While conservative religious denominations often decry gender egalitarianism and liberal society’s sexual norms for contributing to this development, many individuals belonging to such denominations are still part of this trend. This book focuses on one such group, Israeli Religious Zionists. Drawing on ethnographic research, Ari Engelberg explains why the numbers of Religious Zionist singles have risen, describes how these adults deal with social marginalization and spiritual challenges, and how the community leadership has responded. technician appreciation week 2023: *Fugitive* Allan Kaplan, 2023-06-13 Following Goethe, I do not seek explanation, and I do not write about anything that is separate from me. My own development through these years, and the developments threading these three years themselves, are one. I try...to portray the character of the emergent social predicament that we are all participants in and responsible for. -- Allan Kaplan Emerging from a unique Goethean approach to human experience--developed over a lifetime, applied here to life during the first three years of the Covid era, from a mountain in South Africa--Allan Kaplan’s *Fugitive* is both a poetic record and a contemplative, scientific roadmap. In striving to make himself a vessel for sensing the dynamics of our time--the struggle for meaning, the will toward freedom, the experience of powerlessness and surrender, and the urge to defend and secure the capacity for human thinking and discernment--Kaplan allows the profound questions of our time to arise and be explored in thought that is free of the compulsion to arrive at fixed conclusions. In pondering the elements of nature and the laws governing them, we find the active forces of life and health; we glimpse wisdom at work and, often, beauty. One might be reminded: we, too, are a part of nature, and this wisdom of nature, encountered competently, may serve as a guide in facing the tasks of recognizing, embodying, and preserving the essence of our humanity in these darkening times. Here is a little book--an example in practice--to help strengthen our humanity.

technician appreciation week 2023: The Vanishing Vision James Day, 2023-04-28 This spirited history of public television offers an insider's account of its topsy-turvy forty-year odyssey. James Day, a founder of San Francisco's KQED and a past president of New York's WNET, provides a vivid and often amusing behind-the-screens history. Day tells how a program producer, desperate to locate a family willing to live with television cameras for seven months, borrowed a dime—and a suggestion—from a blind date and telephoned the Louds of Santa Barbara. The result was the mesmerizing twelve-hour documentary *An American Family*. Day relates how Big Bird and his friends were created to spice up Sesame Street when test runs showed a flagging interest in the program's live-action segments. And he describes how Frieda Hennock, the first woman appointed to the FCC, overpowered the resistance of her male colleagues to lay the foundation for public television. Day identifies the particular forces that have shaped public television and produced a Byzantine bureaucracy kept on a leash by an untrusting Congress, with a fragmented leadership that lacks a clearly defined mission in today's multimedia environment. Day calls for a bold rethinking of public television's mission, advocating a system that is adequately funded, independent of government, and capable of countering commercial television's lowest-common-denominator approach with a full range of substantive programs, comedy as well as culture, entertainment as well as information. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact.
