Importance of Women in Economics Symposium

Women in economics symposiums play a crucial role in addressing the underrepresentation of women in the economics profession. Despite progress over the years, women continue to face barriers in career advancement, research opportunities, and leadership roles within economics. These symposiums provide a dedicated forum to recognize women's achievements, share research findings, and foster networking opportunities. Moreover, they help raise awareness about systemic issues such as gender bias, pay gaps, and work-life balance challenges that disproportionately affect women economists.

Promoting Gender Diversity and Inclusion

One of the primary objectives of the women in economics symposium is to promote gender diversity and

inclusion within academic and policy institutions. By showcasing female role models and successful economists, the symposium encourages more women to pursue careers in economics and remain engaged in the field. It also contributes to creating an inclusive environment where diverse viewpoints are valued and integrated into economic research and policymaking.

Encouraging Research and Collaboration

The symposium encourages collaborative research projects and interdisciplinary approaches that include gender perspectives. It offers a platform for presenting cutting-edge research that addresses gender-related economic issues and supports the professional development of early-career female economists through mentorship and peer support.

Key Themes and Topics Discussed

Women in economics symposiums cover a wide range of topics relevant to both gender issues and broader economic research. These themes often reflect contemporary challenges in the profession as well as emerging areas of study.

Gender Wage Gap and Labor Market Inequality

A significant portion of symposium discussions focuses on the persistent gender wage gap and labor market inequalities. Researchers present empirical studies analyzing factors contributing to wage disparities, including discrimination, occupational segregation, and differences in work experience.

Economic Policy and Gender Impact

Another key theme involves the evaluation of economic policies through a gender lens. Sessions explore how fiscal, monetary, and social policies affect women differently and propose strategies to ensure equitable policy outcomes.

Work-Life Balance and Career Progression

Symposiums frequently address challenges related to work-life balance, caregiving responsibilities, and their impact on women's career trajectories in economics. Discussions often include strategies for institutions to support female economists in overcoming these obstacles.

Diversity in Economic Research Methods

The inclusion of diverse methodologies, including qualitative approaches and gender-sensitive data collection, is also a prominent topic. This encourages more comprehensive and nuanced economic analyses that better capture women's experiences.

Impact on Participants and the Economics Community

The women in economics symposium has a measurable impact on both individual participants and the wider economics community. It serves as a catalyst for change by empowering women economists and informing institutional reforms.

Networking and Mentorship Opportunities

One of the most valuable aspects of the symposium is the opportunity it provides for networking and mentorship. Attendees can connect with established economists, gain career advice, and build professional relationships that support long-term success.

Raising Awareness and Inspiring Change

By highlighting gender disparities and sharing success stories, the symposium raises awareness among policymakers, academic leaders, and students. This increased visibility helps drive initiatives aimed at reducing barriers for women in economics.

Encouraging Policy and Institutional Reforms

The symposium often results in recommendations that institutions implement to improve gender equity. These reforms may include bias training, transparent hiring and promotion practices, and family-friendly workplace policies.

Challenges Addressed During the Symposium

Despite progress, women economists continue to face numerous challenges that the symposium seeks to address through focused dialogue and action plans.

Gender Bias and Stereotypes

The persistence of implicit and explicit gender bias in hiring, publishing, and peer review processes is a critical challenge. Symposium sessions explore strategies to identify and mitigate these biases to create a more equitable professional environment.

Underrepresentation in Leadership Roles

Women remain underrepresented in senior academic and policy positions within economics. The symposium discusses barriers to leadership and promotes initiatives to increase female representation in decision-making roles.

Balancing Professional and Personal Responsibilities

Many women economists face difficulties balancing family responsibilities with demanding careers. The symposium highlights institutional policies that can support flexible working arrangements and parental leave to alleviate these pressures.

Notable Initiatives and Programs

Several initiatives and programs have emerged from women in economics symposiums, aimed at supporting female economists at different career stages.

Mentorship and Sponsorship Programs

Many symposiums facilitate mentorship programs pairing early-career women with experienced economists who provide guidance, career advice, and advocacy.

Research Grants and Fellowships

Specialized grants and fellowships targeted at women economists help fund research projects and encourage participation in high-impact studies.

