teacher images and quotes: Proactive Images for Pre-Service Teachers Jeremy Delamarter, 2019-03-23 This book provides tools to help pre-service teachers and teacher-preparation programs identify, evaluate, and respond to misaligned expectations early in the teacher-preparation sequence. Plato tells the story of prisoners who mistake the shadows on the wall of their cave for flesh-and-blood reality. These “shadow narratives” dominated their expectations, and when confronted with a three-dimensional reality that bore little resemblance to the shadows, the prisoners were blinded by the light. Surrounded by images and rhetoric that reduce the fullness of teaching to flat, two-dimensional representations, today's pre-service teachers tend to develop expectations of teaching that resemble the shadows more than they resemble reality. These misaligned expectations often lead to practice shock: the painful and disillusioning cognitive dissonance that comes about when unsustainable expectations collide with real-world practice. Intended as a proactive manual for mitigating practice shock, this book shines a light on the shadows by giving pre-service teachers the tools to examine, confront, and revise their own misaligned expectations of teaching before they reach the point of crisis.

teacher images and quotes: **Agency through Teacher Education** Ryan Flessner, Grant Miller, Julie Horwitz, Kami Patrizio, 2012-12-27 Agency through Teacher Education: Reflection, Community, and Learning addresses the ways that agency functions for those involved in twenty-first-century teacher education. This book, commissioned by the Association of Teacher Educators, relies on the voices of teacher education candidates, in-service teachers, school leaders, and university-based educators to illustrate what agency looks like, sounds like, and feels like for people trying to act as agents of change. These examples take the form of narratives, theoretical explorations, formal research studies, and reflective essays. Agency through Teacher Education does not seek to establish one definition for agency, but rather to conceptualize it from three perspectives: reflective practice, community engagement/activism, and organizational learning. The book seeks to explore ways stakeholders in- and outside the classroom become agents of change, as well as the traditional and non-traditional roles played out in teacher education programs across the United States.

teacher images and quotes: *Teach Your Child To Swim Through Games And Play* Mark Young, 2024-03-25 Discover 60 games that use little or no equipment and that cover all of the essential basics of learning to swim, including breathing, floating, submerging, gliding, kicking and pulling. Explore games and activities that teach them all. Using games and play to teach your child how to swim will not only open their mind to imagination and engagement, but it will help to distract them from the fears and anxieties often associated with the new sensations of being in the water and the expectations that come with learning how to swim. 'I'm Mark Young, a swimming teacher with 30 years experience, and let me tell you, teaching my own three children to swim was a nightmare! They did not want to listen to Dad and just wanted to play. So, I gave up trying to teach them and let them play. Then it hit me. By playing and doing their own thing, they discovered the water for themselves. So I began to weave in some basic swimming skills and elements of swimming lessons into their games and, because it was a game, they were willing participants. Without knowing, they were learning how to swim as part of their play. Use the games and tools in my book and you can do the same. Have fun!'

teacher images and quotes: The Educator's Handbook for Teaching with Primary Sources Scott M. Waring, 2023 Educators across subject areas are striving to integrate primary sources into their pedagogy and teaching. Yet, despite their importance to authentic disciplined inquiry, the implementation of primary source activities in the pre-K-12 classroom has been limited. This lack of utilization can largely be attributed to the perception that these activities are too complex to design, implement, and grade. Many teachers also feel that primary source analysis and the construction of evidence-based narratives is too difficult for students to complete in the traditional classroom. Waring argues that this is not the case and, with this handbook, provides teacher candidates and inservice teachers with detailed and specific perspectives, activities, approaches, and resources to help them effectively and authentically use primary sources in their classrooms. Book Features: Introduces teaching with primary sources, including detailed examples of authentic and tested instructional ideas and approaches. Designed to meet the needs of classroom teachers and teacher candidates in social studies, English and language arts, mathematics, science, and other fields. Offers dozens of primary sources and links to resources throughout the book. Aligns to national standards, frameworks, and the C3 framework for social studies. Can be used to meet the needs of emerging English learners and students with special needs. Focuses on ways in which educators are utilizing a variety of emerging technologies to engage students in deeper and more authentic ways of learning.

