

poltava national technical university

poltava national technical university is a prominent higher education institution in Ukraine, recognized for its strong emphasis on engineering, technology, and applied sciences. Established with a mission to provide quality education and foster innovation, the university has become a key player in technical education and research within the region. It offers a wide range of undergraduate, graduate, and doctoral programs tailored to meet the evolving demands of industry and academia. With a dedicated faculty, modern facilities, and extensive research initiatives, Poltava National Technical University supports the development of skilled professionals prepared to address global challenges. This article explores the university's history, academic programs, research contributions, campus facilities, and international collaborations. Below is an outline of the key topics covered.

- History and Background
- Academic Programs and Faculties
- Research and Innovation
- Campus Facilities and Student Life
- International Cooperation and Opportunities

History and Background

Poltava National Technical University has a rich history that dates back several decades, reflecting its evolution from a technical institute to a full-fledged national university. Founded in response to the industrial and technological needs of Ukraine, the university has continuously expanded its academic offerings and infrastructure. Over the years, it has adapted to changing educational standards and integrated modern technologies to enhance learning outcomes. The university's commitment to excellence earned it national recognition and a status upgrade, highlighting its importance in the Ukrainian higher education landscape.

Founding and Development

The university was originally established in the mid-20th century as a specialized technical institute, focusing primarily on mechanical engineering and industrial technologies. Throughout its development, Poltava National Technical University expanded its academic portfolio to include diverse disciplines such as computer science, electrical engineering, civil engineering, and environmental technologies. Its growth was marked by strategic partnerships with industrial enterprises and government bodies, facilitating practical training and research.

Accreditation and National Status

In recognition of its academic quality and research output, the institution achieved accreditation from the Ministry of Education and Science of Ukraine. The designation as a “National Technical University” signifies its leading role in the country’s educational system and its contribution to national development. This status also enables greater access to funding and international collaboration opportunities.

Academic Programs and Faculties

Poltava National Technical University offers a comprehensive range of programs at various levels, including bachelor's, master's, and doctoral degrees. These programs are designed to equip students with theoretical knowledge and practical skills applicable across various engineering and technical fields. The curriculum is regularly updated to incorporate modern industry trends and technological advancements.

Undergraduate Programs

The undergraduate courses at Poltava National Technical University cover fundamental and applied sciences with a focus on engineering disciplines. Popular fields include mechanical engineering, electrical engineering, automation, computer engineering, and civil construction. Students benefit from a balanced combination of lectures, laboratory work, and internships that prepare them for the workforce.

Graduate and Doctoral Studies

Graduate programs offer advanced specialization and research opportunities in areas such as information technology, renewable energy, robotics, and materials science. Doctoral candidates engage in original research projects under the guidance of experienced faculty members, contributing to scientific advancement and innovation.

Faculties and Departments

- Faculty of Mechanical Engineering
- Faculty of Electrical Engineering and Automation
- Faculty of Computer Science and Information Technologies
- Faculty of Civil Engineering and Architecture
- Faculty of Environmental Engineering
- Faculty of Economics and Management

Each faculty hosts specialized departments that focus on specific technical and scientific disciplines, fostering a multidisciplinary approach to education and research.

Research and Innovation

Research is a cornerstone of Poltava National Technical University's mission, driving technological progress and addressing societal challenges. The university maintains numerous research centers and laboratories equipped with state-of-the-art technology. Faculty and students collaborate on projects spanning various sectors including energy efficiency, industrial automation, environmental protection, and information systems.

Key Research Areas

The university prioritizes research in areas that align with national economic goals and global technological trends. These include:

- Renewable energy technologies and sustainable development
- Advanced materials and nanotechnology
- Automation and robotics
- Information and communication technologies
- Environmental engineering and pollution control

Research Funding and Partnerships

Poltava National Technical University secures funding from governmental grants, private industry partnerships, and international research programs. Collaborations with leading companies and research institutions enhance the practical impact of its innovations and facilitate technology transfer. The university also supports entrepreneurship and the commercialization of research outcomes through incubators and startup initiatives.

Campus Facilities and Student Life

The university campus is equipped with modern classrooms, laboratories, libraries, and recreational areas that support a productive academic environment. Facilities are designed to accommodate the needs of a growing student population and foster a sense of community and engagement.

Learning and Laboratory Facilities

Poltava National Technical University provides access to advanced laboratories tailored to various engineering disciplines. These facilities enable hands-on experience with cutting-edge equipment and software tools, essential for practical training. The university's libraries offer extensive collections of technical literature, digital resources, and study spaces conducive to research and learning.

