wolf in irish language: Irish Nationalists in Boston Damien Murray, 2018-03-16 During the first quarter of the twentieth century, the intersection of support for Irish freedom and the principles of Catholic social justice transformed Irish ethnicity in Boston. Prior to World War I, Boston's middle-class Irish nationalist leaders sought a rapprochement with local Yankees. However, the combined impact of the Easter 1916 Rising and the postwar campaign to free Ireland from British rule drove a wedge between leaders of the city's two main groups. Irish-American nationalists, emboldened by the visits of Irish leader Eamon de Valera, rejected both Yankees' support of a postwar Anglo-American alliance and the latter groups' portrayal of Irish nationalism as a form of Bolshevism. Instead, ably assisted by Catholic Church leaders such as Cardinal William O'Connell, Boston's Irish nationalists portrayed an independent Ireland as the greatest bulwark against the spread of socialism. As the movement's popularity spread locally, it attracted the support not only of Irish immigrants, but also that of native-born Americans of Irish descent, including businessman, left-leaning progressives, and veterans of the women's suffrage movement. For a brief period after World War I, Irish-American nationalism in Boston became a vehicle for the promotion of wider democratic reform. Though the movement was unable to survive the disagreements surrounding the Anglo-Irish Treaty of 1921, it had been a source of ethnic unity that enabled Boston's Irish community to negotiate the challenges of the postwar years including the anti-socialist Red Scare and the divisions caused by the Boston Police Strike in the fall of 1919. Furthermore, Boston's Irish nationalists drew heavily on Catholic Church teachings such that Irish ethnicity came to be more clearly identified with the advocacy of both cultural pluralism and the rights of immigrant and working families in Boston and America.

wolf in irish language: Anthropocene Poetry Yvonne Reddick, 2023-11-03 Anthropocene Poetry: Place, Environment and Planet argues that the idea of the Anthropocene is inspiring new possibilities for poetry. It can also change the way we read and interpret poems. If environmental poetry was once viewed as linked to place, this book shows how poets are now grappling with

environmental issues from the local to the planetary: climate change and the extinction crisis, nuclear weapons and waste, plastic pollution and the petroleum industry. This book intervenes in debates about culture and science, traditional poetic form and experimental ecopoetics, to show how poets are collaborating with environmental scientists and joining environmental activist movements to respond to this time of crisis. From the canonical work of Ted Hughes and Seamus Heaney, to award-winning poets Alice Oswald, Pascale Petit, Kei Miller, and Karen McCarthy Woolf, this book explores major figures from the past alongside acclaimed contemporary voices. It reveals Seamus Heaney's support for conservation causes and Ted Hughes's astonishingly forward-thinking research on climate change; it discusses how Pascale Petit has given poetry to Extinction Rebellion and how Karen McCarthy Woolf set sail with scientists to write about plastic pollution. This book deploys research on five poetry archives in the UK, USA and Ireland, and the author's insider insights into the commissioning processes and collaborative methods that shaped important contemporary poetry publications. Anthropocene Poetry finds that environmental poetry is flourishing in the face of ecological devastation. Such poetry speaks of the anxieties and dilemmas of our age, and searches for paths towards resilience and resistance.

wolf in irish language: Irish Orientalism Joseph Lennon, 2004-05-01 Centuries before W. B. Yeats wove Indian, Japanese, and Irish forms together in his poetry and plays, Irish writers found kinships in Asian and West Asian cultures. This book maps the unacknowledged discourse of Irish Orientalism within Ireland's complex colonial heritage.

wolf in irish language: Fosterage in Medieval Ireland Thomas O'Donnell, 2025-10-01 Fosterage was a central feature of medieval Irish society, yet the widespread practice of sending children to another family to be cared for until they reached adulthood is a surprisingly neglected topic. Where it has been discussed, fosterage is usually conceptualised and treated as a purely legal institution. This work seeks to outline the emotional impact of growing up within another family. What emerges is a complex picture of deeply felt emotional ties binding the foster family together. These emotions are unique to the social practice of fosterage, and we see the language and feelings originating within the foster family being used to describe other relationships such as those in the monastery or between humans and animals. This book argues that the more we understand how people felt in fosterage, the more we understand medieval Ireland.

wolf in irish language: The Age Factor and Early Language Learning Marianne Nikolov, 2009-10-28 This edited volume documents the state of the art in research into how the age factor interacts with other factors in a variety of educational contexts. The book comprises 17 chapters examining early language learning and teaching in a range of countries in Europe, Asia and North America. Authors discuss main themes in research methodology, curricular and assessment issues, short- and long-term outcomes, the role of individual differences, innovation in teacher education, classroom processes, as well as the impact of the target language. The first two chapters (Nikolov; Edelenbos and Kubanek) overview the main trends in research. Four papers (Curtain; Ofra Inbar-Lourie and Elana Shohamy; Jalkannen; Haenni Hoti, Heinzmann, and Müller) focus on the assessment of young learners; two authors examine how age impacts on language learning over time (Muñoz; Kasai). Individual differences (motivation, anxiety, aptitude, and socio-economic status) are explored by Mihaljević Djigunović, Mattheoudakis and Alexiou, and Kiss. Innovation is the common theme in chapters written by Wang, Moon, and Peng and Zhang. The last three papers analyze the status of languages (Harris, Enever, Carmel). The book is a must have for teacher educators of pre- and in-service teachers of modern languages to young learners, MA and PhD students in TEFL/TESOL and other languages, researchers and policy makers.