Workshops and Training Sessions

Workshops focusing on skill development, such as academic writing, public speaking, and leadership training, are commonly offered to equip women with tools for professional advancement.

Networking Events

Structured networking events during the symposium foster connections that lead to collaborations, job opportunities, and peer support networks.

Future Directions for Women in Economics Symposium

Looking ahead, women in economics symposiums are expected to expand their scope and influence, continuing to address emerging issues and promote inclusivity in the economics profession.

Increasing Global Participation

Efforts are underway to increase participation from women economists worldwide, particularly from underrepresented regions, to foster a truly global dialogue and exchange of ideas.

Integrating Intersectionality

Future symposiums aim to incorporate an intersectional approach that considers race, ethnicity, socioeconomic status, and other factors alongside gender to address complex inequalities.

Leveraging Technology and Virtual Platforms

The use of virtual symposium formats and digital platforms is expected to enhance accessibility, allowing more women to participate regardless of geographical or financial constraints.

Strengthening Policy Influence

Women in economics symposiums will continue to strengthen their role in influencing economic policy by producing actionable research and engaging with policymakers to promote gender-inclusive economic strategies.

- Promote global inclusivity and diverse participation
- Enhance mentorship and professional development programs
- Advocate for institutional reforms and equitable policies

- Expand research on gender and economics intersectionality
- Utilize technology to broaden reach and engagement

women in economics symposium: Economic Woman Frances Raday, 2019-05-14 The author introduces the concept of economic woman and makes her visible in duality with and opposition to the exclusive model of economic man. Economic man has epitomized neo-liberal capitalism, which embraces competition and maximization of profit, resulting in a steep increase in economic inequality. The book demonstrates that women's inequality is a crucial factor in economic inequality, which cannot be fully understood without relating to women's situation, and that economic woman cannot thrive in the conditions of economic inequality created under global neo-liberalism. Emphasising the international human rights guarantees of women's right to equality in all fields of life, the author documents woman's increased participation in political, public, financial and corporate institutions, employment and entrepreneurship, with some women reaching high profile positions. Nevertheless, using global data, she reveals that economic woman lags behind, with a severe economic power deficit, an unfulfilled promise of equal employment opportunity, a gendered impact of poverty and barriers to gender equality in the family. The book analyses the trap of women's increased burden of breadwinning in the context of discriminatory laws and practices, infrastructural failures and policy gaps, which preempt achievement of gender equality in economic life. The book is intended for the general reader, academics, students, policy makers and NGOs. It shows economic woman at a global crossroads between a universal paradigm of gender equality and pervasive barriers to equal economic opportunity. The author demonstrates that tackling gender inequality, restoring welfare priorities and reducing economic inequality are inextricably linked. Human rights and governments have a vital role to play in addressing them all, to create a sustainable economic infrastructure for the lives of women and men.

women in economics symposium: Women's Work and Wages Christina Jonung, Inga Persson, 2002-09-11 At a time when women in industrialized countries have a stronger and more permanent presence in the labour market than ever before, why does the gender pay gap differ so greatly between countries? The contributors to this book use empirical studies of gender differences in family responsibilities and time allocation to demonstrate how such differences affect women's wages and analyse pay structures and wage mobility throughout Europe.

women in economics symposium: Women Philosophers on Economics, Technology, Environment, and Gender History Ruth Edith Hagengruber, 2023-08-21 In times of current crisis, the voices of women are needed more than ever. The accumulation of war and environmental catastrophes teaches us that exploitation of people and nature through violent appropriation and enrichment for the sake of short-term self-interest exacts its price. This book presents contributions on the currently most relevant and most urgent issues: reshaping the economy, environmental problems, technology and the re-reading of history from the non-western and western tradition. With an outlook into the problems of class, race and gender in its intersectional framing, the collection offers a unique overview of current research in these fields and contributes to the renewal and contemporary presentation of feminist thought from partly concrete perspectives with regard to factual issues.