Student Services and Extracurricular Activities

Beyond academics, the university offers a range of student services including career counseling, academic advising, and health services. Numerous clubs, sports teams, and cultural organizations allow students to pursue interests and develop soft skills. Annual events and competitions encourage student participation and foster a vibrant campus culture.

International Cooperation and Opportunities

Poltava National Technical University actively engages in international collaborations to enhance educational quality and global exposure for its students and faculty. These partnerships facilitate academic exchanges, joint research projects, and participation in international conferences and workshops.

Academic Exchange Programs

The university participates in exchange programs with universities across Europe, Asia, and North America. These programs provide students with opportunities to study abroad, gain international experience, and build cross-cultural competencies essential for modern technical careers.

Joint Research and Collaborative Projects

International cooperation extends to research initiatives that address global challenges such as climate change, sustainable energy, and digital transformation. Joint projects with foreign institutions enable resource sharing, knowledge transfer, and innovative outcomes that benefit all partners involved.

Language and Cultural Support

To support international students and visiting scholars, Poltava National Technical University offers language courses, orientation programs, and cultural activities. These services help create an inclusive environment and promote intercultural understanding on campus.

Frequently Asked Questions

What programs are offered at Poltava National Technical University?

Poltava National Technical University offers a wide range of programs including engineering, computer science, economics, management, and environmental sciences at undergraduate, graduate, and doctoral levels.

Where is Poltava National Technical University located?

Poltava National Technical University is located in Poltava, Ukraine.

Is Poltava National Technical University recognized internationally?

Yes, Poltava National Technical University is recognized internationally and collaborates with various foreign universities for research and exchange programs.

What facilities are available for students at Poltava National Technical University?

The university provides modern laboratories, a well-equipped library, computer centers, sports facilities, and student dormitories to support its students.

How can international students apply to Poltava National Technical University?

International students can apply online through the university's official website by submitting required documents, including academic transcripts, passport copies, and language proficiency certificates.

Does Poltava National Technical University offer scholarships?

Yes, the university offers various scholarships based on academic merit and financial need for both domestic and international students.

What research opportunities are available at Poltava National Technical University?

Poltava National Technical University engages in research across multiple fields such as engineering, information technology, and environmental science, offering students opportunities to participate in innovative projects and collaborations.

Additional Resources

1. *History and Development of Poltava National Technical University*

This book explores the rich history of Poltava National Technical University from its founding to its current status as a leading technical institution in Ukraine. It covers key milestones, influential figures, and the evolution of academic programs. Readers gain insight into how the university has adapted to changing educational and technological landscapes over the decades.

2. *Engineering Innovations at Poltava National Technical University*

Highlighting the groundbreaking research and engineering projects undertaken at the university, this book showcases the contributions of faculty and students to various fields such as mechanical engineering, electronics, and materials science. It includes case studies and interviews with leading researchers, illustrating the university's role in advancing technology.

3. *Student Life and Campus Culture at Poltava National Technical University*

This volume provides an inside look into the daily experiences of students at Poltava National Technical University. It covers academic challenges, extracurricular activities, cultural events, and community engagement. The book aims to give prospective students a sense of the vibrant campus atmosphere and support systems available.

4. *Poltava National Technical University: A Guide for International Students*

Designed for prospective international applicants, this guide offers comprehensive information about admission procedures, academic programs, language requirements, and campus facilities. It also includes tips on living in Poltava, cultural adaptation, and support services tailored for foreign students to ensure a smooth transition.

5. *Advancements in Electrical Engineering at Poltava National Technical University*

Focusing on the electrical engineering department, this book details recent advancements in areas such as power systems, automation, and telecommunications. It features research papers, project summaries, and collaborative efforts with industry partners, highlighting the university's impact on the field.

6. *Poltava National Technical University Alumni: Success Stories*

This inspirational collection profiles notable alumni who have made significant contributions in academia, industry, and public service. Through interviews and biographical sketches, readers learn how the university's education shaped their careers and the broader impact they have had locally and globally.

7. *Environmental Engineering and Sustainability Initiatives at Poltava National Technical University*

The book examines the university's commitment to environmental sustainability through its curriculum, research, and campus practices. It covers projects related to water treatment, renewable energy, and waste management, demonstrating how the institution integrates ecological responsibility into technical education.

