pre ap algebra 2: Culturally Sustaining Pedagogies in Mathematics and Technology Education: Research, Practices, and Critical Reflections Terrell, Karen L., Silva Pimentel, Diane, 2025-08-08 Mathematics and technology education shape students' futures, while traditional teaching methods overlook the cultural backgrounds and experiences of diverse learners. Culturally sustaining pedagogies (CSP) help reimagine math and technology classrooms, so students feel valued and included. This approach encourages educators to connect lessons to students' communities, languages, and thought patterns, while challenging systems that have historically excluded or marginalized certain groups. Further research into culturally sustaining pedagogies can make mathematics and technology education more relevant, equitable, and empowering. Culturally Sustaining Pedagogies in Mathematics and Technology Education: Research, Practices, and Critical Reflections explores how culturally sustaining pedagogies transform mathematics and technology education by valuing students' cultural identities and experiences. It examines teaching practices, curriculum design, and leadership experiences that make learning more inclusive and equitable. This book covers topics such as pre-service teaching, STEM education, and artificial intelligence, and is a useful resource for educators, sociologists, academicians, researchers, and scientists.

pre ap algebra 2: A Guide to Detracking Math Courses Angela Torres, Ho Nguyen, Laura Wentworth Streeter, Elizabeth Hull Barnes, Laura Wentworth, 2023-04-26 Create a pathway to equity by detracking mathematics The tracked mathematics system has been operating in US schools for decades. However, research demonstrates negative effects on subgroups of students by keeping them in a single math track, thereby denying them access to rigorous coursework needed for college and career readiness. The journey to change this involves confronting some long-standing beliefs and structures in education. When supported with the right structures, instructional shifts, coalition building, and educator training and support, the detracking of mathematics courses can be a primary pathway to equity. The ultimate goal is to increase more students' access to and achievement in higher levels of mathematics learning—especially for students who are historically marginalized. Based on the stories and lessons learned from the San Francisco Unified School District educators who have talked the talk and walked the walk, this book provides a model for all those involved in taking on detracking efforts from policymakers and school administrators, to math coaches and teachers. By sharing stories of real-world examples, lessons learned, and prompts to provoke discussion about your own context, the book walks you through: Designing and gaining support for a policy of detracked math courses Implementing the policy through practical shifts in scheduling, curriculum, professional development, and coaching Supporting and improving the policy through continuous research, monitoring, and maintenance. This book offers the big ideas that help you in your own unique journey to advance equity in your school or district's mathematics education and also provides practical information to help students in a detracked system thrive.

pre ap algebra 2: Overloaded and Underprepared Denise Pope, Maureen Brown, Sarah Miles, 2015-06-17 Praise for Overloaded and Underprepared "Parents, teachers, and administrators are all concerned that America's kids are stressed out, checked out, or both—but many have no idea where to begin when it comes to solving the problem. That's why the work of Challenge Success is so urgent. It has created a model for creating change in our schools that is based on research and solid foundational principles like communication, creativity, and compassion. If your community wants to

build better schools and a brighter future, this book is the place to start.” —Daniel H. Pink, author of *Drive* and *A Whole New Mind* “Challenge Success synthesizes the research on effective school practices and offers concrete tools and strategies that educators and parents can use immediately to make a difference in their communities. By focusing on the day-to-day necessities of a healthy schedule; an engaging, personalized, and rigorous curriculum; and a caring climate, this book is an invaluable resource for school leaders, teachers, parents, and students to help them design learning communities where every student feels a sense of belonging, purpose, and motivation to learn the skills necessary to succeed now and in the future.” —Linda Darling-Hammond, Charles E. Ducommun Professor of Education, Stanford University “Finally, a book about education and student well-being that is both research-based and eminently readable. With all the worry about student stress and academic engagement, Pope, Brown and Miles gently remind us that there is much we already know about how to create better schools and healthier kids. Citing evidence-based ‘best practices’ gleaned from years of work with schools across the country, they show us what is not working, but more importantly, what we need to do to fix things. Filled with practical suggestions and exercises that can be implemented easily, as well as advice on how to approach long-term change, *Overloaded and Underprepared* is a clear and compelling roadmap for teachers, school administrators and parents who believe that we owe our children a better education.” —Madeline Levine, co-founder Challenge Success; author of *The Price of Privilege* and *Teach Your Children Well* “This new book from the leaders behind Challenge Success provides a thorough and balanced exploration of the structural challenges facing students, parents, educators, and administrators in our primary and secondary schools today. The authors’ unique approach of sharing proven strategies that enable students to thrive, while recognizing that the most effective solutions are tailored on a school-by-school basis, makes for a valuable handbook for anyone seeking to better understand the many complex dimensions at work in a successful learning environment.” —John J.
