who is the vegan teacher s son: *Law and Veganism* Carlo Prisco, Jeanette Rowley, 2021-11-02 In our complex, consumerist societies, the intricacy of personal interactions and the number of goods and products available often prevents us from direct knowledge of what lies 'behind' food behaviors, ingredients, and the origins of the modern food and agriculture supply chain. Over the last decade or so, scholars, lawyers and engaged lay vegans have had many discussions about vegan rights and discrimination as issues intrinsic to animal rights, but the final frontier remains intact: the direct concerns of other animals. To give effect to the rights of animals, we must recognize and defend the human right—or duty, as many uphold—to care about them. Including contributors from Australia, the United States, Germany, Italy, France, Canada, Portugal, and the United Kingdom, this book explores the rights of vegans and how vegans can be protected from discrimination. Using an international socio-legal lens, the contributors discuss constitutional issues, vegan legal cases, the concept of protection for vegan 'belief' in human rights and equality law, the legal requirement to provide vegan food, animal agriculture and plant-based, vegan food in the context of the human right to food, and the rights of vegans in education and in health care. This book will be of interest to practicing lawyers, legal and critical legal scholars, scholars of vegan, and critical animal studies, and commentators on socio-political issues alike.

who is the vegan teacher s son: Wild Child Patrick Barkham, 2021-01-04 "Quiet but compelling arguments about the importance of kids getting out more and connecting to nature . . . A book that deserves to flourish." —The Guardian From climbing trees and making dens, to building sandcastles and pond-dipping, many of the activities we associate with a happy childhood take place outdoors. And yet, the reality for many contemporary children is very different. The studies tell us that we are raising a generation who are so alienated from nature that they can't identify the commonest birds or plants, they don't know where their food comes from, they are shuttled between home, school and the shops and spend very little time in green spaces—let alone roaming free. In this timely and personal book, celebrated nature writer Patrick Barkham draws on his own experience as a parent and a forest school volunteer to explore the relationship between children and nature. Unfolding over the course of a year of snowsuits, muddy wellies, and sunhats, Wild Child is both an intimate story of children finding their place in the natural world and a celebration of the delight we can all find in even modest patches of green. "Entrancing . . . If ever there was a book to fuel the ecological interest of future generations, this is it."—Isabella Tree, author of Wilding "Barkham takes us through a year giving his children an education in wildness. He encourages them that a physical relationship with wildlife is of the utmost importance . . . His memoir reveals the abundance of wildlife that can be explored in our own back gardens." —The Herald

who is the vegan teacher s son: Children's Vegetarian Culture in the Victorian Era Marzena Kubisz, 2024-09-18 This book fills a unique gap in the research on the cultural history of vegetarianism and veganism, children's literature and Victorian periodicals, and it is the first publication to systematically describe the phenomenon of Victorian children's vegetarianism and its representations in literature and culture. Situated in the broad socio-literary context spanning the late nineteenth century and early twentieth century, the book lays the groundwork for contemporary children's vegan literature and argues that present ethical and environmental concerns can be

traced back to the Victorian period. Following the current turn in contemporary research on children, their experience and their voices, the author examines children's vegetarian culture through the prism of the periodicals aimed directly at them. It analyses how vegetarian principles were communicated to children and listens to the voices of children who were vegetarians, and who tested their newly formed identity in the pages of three magazines published between 1893 and 1914: *The Daisy Basket*, *The Children's Garden* and *The Children's Realm*. This book will appeal to the growing body of researchers interested in the social, cultural and literary aspects of vegetarianism and veganism, human-animal relations, childhood studies, children's literature, periodical studies and Victorian studies.

Almost every day we are bombarded with the seemingly incontrovertible message that we must reduce our consumption of meat and dairy - or eliminate them from our diets altogether.