8. *Poltava National Technical University: Architectural Heritage and Campus Design*

This publication delves into the architectural evolution of the university's campus, highlighting significant buildings, design philosophies, and the integration of modern facilities with historical structures. It provides a visual and narrative tour, emphasizing

how the physical environment supports academic excellence.

9. *Research Methodologies and Academic Writing at Poltava National Technical University*
A practical guide for students and faculty, this book outlines effective research techniques, data analysis methods, and academic writing standards practiced at the university. It aims to enhance scholarly productivity and ensure high-quality publications in technical disciplines.

poltava national technical university: *Cyber Security and Safety of Nuclear Power Plant Instrumentation and Control Systems* Yastrebenetsky, Michael A., Kharchenko, Vyacheslav S., 2020-05-22 Safety and security are crucial to the operations of nuclear power plants, but cyber threats to these facilities are increasing significantly. Instrumentation and control systems, which play a vital role in the prevention of these incidents, have seen major design modifications with the implementation of digital technologies. Advanced computing systems are assisting in the protection and safety of nuclear power plants; however, significant research on these computational methods is deficient. *Cyber Security and Safety of Nuclear Power Plant Instrumentation and Control Systems* is a pivotal reference source that provides vital research on the digital developments of instrumentation and control systems for assuring the safety and security of nuclear power plants. While highlighting topics such as accident monitoring systems, classification measures, and UAV fleets, this publication explores individual cases of security breaches as well as future methods of practice. This book is ideally designed for engineers, industry specialists, researchers, policymakers, scientists, academicians, practitioners, and students involved in the development and operation of instrumentation and control systems for nuclear power plants, chemical and petrochemical industries, transport, and medical equipment.

poltava national technical university: *Mathematical Modeling and Simulation of Systems* Alexander Palagin, Anatoliy Anisimov, Anatoliy Morozov, Serhiy Shkarlet, 2019-07-17 This book presents current investigations in the field of mathematical modeling and simulation to support the development of intelligent information systems in domains such as ecology and geology, manufacturing, project management, and safety of distributed information systems. The book will be of interest to developers of modern high-tech software complexes for situational control centers, based on mathematical modeling and simulation methods. In addition, it will appeal to software engineers and programmers, offering them new implementation and application methods. Gathering the latest research, prepared by leading scholars, and identifying promising new directions for solving complex scientific and practical problems, the book presents selected outcomes of the 14th International Scientific-Practical Conference, MODS2019, held in Chernihiv, Ukraine, on June 24 to 26, 2019.

poltava national technical university: *10000 International & American Colleges and Universities* Nam H Nguyen, 2018-06-05 is an eBook to give higher education to people by giving them excellent schools' URLs around the world. The parents and students deserve to know, before they enroll, that the schools they've chosen will deliver the value by helping students compare the

value offered by colleges and on holding institutions accountable for preparing their students to be successful. 10000 International & American Colleges and Universities will help you anywhere you go; it is a quick and easy reference tool that has just the Colleges and Universities with URL you want to check out! Just remember one thing that learning never stops! Read, Read, Read! And Write, Write, Write!

poltava national technical university: Mathematical Modeling and Simulation of Systems Volodymyr Kazymyr, Anatoliy Morozov, Alexander Palagin, Serhiy Shkarlet, Nikolai Stoianov, Dmitri Vinnikov, Mark Zheleznyak, 2024-09-06 Modern complex multi-domain systems require increased efficiency, reliability and availability combined with reduced cost. This book contains papers on mathematical modeling and simulation of processes in various areas: in ecology and the environment, production and energy, information technology, samples of special purpose equipment, and cyber-physical systems. The outcomes presented in the book will be useful to specialists involved in the modeling and simulation of real-world system, management and decision-making models, production models, and software products. Scientists have the opportunity to familiarize themselves with the latest research in a variety of solutions proposed by leading scientists and to determine promising directions for solving complex scientific and practical tasks. Chapters of this book contain papers presented at the 18th MODS International Conference, November 13-15, 2023, Chernihiv, Ukraine.

