic,” urgent questions have emerged about the status and purpose of film criticism in the twenty-first century. In *Film Criticism in the Digital Age*, ten scholars from across the globe come together to consider whether we are witnessing the extinction of serious film criticism or seeing the start of its rebirth in a new form. Drawing from a wide variety of case studies and methodological perspectives, the book’s contributors find many signs of the film critic’s declining clout, but they also locate surprising examples of how critics—whether moonlighting bloggers or salaried writers—have been able to intervene in current popular discourse about arts and culture. In addition to collecting a plethora of scholarly perspectives, *Film Criticism in the Digital Age* includes statements from key bloggers and print critics, like Armond White and Nick James. Neither an uncritical celebration of digital culture nor a jeremiad against it, this anthology offers a comprehensive look at the challenges and possibilities that the Internet brings to the evaluation, promotion, and explanation of artistic works.

indeed social media assessment: *Global Tangos* Melissa A. Fitch, 2015-02-25 *Global Tangos: Travels in the Transnational Imaginary* argues against the hackneyed rose-in-mouth clichés of Argentine tango, demonstrating how the dance may be used as a way to understand transformations around the world that have taken place as a result of two defining features of globalization: transnationalism and the rise of social media. *Global Tangos* demonstrates the cultural impact of Argentine tango in the world by assembling an unusual array of cultural narratives created in almost thirty countries, all of which show how tango has mixed and mingled in the global imaginary, sometimes in wildly unexpected forms. Topics include Tango Barbie and Ken, advertising for phone sex, the presence of tango in political upheavals in the Middle East and in animated Japanese children's television programming, gay tango porn, tango orchestras and composers in World War II concentration camps, global tango protests aimed at reclaiming public space, the transformation of Buenos Aires as a result of tango tourism, and the use of tango for palliative care and to treat other ailments. They also include the global development of queer tango theory, activism, and festivals. *Global Tangos* shows how the rise in social media has heralded a new era of political activism, artistry, solidarity, and engagement in the world, one in which virtual global tango communities have indeed become very "real" social and support networks. The text engages some key concepts from contemporary critics in the fields of tourism studies, geography, dance studies, cultural anthropology, literary studies, transnational studies, television studies, feminism, and queer theory. *Global Tangos* underscores the interconnectedness of cultural identity, economics, politics, and power in the production, marketing, distribution, and circulation of global images related to tango—and, by extension, Latin America—that travel the world.

indeed social media assessment: Digital Media, Youth, and Credibility Miriam J. Metzger, Andrew J. Flanagin, 2008 The difficulties in determining the quality of information on the Internet--in particular, the implications of wide access and questionable credibility for youth and learning. Today we have access to an almost inconceivably vast amount of information, from sources that are increasingly portable, accessible, and interactive. The Internet and the explosion of digital media content have made more information available from more sources to more people than at any

other time in human history. This brings an infinite number of opportunities for learning, social connection, and entertainment. But at the same time, the origin of information, its quality, and its veracity are often difficult to assess. This volume addresses the issue of credibility--the objective and subjective components that make information believable--in the contemporary media environment. The contributors look particularly at youth audiences and experiences, considering the implications of wide access and the questionable credibility of information for youth and learning. They discuss such topics as the credibility of health information online, how to teach credibility assessment, and public policy solutions. Much research has been done on credibility and new media, but little of it focuses on users younger than college students. *Digital Media, Youth, and Credibility* fills this gap in the literature. indeed social media assessment: Assessment Strategies for Online Learning Dianne Conrad, Jason Openo, 2018-07-15 Assessment has provided educational institutions with information about student learning outcomes and the quality of education for many decades. But has it informed practice and been fully incorporated into the learning cycle? Conrad and Openo argue that the potential inherent in many of the new learning environments being explored by educators and students has not been fully realized. In this investigation of a variety of assessment methods and learning approaches, the authors aim to discover the tools that engage learners and authentically evaluate education. They insist that moving to new learning environments, specifically those online and at a distance, afford opportunities for educators to adopt only the best practices of traditional face-to-face assessment while exploring evaluation tools made available by a digital learning environment in the hopes of arriving at methods that capture the widest set of learner skills and attributes.

This book is a collection of essays exploring the place, period and legacy of *Dogs in Space*, by people who were

indeed social media assessment: Enforcement of Human Rights in Ethiopia Yohannes Eneyew Ayalew , Wondemagegen Tadesse Goshu, 2023-05-25 Enforcement has not been the most practiced business in the field of human rights in Ethiopia. The absence of effective enforcement can be attributed to various factors, including the absence of a normative framework, insufficient political commitment, inadequate institutional capacity and resources, and limited awareness. Despite recent legal reform initiatives purportedly driven by human rights demands, it remains uncertain whether enforcement has undergone any significant changes. Effective enforcement of human rights necessitates the existence of robust multi-layered institutions at the national, sub-regional, regional, and international levels. However, in Ethiopia, concerns have been raised about the capability of numerous normative instruments and mechanisms of human rights. This volume comprises a collection of papers presented at a hybrid conference held at the Hilton Hotel Addis in April 2022. The conference, organized by the School of Law of Addis Ababa University in collaboration with Friedrich Ebert-Stiftung, Ethiopia, centered around the theme Enforcement of Human Rights in Ethiopia: Old and New Challenges. Its primary objective was to identify and analyze both old and new challenges in human rights enforcement in Ethiopia and propose strategies to overcome them. The editors of this volume intend for it to address scholarly gaps in the implementation and enforcement of human rights in Ethiopia. Among the notable findings from the chapters included in this volume is a significant disparity between recently reformed laws passed by the parliament and their execution by the executive body. This disconnect demonstrates a failure to prioritize and enforce human rights in the country. As such, the volume suggests that the Ethiopian government must take the business of human rights enforcement seriously.
