political slogan of the 2000s: *Reexamining Economic and Political Reforms in Russia, 1985-2000* Vladimir Gel'man, Dmitry Travin, Otar Marganiya, 2014-06-25 *Reexamining Economic and Political Reforms in Russia, 1985-2000: Generations, Ideas, and Changes* analyzes the impact of generational changes and ideational changes on major political and economic reforms conducted in Russia during the late twentieth century. This book examines how the policy agenda was shaped by the ideas of the generations' representatives for the "sixtiers" and "seventiers." Representatives of the generation of "sixtiers" conducted reforms from 1985 to 1991 and invested major efforts in political liberalization but did not pay enough attention to economic reforms. On the other hand, the reformers from the generation of "seventiers," who were in charge of policy making from 1991 to 1998, were genuinely oriented toward market building but rather insensitive to the democratization of the political regime. This book explores how these differences in ideational agendas produced inconsistent and controversial outcomes from both stages of reforms.

political slogan of the 2000s: *Disasterland* Sandrine Revet, 2020-04-28 This book analyses the making of the international world of 'natural' disasters by its professionals. political slogan of the 2000s: *Revolutionary Bodies* K. S. Batmanghelichi, 2020-12-10 Gender and sexuality in modern Iran is frequently examined through the prism of nationalist symbols and religious discourse from the late nineteenth and early twentieth centuries. In this book, Kristin Soraya Batmanghelichi takes a different approach, by interrogating how normative ideas of women's bodies in state, religious, and public health discourses have resulted in the female body being deemed as immodest and taboo. Through a diverse blend of sources -a popular cultural women's journal, a red-light district, cases studies of temporary marriages, iconic public statues, and an HIV-AIDS advocacy organization in Tehran - this work argues that conceptions of gender and sexuality have been mediated in public discourse and experienced and modified by women themselves over the past thirty years of the Islamic Republic. Expanding upon existing philosophical theory, technological research and scholarship on gender and sexuality in Iran, this book focuses much needed attention on under-studied, marginalized communities, such as widows living with

HIV. This work interrogates how bodily technologies are constructed discursively and socially in Iran and the values and perspectives which are incorporated in them.

political slogan of the 2000s: Competing Chinese Political Visions Sonny Shiu-Hing Lo, 2010-02-26 A fascinating analysis of the features of the Hong Kong-style democracy viewed as alien, hostile, potentially subversive, and substantially dangerous by the mainland Chinese Communist Party. *Competing Chinese Political Visions: Hong Kong vs. Beijing on Democracy* examines the uniqueness of the Hong Kong model of democracy—a model the Chinese Communist Party not surprisingly views as too Westernized, excessively pluralistic, and too easily shaped by foreign intervention and influence. *Competing Chinese Political Visions* examines the features that define Hong Kong's democracy, including competitive elections, a number of mini-political parties, legitimate checks and balances, the right to protest, and a vibrant social movement. Drawing on a wealth of recent research, noted Hong Kong expert Sonny Shiu-Hing Lo examines the role of Hong Kong in the June 1989 Tiananmen Square incident, discusses the leadership and visions of democratic leaders such as Martin Lee, and offer some bold predictions for the intertwined futures of Hong Kong and China.

political slogan of the 2000s: The New Class Society Robert Perrucci, Earl Wysong, 2003 Extensively revised, the second edition of *The New Class Society* includes innovative new sections and concepts throughout the book that identify and explore how complex organizational structures and actions create and perpetuate class, gender, and racial inequalities. The authors describe how 'inequality scripts' shape the hiring and promotion practices of organizations in ways that provide differential opportunities to people based on class, gender, and racial memberships. The authors also illustrate how privileged class members benefit from organizationally-based and perpetuated forms of inequality. The second edition retains its provocative argument for of an emerging 'double-diamond' social structure and its focus on class interests that are rapidly polarizing American society. New figures, tables, and references incorporate the latest information and research findings to document and illustrate key topics, such as the distribution of wealth and income, globalization, downsizing, contingent labor, the role of money in politics, media content and consolidation, the transformation of education, and the erosion of democracy. The second edition combines scholarship with an engaging style and flashes of comic relief-with several cartoons by some of the best satirists today. The book, accessibly written for undergraduate students, has been widely adopted in courses on stratification, economic sociology, and American society.

political slogan of the 2000s: Joaquín Balaguer, Memory, and Diaspora Ana S. Q. Liberato, 2013-09-26 Joaquín Balaguer, *Memory, and Diaspora* draws on the growing interest in the legacies of authoritarianism and state violence and its interplay with migration and memory. Ana S. Q. Liberato discusses the relationship between memory and government pedagogy—or the meanings constructed and disseminated by Joaquín Balaguer in political ads and public speeches and through public policy and autobiographical work. Liberato argues that there is a revival of memory in the Dominican Republic today, including pro-Balaguer memorialization efforts, and that Balaguer's political pedagogy had an effect on public memory. The influence of his political pedagogy on memory transpires in memorializations which reproduce notions of Balaguer's political and moral exceptionalism. This book shows that Balaguer's authoritarian pedagogy has been consumed,

anchored, and shared among different Dominican publics, in the island and overseas, through the prism he created. Liberato also reveals Balaguer as a contested political character who provokes particular emotions and well-defined experiences and notions of the past. She demonstrates how his legacy was legitimized and contested by comparing him to caudillos José Francisco Peña Gómez and Juan Bosch, as well as through instances when he is praised or questioned for being an American protégée. This book exhibits how diasporic Dominicans maintain and transplant their political knowledge after migration. In particular, notions of democracy, political trust, political accountability, human rights, and sovereignty associated with authoritarian pedagogy accumulate in their narratives of the past and in their accounts of politics and history. Key roles are played by shared historical, cultural, and linguistic symbols associated with the legacy of authoritarianism. Liberato demonstrates how Balaguer influenced the Dominican nation through implementing effective political pedagogies, which in turn helped reinforce and reinscribe some aspects of the pedagogies implemented by Dictator Trujillo and previous authoritarian leaders. Joaquín Balaguer, Memory, and Diaspora will be of particular interest to Caribbean and Latin American Studies students and scholars, as well as anyone working in the areas of migration studies, sociology, Latin American politics, U.S. foreign policy, Latina/o studies, Caribbean studies, and the sociology of knowledge.