poltava national technical university: Monograph 3 Association 1901 SEPIKE, 2018-11-15 The journal was launched on August 12, 2012 in Poitiers (France) at a forum of scientists from Eastern and Western Europe, organized by the non-profit organization Association 1901 SEPIKE. The idea of its foundation belongs to a group of talented scientists from Ukraine, Poland, Bulgaria, Germany and France under the aegis of the German educational center SEPIKE Academy, which specializes in supporting Start-Ups as a reflection of modern views of scientists, representatives of academic science, education and business, politicians, leaders and participants of public organizations, as well as perspective young people. It is aimed at finding ways to solve the problem of effective interaction of modern science, education and business with the purpose of the innovative development providing, exchange of modern technologies and best practices. The journal of Association 1901 SEPIKE is an innovative platform for studying and successful implementing modern educational and business-technologies. It can be interesting for authors and readers whose professional interests are associated with the search for innovative ways of development of modern society and thereby ensuring its economic security. The journal includes publications of the results of theoretical and applied researches of scientists, who are representatives of educational institutions and research institutes from different countries, as well as representatives of international organizations and stakeholders, who are specialists in abovementioned spheres.

poltava national technical university: Theory and Engineering of Complex Systems and Dependability Wojciech Zamojski, Jacek Mazurkiewicz, Jarosław Sugier, Tomasz Walkowiak, Janusz Kacprzyk, 2015-06-14 Building upon a long tradition of scientific conferences dealing with problems of reliability in technical systems, in 2006 Department of Computer Engineering at Wrocław University of Technology established DepCoS-RELCOMEX series of events in order to promote a comprehensive approach to evaluation of system performability which is now commonly called dependability. Contemporary complex systems integrate variety of technical, information, software and human (users, administrators and management) resources. Their complexity comes not only from involved technical and organizational structures but mainly from complexity of information processes that must be implemented in specific operational environment (data processing, monitoring, management, etc.). In such a case traditional methods of reliability evaluation focused mainly on technical levels are insufficient and more innovative, multidisciplinary methods of dependability analysis must be applied. Selection of submissions for these proceedings exemplify diversity of topics that must be included in such analyses: tools, methodologies and standards for modelling, design and simulation of the systems, security and confidentiality in information processing, specific issues of heterogeneous, today often wireless, computer networks, or

management of transportation networks. In addition, this edition of the conference hosted the 5th CrISS-DESSERT Workshop devoted to the problems of security and safety in critical information systems.

poltava national technical university: Proceedings of CEE 2019 Zinoviy Blikharskyy, Piotr Koszelnik, Peter Mesaros, 2019-08-08 This book gathers the latest advances, innovations, and applications in the field of effective methods of calculation, resource-saving technologies and advanced materials in civil and environmental engineering, as presented by leading international researchers and engineers at the XVII International Scientific Conference Current Issues of Civil and Environmental Engineering "Lviv- Košice - Rzeszów", held in Lviv, Ukraine on September 11-13, 2019. It covers highly diverse topics, including structural shaping and optimization; aspects of structural behavior and modeling; advanced analysis methods; experimental tests and numerical simulations; design codes, in particular Eurocodes and other national and regional limit state codes; and highway and bridges engineering. It also discusses modern architectural and structural solutions; innovative materials and products; durability and maintenance; fabrication and erection; sustainability in construction; renewable energy sources; heat, gas and water supply; ventilation and air-conditioning; ecological and energy-saving technologies, modern water-purification and treatment technologies; and the protection of water ecosystems. The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaborations.

poltava national technical university: Proceedings of the 2nd International Conference on Building Innovations Volodymyr Onyshchenko, Gulchohra Mammadova, Svitlana Sivitska, Akif Gasimov, 2020-06-13 This book gathers the latest advances, innovations, and applications in the field of building design and construction, by focusing on new design solutions for buildings and new technologies creation for construction, as presented by researchers and engineers at the 2nd International Conference Building Innovations (ICBI), held in Poltava - Baku, Ukraine - Azerbaijan, on May 23-24, 2019. It covers highly diverse topics, including structures operation, repairing and thermal modernization in existing buildings and urban planning features, machines and mechanisms for construction, as well as efficient economy and energy conservation issues in construction. The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaborations.

poltava national technical university: Mathematical Modeling and Simulation of Systems (MODS'2020) Serhiy Shkarlet, Anatoliy Morozov, Alexander Palagin, 2020-08-29 This book contains works on mathematical and simulation modeling of processes in various domains: ecology and geographic information systems, IT, industry, and project management. The development of complex multicomponent systems requires an increase in accuracy, efficiency, and adequacy while reducing the cost of their creation. The studies presented in the book are useful to specialists who are involved in the development of real events models: analog, management and decision-making models, production models, and software products. Scientists can get acquainted with the latest research in various decisions proposed by leading scholars and identify promising directions for solving complex scientific and practical problems. The chapters of this book contain the contributions presented on the 15th International Scientific-Practical Conference, MODS, June 29-July 01, 2020, Chernihiv, Ukraine.

