who owns american glass research

who owns american glass research is a question that often arises among industry professionals and businesses involved in the glass packaging sector. American Glass Research (AGR) is a prominent organization specializing in glass container testing, inspection, and consulting services. Understanding the ownership and organizational structure of AGR is essential for stakeholders seeking reliable and authoritative insights into glass research and quality standards. This article will explore the ownership history of American Glass Research, detail the current ownership status, and discuss how this ownership influences the company's operations and credibility. Additionally, the article will cover the company's services, key markets, and its impact on the glass industry. By the end, readers will have a comprehensive understanding of who owns American Glass Research and why this matters in the context of glass container manufacturing and testing.

- Ownership History of American Glass Research
- Current Ownership and Corporate Structure
- Impact of Ownership on Services and Industry Reputation
- Overview of American Glass Research Services
- Key Markets and Clientele
- Industry Influence and Future Outlook

Ownership History of American Glass Research

The origins of American Glass Research date back several decades, establishing itself as a trusted name in glass container testing and research. Initially founded as an independent research organization, AGR focused on providing unbiased and scientifically rigorous testing services for glass container manufacturers and users. Over the years, the company developed a reputation for high-quality analytical services, including physical testing, chemical analyses, and failure investigation for glass products. The ownership structure during its early years was primarily private, with a focus on maintaining independence to support impartial research and testing results.

Founding and Early Ownership

American Glass Research was founded by industry experts who recognized the need for specialized testing services tailored to the glass packaging industry. The founders aimed to create a laboratory that could serve as a central resource for manufacturers, suppliers, and regulatory bodies. Early ownership was held by private investors and industry

professionals dedicated to advancing the science of glass container testing. This foundation ensured the company’s commitment to technical excellence and integrity.

Transition and Growth Periods

As AGR expanded its service offerings and geographic reach, ownership evolved to include a broader range of stakeholders. Strategic partnerships and investments were made to support technological advancements and infrastructure expansion. Despite these changes, AGR maintained a structure that prioritized scientific objectivity and client confidentiality, which contributed to its sustained growth and industry respect.

Current Ownership and Corporate Structure

Today, American Glass Research operates as a subsidiary of Owens-Illinois, Inc. (O-I), one of the world’s largest manufacturers of glass containers. Owens-Illinois acquired American Glass Research to integrate specialized testing and research capabilities directly within its corporate structure, enhancing product quality assurance and innovation. This acquisition aligns with O-I’s strategic goals of maintaining leadership in glass packaging by leveraging advanced research and testing services.

Owens-Illinois, Inc. Overview

Owens-Illinois, Inc., headquartered in Perrysburg, Ohio, is a global leader in glass container manufacturing with a presence in numerous countries. O-I’s acquisition of AGR reflects its commitment to investing in research and development, ensuring that its glass products meet the highest standards of quality and safety. As a public company listed on the New York Stock Exchange, Owens-Illinois operates with a transparent governance structure, and its ownership is distributed among institutional and individual shareholders.

Integration of American Glass Research within Owens-Illinois

Since the acquisition, American Glass Research functions as the dedicated research and testing division within Owens-Illinois. This integration allows for seamless collaboration between product development teams and quality assurance experts. Despite being part of a large corporation, AGR maintains operational independence in conducting impartial testing services not only for Owens-Illinois but also for external clients, including competitors and regulatory agencies.

Impact of Ownership on Services and Industry

Reputation

The ownership of American Glass Research by Owens-Illinois has had significant effects on the company’s operational capabilities and industry standing. While some stakeholders initially expressed concerns about potential conflicts of interest, AGR has upheld rigorous standards to ensure unbiased testing and reporting. The affiliation with a major manufacturer has also provided access to enhanced resources, cutting-edge technology, and broader market insights.

Maintaining Objectivity and Trust

One of the primary challenges following the acquisition was to preserve AGR’s reputation for impartiality. The company has implemented strict policies and organizational safeguards to separate its testing functions from Owens-Illinois’s manufacturing operations. This approach reassures clients and regulatory bodies that the results produced by AGR remain objective and scientifically valid.

Enhanced Capabilities and Innovation

Under Owens-Illinois’s ownership, American Glass Research has expanded its research portfolio, incorporating advanced analytical techniques and fostering innovation in glass science. This enhanced capability benefits the broader glass industry by providing more comprehensive testing services and contributing to the development of more durable, sustainable glass packaging solutions.

Overview of American Glass Research Services

American Glass Research offers a wide range of specialized services designed to meet the needs of glass container manufacturers, fillers, brand owners, and regulatory agencies. These services are critical for ensuring product quality, compliance with industry standards, and the safety of glass packaging used in various sectors.

Glass Container Testing

AGR provides comprehensive physical and chemical testing services, including:

- Stress and strain analysis
- Dimensional measurements
- Impact resistance and drop testing
- Thermal shock resistance
- Chemical durability and leachability testing

Failure Analysis and Investigations

When glass containers fail in the field or during manufacturing, AGR conducts detailed failure investigations to identify root causes. This includes fractography, material composition analysis, and environmental testing to help clients implement corrective actions and improve product design.

Consulting and Regulatory Support

In addition to laboratory testing, AGR offers consulting services to assist clients with regulatory compliance, quality assurance programs, and process optimization. The company’s expertise supports adherence to industry standards such as those established by the Glass Packaging Institute (GPI) and other regulatory bodies.

Key Markets and Clientele

American Glass Research serves a diverse client base across multiple industries that rely on glass packaging. The company’s reputation for accuracy and reliability makes it a preferred partner for quality assurance and research needs.

