It addresses the specific issues and challenges faced by CSL teachers and demonstrates international practices in the

field. It also provides a comprehensive examination of their multifaceted professionalism from diverse perspectives. With the rise of China as a political and economic power, learning CSL has increasingly gained its popularity in a global context. Many more overseas universities, colleges, and higher institutes now have established CSL programmes at both undergraduate and postgraduate levels to cultivate local CSL teachers. However as the number of CSL learners continues to grow, the need for high-quality Chinese language teachers has become more urgent than ever. Responding to CSL teachers' challenges of delivering Chinese language and culture to learners from diverse language and cultural backgrounds, this book explores four interrelated themes: 1) CSL teachers' professional development in the global context, 2) CSL teachers' motivation, agency, and identity, 3) CSL teachers' knowledge and practice in multicultural and multilingual contexts, and 4) CSL teachers' technological literacy and agency in the digital era. teacher caught with student 2023: Teachers' Emotional Experiences Saul Karnovsky, Nick Kelly, 2025-03-10 This edited book seeks to address the impoverished culture of emotional discourse in the teaching profession and teacher education. Teachers across the world live out emotional experiences in their professional lives (in the classroom, in the staffroom, online) yet the language available for talking about these experiences is fragmented and often inadequate. The book draws on a broad range of theories including psychoanalytic, critical, feminist, sociological and poststructural to expand a rich conceptual language for talking about teachers' emotional experiences, originating from the authentic voices of teachers themselves. The book is unified by the inclusion of unpublished, first-hand accounts of teachers, drawn from the editors' own empirical research interviewing a diverse group of teachers over many years. Each chapter includes a direct voice of a teacher telling their own story, in their own words, about an experience they found to be emotionally significant—the challenging, the sublime, and the downright distressing. Scholarly responses to each of these interviews weave a novel imagining for teachers' emotional discourse within schools. The chapters discuss the complex contexts of teachers' professional-emotional lives, such as neoliberal school systems, fraught relationships with leaders, contractualisation, toxic positivity, intractable behaviour problems and datafication. The book will be useful for education researchers, scholars of teachers and teacher education as well as teachers themselves, their families, and those who wish to work with and understand the complex dynamics of the teaching profession.

teacher caught with student 2023: *Surveillance Education* Nolan Higdon, Allison Butler, 2024-08-02 *Surveillance Education* explores the pervasive use of digital surveillance technologies in schools and assesses its pernicious effects on students. Recognizing that the use of digital technologies will persist, the authors instead offer practical ways to ameliorate their impact. In our era of surveillance capitalism, digital media technologies are ever more intertwined into the educational process. Schools are presented with digital technologies as tools of convenience for gathering and grading student work, as tools of support to foster a more equitable learning environment, and as tools of safety for predicting or preventing violence or monitoring mental, emotional, and physical health. Despite a dearth of evidence to confirm their effectiveness, digital data collection and tracking is often presented as a way to improve educational outcomes and safety. This book challenges these fallacious assumptions and argues that the use of digital media technologies has caused great harm to students by subjecting them to oppressive levels of surveillance, impinging upon their right to privacy, and harvesting their personal data on behalf of Big-Tech. In doing so, the authors draw upon interviews from K-12 and higher education students, teachers, and staff, civil rights and technology lawyers, and educational technological programmers. The authors also provide practical guidance for teachers, administrators, students, and their families seeking to identify and combat surveillance in education. This urgent, eye-opening book will be of interest to students and educators with interests in critical media literacy and pedagogy and the sociology of technology and education.
