medicine the 1975 lyrics: Perplexing Remedies in Ancient Medicine Maddalena Rumor, 2024-11-18 The topic of a potential relationship between Babylonian and Greco-Roman medicine has been discussed for a long time, yet it is notoriously difficult to give it flesh and bones by means of concrete examples. The main goal of this study is to identify real elements in the therapeutical traditions of the one system that can be connected to those of the other, which would confirm a certain degree of practical knowledge-sharing between the two cultures. By analyzing Drekapotheke (filthy medicaments) and similarly perplexing medical ingredients, and by exploiting the concept of misunderstandings in translation, I show how elements of Assyro-Babylonian therapy were still present or emerging in the pharmaceutical compositions of the Early Roman Empire, ultimately supporting the idea of at least occasional transfers of medical knowledge between the two cultures. With its positive findings, this study contributes to a broader reconstruction of the context within which ancient medicine developed. It also finds reciprocal explanations of obscure passages and fuels further questions regarding the medical interrelations/interconnections between these neighboring ancient cultures.

medicine the 1975 lyrics: Green Medicine Larry Malerba, D.O., 2011-03-15 According to Dr. Larry Malerba, modern medicine has perfected the short-term technical repair of the physical body at the expense of the long-term psychological and spiritual well-being of the whole person. In Green Medicine he examines this issue and provides a realistic blueprint for wellness and a valuable guide for those seeking deeper and more lasting healing. Written in an accessible style, the book draws on a rich range of fields—physics, philosophy, Jungian thought, shamanism, alchemy, Eastern thought,

Western esotericism, sustainability, orthodox medicine—to create a green medical paradigm that represents a powerful integrative medical perspective. Dr. Malerba interweaves case histories from his own practice with innovative concepts from alternative and Western medicine in order to address a number of crucial questions: • What are the personal and environmental costs to the overuse of pharmaceutical drugs? • Is conventional medicine as scientific as it claims to be? • How can conventional doctors and alternative healers begin to work together? • How can individuals transform medicine and become participants in their own healthcare? Green Medicine offers a practical and philosophical basis for building a viable green alternative that draws on the inherent unity of body, heart, mind, soul, and nature.

medicine the 1975 lyrics: Religion, Devotion and Medicine in North India Fabrizio M. Ferrari, 2014-11-20 This volume examines notions of health and illness in North Indian devotional culture, with particular attention paid to the worship of the goddess Sitala, the Cold Lady. Consistently portrayed in colonial and postcolonial literature as the ambiguous 'smallpox goddess', Sitala is here discussed as a protector of children and women, a portrayal that emerges from textual sources as well as material culture. The eradication of smallpox did not pose a threat to Sitala and her worship. She continues to be an extremely popular goddess. Religion, Devotion and Medicine in North India critically examines the rise and affirmation of the 'smallpox myth' in India and beyond, and explains how Indian narratives, ritual texts and devotional songs have celebrated Sitala as a loving mother who protects her children from the effects, and the fear, of poxes, fevers and infantile disorders but also all sorts of new threats (such as global pandemics, addictions and environmental catastrophes). The book explores a wide range of ritual and devotional practices, including scheduled festivals, songs, vows, pageants, austerities, possession, animal sacrifices and various forms of offering. Built on extensive fieldwork and a close textual analysis of sources in Sanskrit and vernacular languages (Hindi, Bhojpuri and Bengali) as well as on a rich bibliography on the struggle against smallpox in colonial and post-colonial India, the book reflects on the ambiguous nature of Sitala as a phenomenon largely dependent on the enduring fascination with the exotic, and the horrific, that has pervaded public renditions of Indian culture in indigenous fiction, colonial reports, medical literature and now global culture. To aid study, the volume includes images, web links, appendixes and a filmography.