poltava national technical university: Advances in Energy from Waste Viola Vambol, Sergij Vambol, Nadeem A Khan, Nastaran Mozaffari, Niloofar Mozaffari, 2024-07-26 Advances of Energy from Waste: Transformation Methods, Applications and Limitations Under Sustainability provides advanced, systematic information on the environmental transformation of waste and pollutants of various origins into useful products, contributing to the development of the local economy, and increasing the sustainability of the energy sector. In addition, remarkable competences in design, performance, efficiency, and implementation of diverse systems utilized for waste energy recovery are summarized and evaluated. This book will also include recent advances in

biomass-derived green catalysts for various catalytic applications are discussed in this book along with the challenges of controlled synthesis and the impact of morphological, physical, and chemical properties on their adsorption or desorption capability. **Advances of Energy from Waste: Transformation Methods, Applications and Limitations Under Sustainability** discuss waste management priorities, waste to energy, environmental pollution, remediation, health risks, circular economy, recycling, sustainability, technologies, and more. - Serves as a starting point for further research into waste management and biomass conversion - Provides an overview of recent developments in the field of waste-to-energy - Discusses recent advances in biomass-derived green catalysts for various catalytic applications - Introduces diverse case studies on waste, pollution, sustainability, technologies, health risk, and future prospective

poltava national technical university: Nanomaterials and Nanocomposites, Nanostructures, and Their Applications Olena Fesenko, Leonid Yatsenko, 2024-10-31 This book highlights some of the latest advances in nanotechnology and nanomaterials from leading researchers in Ukraine, Europe and beyond. It features contributions presented at the 11th International Conference on Nanotechnologies and Nanomaterials, and was jointly organized by the Institute of Physics of the National Academy of Sciences of Ukraine, University of Tartu (Estonia), University of Turin (Italy), and Pierre and Marie Curie University (France). Internationally recognized experts from a wide range of universities and research institutions share their knowledge and key findings on material properties, behavior, synthesis and their applications. The book will be interesting for leading scientists, advanced undergraduate and graduate students in material and nanoscience. This book's companion volume also addresses topics such as nano-optics, nanoelectronics, energy storage and nanochemistry applications.

poltava national technical university: Liquid Radioactive Waste Treatment: Ukrainian Context Yuriy Zabulonov, Igor Peer, Mark Zheleznyak, 2025-07-14 This book presents the latest scientific advancements and innovative R&D solutions for the treatment of liquid radioactive waste in the context of practical threats in Ukraine. It includes research and engineering insights from the International Conference "Liquid Radioactive Waste Treatment: Ukrainian Context" (LWRT), which was held in Kyiv, Ukraine, on June 29, 2023. This publication covers a wide range of topics related to the treatment and management of radioactive waste, with a particular emphasis on safety considerations. The included articles also explore various aspects of environmental engineering and innovative R&D solutions, as well as the sustainability challenges associated with radioactive waste in the context of postwar reconstruction efforts. The contributions featured in this publication were selected through a rigorous international peer-review process. The carefully curated collection of articles showcases a diverse range of exciting ideas, poised to inspire novel research directions and stimulate interdisciplinary collaborations.

poltava national technical university: Proceedings of the 5th International Young Geotechnical Engineers' Conference IOS Press, 2013-08-20 Geotechnical engineers are at work worldwide, contributing to sustainable living and to the creation of safe, economic and pleasant spaces to live, work and relax. With increased pressure on space and resources, particularly in cities, their expertise becomes ever more important. This book presents the proceedings of the 5th iYGEC, International Young Geotechnical Engineers' Conference, held at Marne-la-Vallée, France, from 31 August to 1 September 2013. It is also the second volume in the series *Advances in Soil Mechanics and Geotechnical Engineering*. The papers included here cover topics such as laboratory and field testing, geology and groundwater, earthworks, soil behavior, constitutive modeling, ground improvement, earthquake, retaining structures, foundations, slope stability, tunnels and observational methods. The iYGEC conference series brings together students and young people at the start of their career in the geotechnical professions to share their experience, and this book will be of interest to all those whose work involves soil mechanics and geotechnical engineering. The cover shows Dieppe harbour breakwater project, Louis-Alexandre de Cessart, 1776-1777. © École Nationale des Ponts et Chaussées.

