premium economy on china southern: *The Airline Revolution* Gordon Mills, 2016-07-15
When starting new airlines in response to government deregulation, entrepreneurs in the U.S. and Europe reduced some traditional service qualities (to reduce costs), concentrated on non-stop services between city pairs not already so connected, improved on-time performance, and offered low fares to win leisure travelers from the incumbents and to encourage more travel. In recent developments, some of the new airlines have offered optional extras (at higher fares) to attract business travelers and entered major routes alongside the legacy carriers. Within both the U.S. and Europe, deregulation removed most geographical barriers to expansion by short-haul airlines. Later, limited deregulation spread to other world regions, where many short-haul routes connect city pairs in different countries, and where governments have retained traditional two-country mechanisms restricting who may fly. To gain access to domestic routes in other countries, some new airlines are setting up affiliate companies in neighboring countries, with each company legally controlled in the country of domicile. With air travel growing strongly, especially in Asia, a common result is intense, but potentially short-lived, competition on major routes. The recent developments give clear signposts to likely mid-term outcomes, and make this an opportune time to report on the new-airline scene. *The Airline Revolution* will provide valuable economic analysis of this climate to students, airline professionals advancing to senior positions, public servants and others who provide advice to governments.

premium economy on china southern: *Kundenbindungsmanagement internationaler Fluggesellschaften: Eine Analyse von Frequent Flyer Programmen in der Aviation Branche*
Jan Pohlkamp, 2015-03-10
Der 23. November 2009 war ein besonderer Tag für die französische Fluggesellschaft Air France. Als erste Luftverkehrsgesellschaft Europas konnte Air France mit dem neuen, größten Passagierflugzeug der Welt - dem Airbus A380-800 - Linienflug-Premiere feiern. Mit der Airline hatten jedoch auch die Mitglieder des Air France/KLM-Vielfliegerprogrammes 'Flying Blue' Grund zur Freude. Bereits für den ersten kommerziellen Flug von Paris nach New York hatten Vielflieger die Chance, ihre Bonusmeilen gegen ein exklusives Flugticket für den A380

einzutauschen. Kunden ohne den entsprechenden Flying Blue-Kontostand an Bonuspunkten kamen hingegen nur über eine Auktion mit kräftigen Preisaufschlägen in diesen Genuss. Dieses aktuelle Beispiel einer exklusiven Prämie zeigt nur einen kleinen Einblick in die Welt der Frequent Flyer Programme und offenbart doch das gesamte Konzept dieser Kundenbindungsmaßnahme. Frequent Flyer Programme (FFP) - oder auch Vielfliegerprogramme - bieten Passagieren die Möglichkeit, Bonuspunkte für geflogene Meilen zu sammeln und diese gegen Prämien einzutauschen. Dadurch erhoffen sich die Fluggesellschaften, rentable Kunden zu identifizieren, zu entwickeln und langfristig zu binden. Diese Form der Kundenbindungsprogramme hat ihren Ursprung im Jahr 1981. American Airlines implementierte damals eine Produktförderungsmaßnahme, die in ihrer Basisversion in den darauffolgenden Jahren zu den aktuellen Vielfliegerprogrammen weiterentwickelt wurde. Durch eine umfassende Studie fand American Airlines unter dem damaligen CEO Robert Crandall heraus, dass durch den immer größer werdenden Bedarf an Flugreisen ein Bonusprogramm nicht nur attraktiv auf Kunden wirken würde, sondern auch einen intelligenten Distributionskanal zur Verkaufsförderung darstelle. Zum damaligen Zeitpunkt bot das Pionierprogramm AAdvantage ein Bonusprogramm nur für sehr aktive Vielflieger an, bei dem der Gegenwert der Bonuspunkte noch sehr gering war und die Punkte am Jahresende verfielen. Ergänzend waren mit der Autovermietung Hertz und der Hotelkette Hyatt nur zwei Programmpartner integriert worden und das Einlösen der Bonusmeilen beschränkte sich auf ausgewählte Freiflüge und Upgrades sowie einige Prämien der beiden Partner. Daraufhin wurde das Konzept von AAdvantage bereits kurz nach der Einführung von einigen Wettbewerbern als Marketingspielerei belächelt. [...]

premium economy on china southern: China's Integration Into the World Economy

Yongzheng Yang, 2003-12-01 Although the rest of the world had waited a long time for China to open up, feelings were mixed when it actually did and began to integrate rapidly with the world economy. With the country's recent accession to the World Trade Organization (WTO), many of its trading partners are increasingly concerned that China's competition in the world goods and capital markets may adversely affect their own growth prospects. This paper examines the implications of China's WTO accession for other developing countries in the context of the country's long-term process of growth and opening up. The paper argues that China's integration into the world economy will inevitably impose adjustment costs on its trading partners in the short-to-medium term, but the benefits it generates are likely to dominate in the long run.