women in economics symposium: Women's Social and Legal Issues in African Current Affairs Victoria M. Time, 2016-12-06 This volume explores the difficulties that beset African women and inhibit them from excelling in many walks of life in the twenty-first century. Asymmetrical relations in society position women in subjugated and marginalized roles. This is caused by customary practices that have left women in vulnerable and subsidiary positions, as well as statutory provisions that fester this process. Despite its richness in raw materials and minerals, Africa remains slow to

grow when compared to other continents. The economies of most African countries is severely anemic: corruption is rife, poor governance is systemic, and wars, conflicts, famine and diseases abound. Stalled economies disproportionately affects women; for example, as nurturers, women have the extra responsibility of taking care of children and members of the extended family. In times of want, women are more likely to give up the little they have so that their children and others may survive. This book shows the various social and legal obstacles that stall women's upward mobility and offers recommendations on how these issues can be resolved.

women in economics symposium: Socioeconomic Empowerment Of Women Dimensions And Strategies Prof. Dr. Srigouri Kosuri, 2025-01-06 "Socioeconomic Empowerment of Women: Dimensions and Strategies" is a detailed and insightful work that addresses the broad spectrum of issues impacting the empowerment of women in India. The book examines how women, traditionally marginalised in many aspects of Indian society, can overcome barriers and create opportunities for themselves and their communities. In India, socioeconomic empowerment involves complex interactions of various social and cultural elements. The book begins with a detailed discussion of empowerment, its historical evolution, and why it remains a critical need in the Indian context. By focusing on the multiple dimensions of empowerment, the book highlights the importance of fostering a sense of autonomy and self-determination among women across rural and urban settings. The book emphasises the crucial role of education, vocational training, and digital literacy in equipping women with skills that can break the cycle of poverty. It discusses how financial inclusion, access to resources, and entrepreneurial ventures play an essential role in empowering women economically. Moreover, the book outlines the vital role of health and social support systems in enhancing women's overall well-being. The book also explores the legal framework surrounding women's rights and gender equality, addressing barriers such as gender-based violence and lack of access to justice. Finally, it looks at the key initiatives from the government, NGOs, and global collaborations that continue to work toward improving the socioeconomic status of women in India. With its multidimensional approach, this book offers strategies and insights necessary for creating an equitable society.

women in economics symposium: Women's Sport in Africa John Bale, Michelle Sikes, 2016-04-14 In recent decades Africa has emerged as a sporting giant. The African sporting phenomenon has been addressed in the popular press and it has also attracted scholarly interest; however, this interest is almost entirely focussed on men. Yet women's participation in recreational and elite sport is worthy of exploration and research. This path-breaking collection of essays provides an introduction to a variety of dimensions of women's participation in African sports. Several key concepts are addressed in the book: women and media, women and sport-migration, sport and empowerment, sporting and social development, women's sport and postcolonial Africa, and professional sport and economic development. This collection, authored by established scholars, will attract readership from students from Sports Studies to African Studies and from undergraduate students to university teachers. This book was published as a special issue of Sport in Society.

women in economics symposium: Scandalous Economics Aida A. Hozic, Jacqui True, 2016-03-10 Of all of the lies, fragile alliances, and predatory financial dealings that have been revealed in the wake of the Global Financial Crisis of 2008, we have yet to come to terms with the ways in which structural inequalities around gender and race factor into (and indeed make possible) the current economic order. Scandalous Economics is about silences - the astonishing neglect of gender and race in explanations of the Global Financial Crisis. But, it is also about noises - the sexual scandals and gendered austerity policies that have relegated public debate, and the crisis itself, into political oblivion. While feminist economists and movements such as Occupy Wall Street have pointed to the distributional inequalities that are an effect of financial deregulation, scholars haven't really grappled with the representational inequalities inherent in the way we view the politics of the market. For example, capitalism won't be made more equitable simply by appointing women to leadership positions within financial firms or corporations. And the next crisis will not be averted if our understandings of gendered inequalities are framed by sexual scandals in media and

popular culture. We need to look at the activities and the privileges of the advantaged - the TED women of the crisis -- as much as the victimization of the disadvantaged - to fully grasp the interplay between gender and economy in this fragile age of restoration. Scandalous Economics breaks new ground by doing precisely this. It argues that normalization of the post-GFC economic order in the face of its obvious breakdown(s) has been facilitated by co-optation of feminist and queer perspectives into national and international responses to the crisis. Scandalous Economics builds upon the Occupy movement and other critical analysis of the GFC to comprehensively examine gendered material, ideational and representational dimensions that have served to make the crisis and its effects, 'the new normal' in Europe and America as well as Latin America and Asia.