political slogan of the 2000s: *Politics and Markets in Rural China* Björn Alpermann, 2012-03-29 Thirty years have passed since the beginning of the reform era in China which saw important changes in agriculture and rural organizations, but it is clear that certain entrenched legacies from pre-reform China still linger on even after WTO accession, most importantly the key role played by state actors and politics in the development of markets in rural China. Although increasingly diversified markets have emerged for major agricultural inputs and products, their development cannot be understood without taking this role into account. Against this backdrop, the contributors to this book offer a fresh account of rural politics and markets, consciously linking these two realms and highlighting their interconnectedness. The book is organized in three parts addressing respectively markets for agricultural inputs and outputs as well as current policies in rural development. The perspectives adopted link macro- and micro-level analysis in each chapter and thus contribute substantially to our understanding of existing markets. As an original account of rural politics and markets in China this book will appeal to students and scholars of Chinese politics, economics, development studies and political economy.

Taking rural politics as the power-inflected processes and struggles that shape access and control over resources in the countryside, as well as the values, ideologies and discourses that shape those processes, the volume brings research on China into conversation with the traditions and concerns of peasant studies scholarship. It provides both an introduction to those unfamiliar with Chinese politics, as well as in-depth, new research for experts in the field. Multiple genres are taken under scrutiny, including blogs,

forums, internet websites and newspaper coverage, political speeches and debates, news reports and broadcast interactions, with a view to capturing the themes and pragma-rhetorical strategies within texts abundant with radical and hateful messages. In addition to examining discourse dynamics and the underlying logic of such texts, the contributors to this monograph explore the ideological motivations and the consequences they might have for social actions on both an individual and collective level. Highly relevant in the contemporary world, divided by conflicts, power and resource struggles, right-wing extremism, and crusades against the imaginary Other, the book presents state-of-the-art interdisciplinary research that should be of interest to specialists in pragmatics, rhetoric, sociolinguistics, discourse analysis, corpus linguistics, as well as media and communication studies. political slogan of the 2000s: Contested Liberalization Jonah D. Levy, 2023-04-13 Economic liberalization has been contested and defeated in France to an unparalleled extent in comparison to other leading political economies in Western Europe. Levy offers a historical explanation, centered on the legacies of France's postwar statist or dirigiste economic model. Although this model was dismantled decades ago, its policy, party-political, and institutional legacies continue to fuel the contestation of liberalizing reforms today. *Contested Liberalization* offers a comprehensive analysis of French economic and social policy since the 1980s, including the Macron administration. It also traces the implications of the French case for contestation in East Asia and Latin America. Levy concludes by identifying ways that French liberalizers could diminish contestation, notably by adopting a more inclusive process and more equitable allocation of the costs and benefits of liberalizing reform. This book will interest scholars and students of political economy and comparative politics, especially those working on economic liberalization, French politics, and the welfare state.

political slogan of the 2000s: The Specter of Global China Ching Kwan Lee, 2018-01-03 China has recently emerged as one of Africa's top business partners, aggressively pursuing its raw materials and establishing a mighty presence in the continent's booming construction market. Among major foreign investors in Africa, China has stirred the most fear, hope, and controversy. For many, the specter of a Chinese neocolonial scramble is looming, while for others China is Africa's best chance at economic renewal. Yet, global debates about China in Africa have been based more on rhetoric than on empirical evidence. Ching Kwan Lee's *The Specter of Global China* is the first comparative ethnographic study that addresses the critical question: Is Chinese capital a different kind of capital? Offering the clearest look yet at China's state-driven investment in Africa, this book is rooted in six years of extensive fieldwork in copper mines and construction sites in Zambia, Africa's copper giant. Lee shadowed Chinese, Indian, and South African managers in underground mines, interviewed Zambian miners and construction workers, and worked with Zambian officials. Distinguishing carefully between Chinese state capital and global private capital in terms of their business objectives, labor practices, managerial ethos, and political engagement with the Zambian state and society, she concludes that Chinese state investment presents unique potential and perils for African development. *The Specter of Global China* will be a must-read for anyone interested in the future of China, Africa, and capitalism worldwide.

political slogan of the 2000s: Women and Politics Lynne Ford, 2018-05-15 *Women and Politics* is a comprehensive examination of women's use of politics in pursuit of gender equality. How can demands for gender equality be reconciled with sex differences? Resolving this paradoxical question has proceeded along two paths: the legal equality doctrine, which emphasizes gender neutrality, and the fairness doctrine, which recognizes differences between men and women. The text's clear analysis and presentation of theory and history helps students to think critically about the difficulties faced by women in politics, and about how public policies in education, labour and the economy, and family and fertility, impact gender equality. The fully-revised fourth edition explores new critical perspectives, recent political events, and current challenges to gender equality, including the 2016 presidential election and Hillary Clinton's candidacy, the fight for equal pay and paid leave, and the debate over reproductive rights and campus sexual assault. It also includes current scholarship on the intersections of race, class, and gender, and expanded coverage of minority women, women in the military, and conservative women. This text, and its two-path framework, is essential to understanding women's pursuit of equality via the political system.
