teacher about me template: *Teacher Learning and Leadership* Ann Lieberman, Carol Campbell, Anna Yashkina, 2016-08-25 Teacher Learning and Leadership asserts that teachers should be put at the center of creating, developing, organizing, implementing, and sharing their own ideas for school change rather than being passive recipients of knowledge from the outside. It argues that there is tremendous potential for the good of students and the professionalization of teaching, when teachers work collaboratively to develop their own and their colleagues' professional knowledge and practices and are supported by school and system leaders, unions and government. The book draws on the groundbreaking work of the Teacher Learning and Leadership Program in Ontario and uses an in-depth case study to illustrate its points. It demonstrates how professional development built around collaboration, teacher leadership, curriculum development, technology and pedagogy can be organized in a way that redistributes control and responsibility to teachers, thereby instilling a genuine sense of pride and accomplishment in their work. This book is a sincere outreach from the authors who advocate for the professional development of, by and for teachers as individuals and, importantly, as a collective profession. The authors argue that projects like the TLLP (a joint initiative between the Ontario Ministry of Education and the Ontario Teachers' Federation) can radically, and positively, transform teachers' knowledge, skills and practices. The book provides an important model for school change led by teachers, rather than experts, in partnership with school and system leaders and is a fascinating read for all those concerned with teaching, teacher development and educational change.

teacher about me template: *Making Teachers Better, Not Bitter* Tony Frontier, Paul Mielke, 2016-08-23 In too many districts, evaluation of teachers ensures competence but does little or nothing to encourage and support expertise. In this thought-provoking and groundbreaking book,

Tony Frontier and Paul Mielke address this issue head-on, combining the conceptual and the practical by offering a compelling vision of teacher growth, along with nearly three dozen step-by-step protocols for working with teachers. They present a powerful rationale for reconceptualizing teacher evaluation by creating a balanced system of three equally important components: Reliable and valid evaluation. Empowering and focused supervision. Meaningful and purposeful reflection. Each component is discussed in terms of its purpose, premise, processes, practices, and payoffs. Revealing examples based on the authors' experiences in classrooms across the country show what evaluation, supervision, and reflection look like when they're not done well--and what they could look like if done more effectively. Providing insight and inspiration, *Making Teachers Better, Not Bitter* paves a clear path to better teaching and helps you acknowledge and support the hard work that teachers do every day to make learning come alive for their students.

teacher about me template: Narrative as Writing and Literacy Pedagogy for Preservice Elementary Teachers Nancy A. Wasser, 2021-08-16 "I just cannot write" or "I am not a good writer" are familiar complaints from students in academia. Many of them claim they cannot express themselves clearly in written text, and their lack of this skill impedes them in their academic career. In this book, Nancy A. Wasser argues that teachers can help solve this when they start viewing writing not as secondary to reading, but as the equally important side of the same coin. Those who cannot read, will not be able to write. Wasser explains how teaching and regular practicing of writing skills from an early age onwards helps children grow into students who are self-aware of their voices. By employing narrative as a process of learning to write and a way to read, teachers can teach children the art of writing, while also making children more aware of their own constructions of narrative. Combining the focus on individual and group expression in writing lessons, students can trace and reflect on their own life transformations through their writing process. Good writers are not born that way, but made through effort and practice. Changes in curriculum may not only lead to better-expressed citizens, but also to more balance between teacher and children voices.
