math in focus grade 8: The TurnAround ToolKit Lynn Winters, Joan Herman, 2011 Lynn Winters's and Joan Herman's The Turnaround Toolkit is written for school leaders who are focused on transforming instruction, and who may be working under significant time constraints to reverse declining student achievement or public perceptions of school failure. Based on the evidence that simply implementing "continuous improvement" is not enough to close the achievement gap, The Turnaround Toolkit provides a nine-step formative evaluation program designed to achieve an immediate and consistent focus on improving instruction in order to bolster student achievement. In a straightforward and accessible fashion, Herman and Winters explain three overarching "Turnaround Tasks" that frame these steps and the necessary-and sometimes drastic-actions that must be taken by school leaders as they use data to strategically choose, implement, monitor, and revise school interventions. A dedicated, online "toolkit" offers numerous worksheets and templates that support each stage of the process and help school leaders scaffold the work of educators to put an aggressive turnaround plan into action while a leadership guide at the end of the book provides guidance to turnaround teams and facilitators.

math in focus grade 8: *State Education Indicators with a Focus on Title I*, 1999 Rolf K. Blank, Jennifer Gifford Manise, Barbara C. Brathwaite, Council of Chief State School Officers, 2000 This

report provides important state-by-state information on the characteristics and performance of schools and students in each state, information that is vital to monitoring the progress and evaluating the success of local, state, and national education reforms. The report disaggregates student achievement data so that attention can be focused not only on the average student, but on students in high poverty schools, migrant students, and students with limited English proficiency. Indicators in each state profile are organized into these categories: (1) school and teacher demographics; (2) student demographics; (3) statewide accountability information; and (4) student achievement. Information is also provided for Title I programs in each state. Statewide totals for numbers of students in public elementary and secondary schools are reported for 2 years, the most recent year for which data are available and the baseline year closest to 1990 for which there are data. Indicators are reported for each state, the District of Columbia, and the entire United States. Appendixes contain state proficiency level definitions, state rankings for various indicators, and information on the National Assessment of Educational Progress. (SLD)