women in economics symposium: China in India's Neighbourhood Anita Sengupta, Priya Singh, 2024-04-30 This book explores the scope and extent of the growing Chinese influence in India's neighbourhood and its impact on India as well as on Asian power politics. Through theoretical narratives and detailed case studies, it examines Chinese bilateral relationships in the Indian neighbourhood and looks at the extent and significance of Chinese influence through the lens of strategic, economic and infrastructural arrangements and Chinese interventions in South, Southeast, and Central Asia. The book takes into account regional voices and domestic political compulsions in understanding what they make of the Chinese narrative and examines how and whether the narrative has changed in recent years through the Belt and Road Initiative (BRI) as an instrument of Chinese public diplomacy. The volume also discusses how domestic narratives and compulsions in the Indian neighbourhood remain significant and how these, in turn, would impact the trajectory of Chinese public diplomacy. Intertwined through all these themes is a focus on the extent to which these could become potential flashpoints for India. This book will be a useful resource for academics and researchers working on Asian geopolitics and geo-economics, Chinese foreign policy, Chinese politics, international relations of Asia, Asian dynamics and Asian studies.

women in economics symposium: Encyclopedia of Lesbian and Gay Histories and Cultures George Haggerty, Bonnie Zimmerman, 2003-09-02 Beginning in 1869, when the study of homosexuality can be said to have begun with the establishment of sexology, this Encyclopedia offers accounts of the most important international developments in an area that now occupies a critical place in many fields of academic endeavours. While gays and lesbians have shared many aspects of life, their histories and cultures developed in profoundly different ways. To reflect this crucial fact, the Encyclopedia has been prepared in two separate volumes assuring that both histories receive full, unbiased attention and that a broad range of human experience is covered. Written by some of the most famous names in the field, as well as new researchers this is intended as a reference for students and scholars in all areas of study, as well as the general public.

women in economics symposium: Encyclopedia of Lesbian Histories and Cultures Bonnie Zimmerman, 2013-08-21 A rich heritage that needs to be documented Beginning in 1869, when the study of homosexuality can be said to have begun with the establishment of sexology, this encyclopedia offers accounts of the most important international developments in an area that now occupies a critical place in many fields of academic endeavours. It covers a long history and a dynamic and ever changing present, while opening up the academic profession to new scholarship and new ways of thinking. A groundbreaking new approach While gays and lesbians have shared many aspects of life, their histories and cultures developed in profoundly different ways. To reflect this crucial fact, the encyclopedia has been prepared in two separate volumes assuring that both histories receive full, unbiased attention and that a broad range of human experience is covered.

Written for and by a wide range of people Intended as a reference for students and scholars in all fields, as well as for the general public, the encyclopedia is written in user-friendly language. At the same time it maintains a high level of scholarship that incorporates both passion and objectivity. It is written by some of the most famous names in the field, as well as new scholars, whose research continues to advance gender studies into the future.

women in economics symposium: A History of Feminist and Gender Economics

Giandomenica Becchio, 2019-10-30 This book offers a historical exploration of the genesis of feminist economics and gender economics, as well as their theoretical and methodological differences. Its narrative also serves to embed both within a broader cultural context. Although both feminist economics and gender neoclassical economics belong to the cultural process related to the central role of the political economy in promoting women's emancipation and empowerment, they differ in many aspects. Feminist economics, mainly influenced by women's studies and feminism, rejected neoclassical economics, while gender neoclassical economics, mainly influenced by home economics and the new home economics, adopted the neoclassical economics' approach to gender issues. The book includes diverse case studies, which also highlight the continuity between the story of women's emancipation and the more recent developments of feminist and gender studies. This volume will be of great interest to researchers and academia in the fields of feminist economics, gender studies, and the history of economic thought.

women in economics symposium: Central Banking, Monetary Policy and Gender

Louis-Philippe Rochon, Sylvio Kappes, Guillaume Vallet, 2024-05-02 Central Banking, Monetary Policy and Gender uniquely explores the ways in which monetary policies, changes in interest rates and unconventional monetary strategies such as quantitative easing affect women. This groundbreaking book analyses the inner organisation of central banks, considering for the first time how banking transmission mechanisms operate in relation to gender, investigating issues of power, income, wealth inequality and labour market dynamics.

