women s business magazine: She's the Boss Debra Michals, 2025 In the years after World War II, as women were being pushed from wartime jobs for returning soldiers, government and business leaders--and women themselves--saw small business ownership as a viable economic solution. In just five years, US women owned nearly a million of the nation's businesses. In the decades since, women have moved increasingly into business ownership, often outpacing male start-ups so that today, they own more than fourteen million businesses, 40 percent of all US companies. She's the Boss chronicles the forces that made entrepreneurship attractive to women. In rich detail, Debra Michals shares the stories of the countless women of all races, ethnicities, genders, and abilities who contributed to this important history. The book also explores the intersection of women's personal choices within changing social, political, and economic factors, such as the rising divorce rates of the 1960s and 1970s, ongoing workplace and credit discrimination, civil and women's rights activism and activist entrepreneurs, the 1970s recession and 1980s Reagan Revolution, and more recently, the internet, crowd-funding, and social entrepreneurship.

women s business magazine: Gender, Media, and Organization Jannine Williams, Sharon Mavin, Valerie Stead, Carole Elliott, 2016-08-01 Gender, Media, and Organization: Challenging Mis(s)Representations of Women Leaders and Managers is the fourth volume in the Women and Leadership: Research, Theory, and Practice series. This cross-disciplinary series from the International Leadership Association draws from current research findings, development practices, pedagogy, and lived experience to deliver provocative thinking that enhances leadership knowledge and improves leadership development of women around the world. This volume addresses the lack of critical attention in leadership research to how women leaders and professionals are represented in the media. The volume acts as a companion piece to a Seminar Series, funded by the UK's Economic and Social Sciences Research Council (ESRC), to address this gap in the research. The lack of research interrogation of gendered media representations of women leaders and professionals is a surprising omission given the wealth of evidence from stakeholders outside academia revealing that women, and women leaders, continue to be underrepresented across all forms of media outlet. This volume contributes to social change, equality, and economic performance by raising consciousness about women's lack of representation in the media and challenges gendered mis(s)representations of women professionals and leaders in the media through the presentation of a range of empirical investigations and methodological approaches. The volume contributors use various theories and conceptualizations to problematize and analyze women's limited representation in the media, and the gendered representations of women professionals and leaders. Together, the volume's 14 chapters reflect the beginning of a rich, diverse, emergent strand of academic research that interrogates relationships between the media in its multiple forms and women's leadership. Illuminating the positioning of women leaders and professionals as both complex and problematic, these chapters offer an important agenda for management and organization scholars. They attest to the need to describe and make visible women's mis(s)representations in the media while drawing attention to the importance of situating these mis(s) representations in the broader social, economic, historical, cultural, and political context as a means to gain insight into their development and evolution. As a rich and diverse site of research, examination of the media calls for a broad methodological repertoire. The chapters in this book draw from multiple sources and include, among others, the development of thematic analysis to illuminate stereotypes, the use of critical discourse analysis to understand professional women's experience, a rhetorical analysis of the covers of Time magazine, and an interrogation of the power dynamics manifested in the media's practice of nicknaming women leaders. Gender, Media, and Organization is a first step in stimulating further research that poses critical questions concerning gendered and sexualized representations of women leaders in textual and visual forms, and considers the media's influence on gender equality and social justice. The chapters offer fruitful avenues for future research to continue the momentum of challenging gendered media representations of women leaders and professionals.

women s business magazine: The Evolution of English Language Learners in Japan Yoko Kobayashi, 2018-01-19 This book seeks a better understanding of the sociocultural and ideological factors that influence English study in Japan and study-abroad contexts such as university-bound high schools, female-dominant English classes at college, ESL schools in Canada, and private or university-affiliated ESL programs in Singapore and Malaysia. The discussion is based not only on data garnered from Japanese EFL learners and Japanese/overseas educators but also on official English language policies and commercial magazine discourses about English study for Japanese people. The book addresses seemingly incompatible themes that are either entrenched in or beyond Japan's EFL context such as: Japan's decades-long poorly-performing English education vs. its equally long-lived status as an economic power; Japanese English learners' preference for native

English speakers/norms in at-home Japanese EFL contexts vs. their friendship with other Asian students in western study-abroad contexts; Japanese female students' dream of using English to further their careers vs. Japanese working women's English study for self-enrichment; Japanese society's obsession with globalization through English study vs. the Japanese economy sustained by monolingual Japanese businessmen; Japanese business magazines' frequent cover issues on global business English study vs. Japanese working women's magazines' less frequent and markedly feminized discourses about English study.

women s business magazine: *Feminine Capital* Barbara Orser, Catherine Elliott, 2015-03-25
Today, there are over 200,000,000 women business owners around the world. Many of these entrepreneurs are not doing business as usual, nor are they simply leaning in. Rather, they are tapping into feminine capital—the unique skills and sensibilities that they have cultivated as women—to create enviable successes. Drawing on four decades of award-winning research, *Feminine Capital* reveals how women are harnessing different approaches to doing business. Barbara Orser and Catherine Elliott detail the pillars of feminine capital and offer new insight into the ways that gender can influence entrepreneurial decision-making. They find that leveraging feminine capital can help women to create distinctive brands, build new markets, and drive profits—all while leveling the playing field in business. In doing so, women are changing our social and economic landscape, one venture at a time. Dispelling myths and misperceptions that can undermine women-owned ventures, this book takes a fresh look at how female entrepreneurs can leverage their skills, knowledge, and values. Case studies of women entrepreneurs bring key concepts and lessons to life, while learning aids, diagnostic tools, and checklists help readers to construct innovative business models, refine start-up plans, and hone growth strategies.