medicine the 1975 lyrics: Social Aspects of Health, Medicine and Disease in the Colonial and Post-colonial Era Henk Menke, Jane Buckingham, Farzana Gounder, Ashutosh Kumar, Maurits S. Hassankhan, 2020-12-02 From the 1600s, enslaved people, and after abolition of slavery, indentured labourers were transported to work on plantations in distant European colonies. Inhuman conditions and new pathogens often resulted in disease and death. Central to this book is the encounter between introduced and local understanding of disease and the therapeutic responses in the Caribbean, Indian and Pacific contexts. European response to diseases, focussed on protecting the white minority. Enslaved labourers from Africa and indentured labourers from India, China and Java provided interpretations and answers to health challenges based on their own cultures and medicinal understanding of the plants they had brought with them or which they found in the natural habitat of their new homes. Colonizers, enslaved and indentured labourers learned from each other and from the indigenous peoples who were marginalized by the expansion of plantations. This volume explores the medical, cultural and personal implications of these encounters, with the broad concept of medical pluralism linking the diversity of regional and cultural focus offered in each chapter. Please note: Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

medicine the 1975 lyrics: Socializing Medicine Pao-chen Tang, Yuqian Yan, Ling Zhang , 2025-01-07 In Socializing Medicine, Pao-chen Tang, Yuqian Yan, and Ling Zhang explore the intersections of medicine, health, and East Asian media. Interweaving archival research, audiovisual analyses, and theoretical insights from the emerging field of health humanities, the book reveals the multifaceted ways in which the mass media—from photography and film to television and live streaming—has been deployed as a tool for controlling medicine and health, privileging those with

power and authority from the early twentieth century to the present. Adopting anti-colonial and anti-capitalist perspectives, the contributors in this volume challenge the dominant mediations of health against the backdrop of imperialism, Cold War geopolitical tensions, and neoliberal capitalism. Collectively, they advocate for alternative understandings of medical culture through media productions that envision accessible and equitable healthcare practices. "This groundbreaking anthology diverges from Eurocentric models to span the celluloid past and digital present and investigate how East Asia offers not only illuminating examples of media shaping the socially based construction of health and medicine, but also some fascinating alternatives to state-centered efforts to bind the body to the nation." —Aaron Gerow, Yale University "Expanding the boundaries of health humanities and media studies simultaneously, *Socializing Medicine* presents an enthralling picture of the ideological significance of medical media in East Asia. Its transnational and intermedial approach wisely recognizes that media, like viruses, rarely remain stable entities or respect national borders. An essential addition to the growing literature on the relationship between media, medicine, and power." —Scott Curtis, Northwestern University

medicine the 1975 lyrics: Traditional Medicine in the Irish Literary Revival Holly May Walker-Dunseith, 2025-03-21 This book explores representations of traditional medicine and healing practices in Irish Revival-era literature spanning from the late nineteenth century to the early twentieth century. Specifically, the book focuses on the work of William Butler Yeats, Lady Augusta Gregory, and John Millington Synge. The author examines folk medical practices and analyses how folk medicine appears in literature, bringing to light fresh contexts and materials including diaries, letters, folklore collections, and medical texts. By writing the first book to explore the place of traditional medicine in Irish literature, Walker-Dunseith sheds light on a distinctive area of Irish life and practice that gestures towards the possibility of a culture and nation in the act of healing itself and questioning nationalistic discourses.

medicine the 1975 lyrics: Narrating Medicine in Middle English Poetry Eve Salisbury, 2022-08-11 Exploring medical writing in England in the 100+ years after the advent of the "Great Mortality", this book examines the storytelling practices of poets, patients, and physicians in the midst of a medieval public health crisis and demonstrates how literary narratives enable us to see a kinship between poetry and the healing arts. Looking at how we can learn to diagnose a text as if we were diagnosing a body, Salisbury provides new insights into how we can recuperate the voices of those afflicted by illness in medieval texts when we have no direct testimony. She considers how we interpret stories told by patients in narratives mediated by others, ways that women factor into the shaping of a medical canon, how medical writing intersects with religious belief and memorial practices governed by the Church, and ways that regimens of health benefit a population in the throes of an epidemic.

medicine the 1975 lyrics: Hippocrates' Woman Helen King, 2002-01-04 Hippocrates' Woman demonstrates the role of Hippocratic ideas about the female body in the subsequent history of western gynaecology. It examines these ideas not only in the social and cultural context in which they were first produced, but also the ways in which writers up to the Victorian period have appealed to the material in support of their own theories. Among the conflicting tangle of images of women given in the Hippocratic corpus existed one tradition of the female body which says it is radically unlike the male body, behaving in different ways and requiring a different set of therapies. This book sets this model within the context of Greek mythology, especially the myth of Pandora and her difference from men, to explore the image of the body as something to be read. Hippocrates' Woman presents an arresting study of the origins of gynaecology, an exploration of how the interior workings of the female body were understood and the influence of Hippocrates' theories on the gynaecology of subsequent ages.