teacher images and quotes: Teaching Literacy in Troubled Times Allison Skerrett, Peter Smagorinsky, 2022-07-18 Upending deficit narrative of learning loss, combating broken approaches to racial equity, and wading deep into the contested waters of democratic principles of learning within today's schools, Dr. Skerrett and Dr. Smagorinsky offer an accessible guidebook for making our classrooms sites of justice and joy. Perhaps most importantly, theirs is a book that reveals classroom practices as they really are--the voices of teachers are situated as co-authors in this important journey. I cannot think of a more timely or relevant book for English educators than Teaching Literacy in Troubled Times. — Antero Garcia, Ph.D., Associate Professor, Graduate School of Education, Stanford University Relevant instruction to move education forward instead of back to normal Educators often bemoan the so-called learning gap that followed the upheaval to schooling in 2020, but the real learning gap will occur if the watershed events and social shifts of the early 2020s are not integrated into school instruction and learning. For today's learning to be relevant to today's students, it must reflect their lives and the true social worlds they inhabit. But how? Teaching Literacy in Troubled Times empowers educators to engage students in critical thinking, literacy activities, and inquiry to investigate the personal and social issues of pressing importance to today's middle and high school students. Six units of study, each co-authored by a teacher who road-tested the activities in their own classroom, guide teachers through the process of teaching literacy around the topics of identity, social inequity, global justice, empathy, racism and racial literacy, and conflicting ideas of patriotism. This urgent, timely guide to creating a relevant classroom includes: Instructional methods, content knowledge, and learning activities for each unit that engage students in critical inquiry and social action. Insights and guidance from teachers who put the full unit plans in action with students. Reflection questions to help teachers envision the work in their own classrooms. Templates, rubrics, examples of student work, and other tools that help teachers to plan and implement activities that grow students' capacity to understand and act in society. Prime your students with the critical thinking, investigative, and communicative skills they need to connect themselves to broader social movements and create a new generation of educated changemakers.

teacher images and quotes: Constructing a Personal Orientation to Music Teaching Mark Robin Campbell, Linda K. Thompson, Janet Revell Barrett, 2021-03-21 Constructing a Personal Orientation to Music Teaching: Growth, Inquiry, and Agency, (Second Edition), is a textbook for studies in music education. Expanding upon the first edition, the authors promote inquiry and reflection to facilitate teacher growth, lifelong learning, and a disposition toward educational change. The revised text responds to current calls for social change and teacher education reform by reaffirming and intensifying the need for music teachers to adopt a personal orientation toward their work. A personal orientation encourages teachers to initiate their own growth, engage in inquiry, and exercise agency in school contexts. Strongly grounded in current theories and research in teacher education, Constructing a Personal Orientation to Music Teaching: Growth, Inquiry, and Agency strives to do the following: Engage readers in analyzing their own experiences in order to conceptualize the complexity of teaching Involve them in clarifying their reasons for seeking a career in teaching Support their insights, questions, and reflections about their work Promote a reflective, critical attitude about schools in general as music teachers are urged to think of themselves as change agents in school settings Construct a moral purpose as a compass to guide their current and future endeavors in the profession. Every chapter includes a wealth of pedagogical features, including new methodologies and examples of practice to engage the readers in processes of inquiry and reflection. The second edition is organized in two parts. Part I focuses on positioning

music teachers as learners in the profession, significantly expanding concepts explored in the first edition that are central to a personal orientation to professional growth. In the new edition, a reconceptualized Chapter 5 challenges teachers to cultivate their identities as change agents. The second half of the book—focusing on becoming a student of music teaching— features five new chapters. A provocative chapter on curriculum sets the stage for a set of additional chapters that invite deeper considerations of the commonplaces of teacher, learners, subject matter, and context. An epilogue speaks directly to the power of agency, imagination, and hope in teachers' lives.
