medicine wheel sedona az: Ripples of the Universe Susannah Crockford, 2021-06-03 Ask a random American what springs to mind about Sedona, Arizona, and they will almost certainly mention New Age spirituality. Nestled among stunning sandstone formations, Sedona has built an identity completely intertwined with that of the permanent residents and throngs of visitors who insist it is home to powerful vortexes—sites of spiraling energy where meditation, clairvoyance, and channeling are enhanced. It is in this uniquely American town that Susannah Crockford took up residence for two years to make sense of spirituality, religion, race, and class. Many people move to Sedona because, they claim, they are called there by its special energy. But they are also often escaping job loss, family breakdown, or foreclosure. Spirituality, Crockford shows, offers a way for people to distance themselves from and critique current political and economic norms in America. Yet they still find themselves monetizing their spiritual practice as a way to both “raise their vibration” and meet their basic needs. Through an analysis of spirituality in Sedona, Crockford gives shape to the failures and frustrations of middle- and working-class people living in contemporary America, describing how spirituality infuses their everyday lives. Exploring millenarianism, conversion, nature, food, and conspiracy theories, *Ripples of the Universe* combines captivating vignettes with astute analysis to produce a unique take on the myriad ways class and spirituality are linked in contemporary America.

medicine wheel sedona az: Claiming Sacred Ground Adrian J. Ivakhiv, 2001-07-26 Claiming Sacred Ground Pilgrims and Politics at Glastonbury and Sedona Adrian J. Ivakhiv A study of people and politics at two New Age spiritual sites. In this richly textured account, Adrian Ivakhiv focuses on the activities of pilgrim-migrants to Glastonbury, England and Sedona, Arizona. He discusses their efforts to encounter and experience the spirit or energy of the land and to mark out its significance by investing it with sacred meanings. Their endeavors are presented against a broad canvas of cultural and environmental struggles associated with the incorporation of such geographically marginal places into an expanding global cultural economy. Ivakhiv sees these contested and heterotopic landscapes as the nexus of a complex web of interest and longings: from millennial anxieties and nostalgic re-imaginings of history and prehistory; to real-estate power grabs; contending religious visions; and the free play of ideas from science, pseudo-science, and popular culture. Looming over all this is the nonhuman life of these landscapes, anotherness that alternately reveals and conceals itself behind a pageant of beliefs, images, and place-myths. A significant contribution to scholarship on alternative spirituality, sacred space, and the politics of natural landscapes, Claiming Sacred Ground will interest scholars and students of environmental and cultural studies, and the sociology of religious movements and pilgrimage. Non-specialist readers

will be stimulated by the cultural, ecological, and spiritual dimensions of extraordinary natural landscapes.