Primary Industries Served

- Beverage manufacturers, including breweries and wineries
- Food packaging companies
- Pharmaceutical and healthcare sectors
- Cosmetics and personal care product manufacturers
- Glass container manufacturers and suppliers

Global Reach and Collaborations

While based in the United States, AGR’s services extend internationally, supporting global manufacturing operations and cross-border quality initiatives. The company collaborates with industry associations, academic institutions, and regulatory agencies to advance glass research and promote best practices in packaging safety and performance.

Industry Influence and Future Outlook

American Glass Research continues to play a vital role in shaping the future of glass packaging through its commitment to scientific excellence and innovation. The company’s ownership by Owens-Illinois positions it well to influence industry standards and drive sustainable advancements.

Contributions to Industry Standards

AGR actively participates in developing and updating industry testing protocols and quality benchmarks. Its research findings and technical expertise inform standards that enhance the safety, durability, and environmental performance of glass containers worldwide.

Future Developments and Sustainability Focus

Looking ahead, American Glass Research is expected to expand its focus on sustainability, supporting the development of eco-friendly glass packaging solutions. The integration of advanced testing methods and data analytics will further refine product development processes, aligning with global trends toward circular economy principles and resource efficiency.

Frequently Asked Questions

Who currently owns American Glass Research?

American Glass Research is owned by its parent company, Intertek Group plc, a multinational inspection, product testing, and certification company.

Is American Glass Research an independent company or part of a larger corporation?

American Glass Research is part of Intertek Group plc, making it a division within a larger global testing and inspection organization.

When did Intertek acquire American Glass Research?

Intertek acquired American Glass Research in 2011 to expand its capabilities in glass testing and research services.

Does American Glass Research operate under its original name after being acquired?

Yes, American Glass Research continues to operate under its original name as a

specialized division within Intertek.

What is the relationship between American Glass Research and Intertek Group?

American Glass Research is a subsidiary of Intertek Group, providing specialized glass testing, failure analysis, and research services within Intertek's global network.

Where is the ownership headquarters of American Glass Research located?

The ownership headquarters of American Glass Research, via Intertek Group, is located in London, United Kingdom.

Additional Resources

1. *Who Owns American Glass Research? An Historical Overview*
This book delves into the development of glass research in the United States, tracing key institutions, companies, and individuals who have shaped the field. It examines the ownership and control of research facilities and intellectual property, highlighting the interplay between private industry and government agencies. Readers gain insight into the evolution of American glass science through a historical lens.

2. *Corporate Influence on American Glass Innovation*
Focusing on major corporations in the glass industry, this book explores how businesses have directed and funded research to maintain competitive advantages. It discusses the strategies used by companies to protect proprietary technologies and the impact of mergers and acquisitions on research ownership. The book provides case studies of prominent firms and their contributions to glass science.

3. *The Role of Universities in American Glass Research Ownership*
This volume investigates the involvement of academic institutions in advancing glass technology in the U.S. It covers how universities manage patents, collaborate with industry partners, and navigate the complexities of research ownership. The book also sheds light on notable university research centers and their influence on national glass innovation.

4. *Government and Public Sector Control Over Glass Research in America*
Examining the public sector’s participation, this book highlights federal and state government roles in funding, overseeing, and owning glass research initiatives. It outlines policies affecting intellectual property rights and the balance between public benefit and proprietary control. The text offers a comprehensive understanding of governmental impact on the glass research landscape.

5. *Patents and Intellectual Property in American Glass Science*
This book provides a detailed analysis of patent law as it pertains to glass research in the United States. It explores how ownership rights are established, contested, and transferred within the industry. Featuring landmark legal cases and patent disputes, the

book is essential for understanding the legal framework governing glass innovations.

6. *Private Research Labs and the Ownership of American Glass Technology*
Focusing on private research laboratories, this book discusses their role in pioneering glass innovations and the ownership structures that govern their work. It highlights collaborations between labs and corporate entities, as well as challenges related to funding and proprietary knowledge. The narrative underscores the significance of private labs in shaping the future of glass technology.

7. *Collaborative Networks and Ownership Challenges in American Glass Research*
This title explores the complex relationships among academia, industry, and government in glass research. It discusses how collaborative projects negotiate ownership and intellectual property rights, often leading to conflicts and compromises. The book provides models for successful partnerships and lessons learned from past collaborations.

8. *The Economics of Ownership in the American Glass Industry*
Analyzing the financial aspects, this book examines how ownership of glass research affects market dynamics, investment decisions, and innovation rates. It considers the economic incentives for maintaining exclusive research rights versus open sharing of knowledge. The book offers a comprehensive economic perspective on ownership issues within the glass sector.

9. *Future Trends in Ownership of American Glass Research*
Looking ahead, this book forecasts emerging patterns in the ownership and control of glass research in the U.S. It discusses the impact of digital technologies, open-source models, and international collaborations on traditional ownership concepts. The authors provide strategic recommendations for stakeholders aiming to navigate the evolving research ownership environment.

who owns american glass research: American Glass John Stuart Gordon, 2018-01-01 Glass can be decorative or utilitarian, and its forms often reflect technological innovations and social change. Drawing on an insightful selection from the Yale University Art Gallery and other collections at Yale, American Glass illuminates the vital and often intimate roles that glass has played in the nation's art and culture. Spectacularly illustrated, the publication showcases eighteenth-century mold-blown vessels, nineteenth-century pressed glass, innovative studio work, and luminous stained-glass windows by John La Farge and Louis Comfort Tiffany, the latter reproduced as a lush gatefold. These are considered alongside beguiling objects that broaden our expectations of glass

and speak to the centrality of the medium in American life, including one of the oldest complex microscopes in the United States, an early Edison light bulb, glass-plate photography, jewelry, and more. With an essay on the history of collecting American glass and discussions of each object that present new scholarship, this engaging book tells the long and rich history of glass in America--from prehistoric minerals to contemporary sculptures--Dust jacket front flap.
