prc schedule of exam 2024: China's Public Human Resource Management Daan Wang, 2025-09-25 How do governments select the right people for public service? This book examines the evolving logic of civil service recruitment in contemporary China, focusing on the balance between fairness, competence, and political loyalty. Through a detailed case study of Shenzhen, it offers rare insights into the workings of a highly standardized selection system. Spanning policy, practice, and perception, the book explores how China's civil service examinations function in practice and whether they effectively match candidates with job and organizational requirements. Drawing on interviews with policymakers, examiners, and test designers, as well as a large-scale survey of civil servants, the study introduces a new theoretical concept—person-government fit—to explain hiring practices in state bureaucracies. It traces the historical development of the system, analyzes test content, and evaluates the outcomes of civil service selection using both qualitative and quantitative methods. Shenzhen, one of China's most innovative and reform-oriented cities, serves as a revealing case to explore broader governance trends in the post-reform era. The book also offers a comparative perspective of the civil service examination in Hong Kong, providing practical lessons and policy improvements. This book will be valuable for scholars, students, and practitioners in public administration, political science, and Chinese studies. It offers a grounded, empirical look at how state capacity is built from the ground up and provides new tools for understanding recruitment and human resource management in the public sector.

prc schedule of exam 2024: Forsaken Causes Ryan Wolfson-Ford, 2024 In the wake of anticolonial struggles and amid the two world wars, twentieth-century Southeast Asia churned with new political, cultural, and intellectual realities. Liberal democracies flourished briefly, only to be discarded for dictatorships and other authoritarian regimes as the disorder and inefficiencies inherent to democracy appeared unequal to postcolonial and Cold War challenges. Uniquely within the region, Laos maintained a stable democracy until 1975, surviving wars, coups, and revolutions. But Lao history during this period has often been flattened, subsumed within the tug-of-war between the global superpowers and their puppets. *Forsaken Causes* offers a groundbreaking intellectual history of the Royal Lao Government (RLG) from 1945 to 1975. In Ryan Wolfson-Ford's account, the Lao people emerge as not merely pawns of the superpowers but agents in their own right, with the Lao elite wielding particular influence over the nation's trajectory. Their prevailing ideologies--liberal democracy and anticommunism--were not imposed from outside, but rather established by Lao themselves in the fight against French colonialism. These ideologies were rooted in Lao culture, which prized its traditional monarchy, Buddhist faith, French learning, and nationalist conception of a Lao race. Against histories that have dismissed Lao elites as instruments of foreign powers, Wolfson-Ford shows that the RLG charted its own course, guided by complex motivations, rationales, and beliefs. During this time Lao enjoyed unprecedented democratic freedoms, many of which have not been seen since the government fell to communist takeover in 1975. By recentering the Lao in their own history, Wolfson-Ford restores our understanding of this robust but often forgotten liberal democracy, recovers lost voices, and broadens our understanding of postcolonial and Cold War Southeast Asia as a whole.

Hamilton, Joe Renouard, 2024-04-01 This volume analyzes what China's rise means for the transatlantic community in a new age of disruption—an age marked by great power rivalry, technological upheavals, and the diffusion of power. The book explores how today's conditions—including heightened Western concerns about Chinese influence operations, Chinese efforts to manipulate critical economic interconnections and dependencies, rapid technological advances, the Russia-China entente, and growing linkages between North Atlantic and Indo-Pacific security—have forced Western actors to adopt a more differentiated approach. In this great power competition, they must decide how and where to work with China as an important partner, how to address China's competitive challenges, and how to address China's efforts to forge a set of norms and institutions to challenge the open, rules-based international system.