poltava national technical university: Proceedings of the 4th International Conference on

Building Innovations Volodymyr Onyshchenko, Gulchohra Mammadova, Svitlana Sivitska, Akif Gasimov, 2023-03-08 This book gathers the latest advances, innovations, and applications in the field of building design and construction, by focusing on new design solutions for buildings and new technologies creation for construction, as presented by researchers and engineers at the 4th International Conference Building Innovations (ICBI), held in Poltava – Baku, Ukraine – Azerbaijan, on May 19-20, 2022. It covers highly diverse topics, including structures operation, repairing and thermal modernization in existing buildings and urban planning features, machines and mechanisms for construction, as well as efficient economy and energy conservation issues in construction. The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaborations.

poltava national technical university: Mathematical Modeling and Simulation of Systems Serhiy Shkarlet, Anatoliy Morozov, Alexander Palagin, Dmitri Vinnikov, Nikolai Stoianov, Mark Zhelezniak, Volodymyr Kazymyr, 2023-07-04 Modern complex multi-domain systems require increased efficiency, reliability, and availability combined with reduced cost. This book contains papers on mathematical modeling and simulation of processes in various areas: ecology and the environment, production and energy, information technology, samples of special-purpose equipment, and cyber-physical systems. The outcomes presented in the book are useful to specialists involved in the modeling and simulation of real-world system, management and decision-making models, production models, and software products. Scientists have the opportunity to familiarize themselves with the latest research in a variety of solutions proposed by leading scientists and to determine promising directions for solving complex scientific and practical tasks. Chapters of this book contain papers presented at the 17th MODS International Conference, November 14-16, 2022, Chernihiv, Ukraine.

poltava national technical university: 2nd fib Congress in Naples Italy Vol1 FIB – International Federation for Structural Concrete, 2006-06-01

poltava national technical university: Proceedings fib Symposium in Amsterdam Netherlands FIB – International Federation for Structural Concrete, 2008-05-01

poltava national technical university: Tailor Made Concrete Structures Joost C. Walraven, Dick Stoelhorst, 2008-05-01 In recent years knowledge of concrete and concrete structures has increased, as has its applications. New types of concrete challenged scientists and engineers, and ecological constraints encouraged the implementation of life cycle design of concrete structures, moving the focus more and more to maintenance and uprating of structures. And since bui

poltava national technical university: CONCRETE Innovations in Materials, Design and Structures FIB – International Federation for Structural Concrete, 2019-05-27 This Proceedings contains the papers of the fib Symposium “CONCRETE Innovations in Materials, Design and Structures”, which was held in May 2019 in Kraków, Poland. This annual symposium was co-organised by the Cracow University of Technology. The topics covered include Analysis and Design, Sustainability, Durability, Structures, Materials, and Prefabrication. The fib, Fédération internationale du béton, is a not-for-profit association formed by 45 national member groups and approximately 1000 corporate and individual members. The fib’s mission is to develop at an international level the study of scientific and practical matters capable of advancing the technical, economic, aesthetic and environmental performance of concrete construction. The fib, was formed in 1998 by the merger of the Euro-International Committee for Concrete (the CEB) and the International Federation for Prestressing (the FIP). These predecessor organizations existed independently since 1953 and 1952, respectively.

poltava national technical university: Cement Based Materials Hosam El-Din M. Saleh, Rehab Abdel Rahman, 2018-10-10 Cement-based materials have been used by humans nearly since the dawn of civilization. The Egyptians used lime and gypsum cement to bind their aggregate materials, mud and straw, resulting in bricks that are used for building their famous Egyptian pyramids (between 3000 and 2500 BC). Hydrated cement is a cement material bonded together with

water and used for building construction; it is characterized by acceptable chemical, physical, thermal, mechanical, and structural stability. It plays a main role in the creation of vessels for storage, roads to travel on, weather-resistant structure for protection, inert hard stabilizer for hazardous wastes, and so on. Due to the composition of these materials and their advantages, it has been practiced in different applications. Cement is an essential component of making concrete, the single most prevalent building material used worldwide for construction, skyscrapers, highways, tunnels, bridges, hydraulic dams, and railway ties. Besides their numerous desired properties, there are some undesirable features. To overcome these disadvantages, several studies were established to prepare, improve, and evaluate innovative cement-based materials. Despite its oldness and deep research, every year several methods and materials evolve and so do cement technology. This book intends to provide a comprehensive overview on recent advances in the evaluation of these materials.