women in economics symposium: Fifty Major Economists Steven Pressman, 2013-08-22 An introduction to the life, work and ideas of the people who have shaped the economic landscape from the sixteenth century to the present day. Now in a third edition, it considers how major economists might have viewed challenges such as the continuing economic slump, high unemployment and the sovereign debt problems which face the world today, it includes entries on: • Paul Krugman • Hyman Minsky • John Maynard Keynes • Adam Smith • Irving Fisher • James Buchanan **Fifty Major Economists** contains brief biographical information on each featured economist and an explanation of their major contributions to economics, along with simple illustrations of their ideas. With reference to the recent work of living economists, guides to the best of recent scholarship and a glossary of terms, **Fifty Major Economists** is an ideal resource for students of economics. Steven Pressman is Professor of Economics and Finance at Monmouth University. He has published around 120 articles in refereed journals and as book chapters, and has authored, or edited 13 books, including *Women in the Age of Economic Transformation*, *Economics and Its Discontents*, *Alternative Theories of the State*, and *Leading Contemporary Economists*.

women in economics symposium: Growth-oriented Women Entrepreneurs and Their Businesses C. G. Brush, Candida G. Brush, 2006-01-01 The female entrepreneurship researchers community has to thank these women for their brilliant work in reviewing, revising and selecting the best papers from the second Diana International Conference that were finally edited for this volume. . . the book is a good compendium of female entrepreneurship circumstances in different countries that focuses specifically on the explanation as to why gender plays a role in the number of ventures started by women and why they are in general smaller and less growth-oriented. Manuela Pardo-del-Val, *International Entrepreneurship and Management Journal* . . . this edited text draws upon a range of international contributors to present a comparative overview of challenges facing female entrepreneurs seeking to grow their firms. . . this is an interesting book that makes a welcome contribution to contemporary debate. Susan Marlow, *International Small Business Journal*

The data and information presented in this work will be of particular interest to students and scholars of entrepreneurship or labor and women's studies. Recommended. General readers; upper-division undergraduate through professional collections. E.P. Hoffman, *Choice* Enterprising new firms drive economic growth, and women around the world are important contributors to that growth. As entrepreneurs, they seize opportunities, develop and deliver new goods and services and, in the process, create wealth for themselves, their families, communities, and countries. This volume explores the role women entrepreneurs play in this economic progress, highlighting the challenges they encounter in launching and growing their businesses, and providing detailed studies of how their experiences vary from country to country. Statistics show that businesses owned by women tend to remain smaller than those owned by men, whether measured by the number of employees or by the size of revenues. Because women-led firms fail to grow as robustly, the opportunities to innovate and expand are limited, as are the rewards. Based on recent studies that examine the links between entrepreneurial supply and demand issues, this volume provides insights into how women around the world are addressing the challenges of entrepreneurial growth. The first set of chapters consists of country overviews and provides discussions of the state of women growing businesses. The second set of chapters describes research projects under way in different countries and explores more focused topics under the umbrella of women business owners and business growth. The volume concludes with an agenda and projects for future research. Academics and policymakers will gain a greater understanding of women's entrepreneurial behaviors and outcomes through this path-breaking volume. Those who support women through education and training, policymaking, or providing entrepreneurial resources will also find the volume of great practical interest.

women in economics symposium: *The Rejuvenation of Political Economy* Nobuharu Yokokawa, Kiichiro Yagi, Hiroyasu Uemura, Richard Westra, 2016-04-14 This book provides the basic knowledge of Japanese contributions in political economy and the ongoing research agenda, such as the pursuit of theoretical consistency in Marxian economics by Uno School; the concept of 'civil society' as a criterion of existing socio-economic structure; a mathematical reconstruction of Marxian theory; and an analysis of environmental pollution. The new generation of Japanese political economists in collaboration with their overseas counterparts has produced new insights into political economy and into the newly emerging structure of the world economy. The book provides useful insights into international capitalism and how past patterns of uneven development are now changing; the role of international finance in affecting both national and international growth and employment patterns; an analysis of recent growth patterns in Asia; and the specific issue emerging within the Asian region and the implications for economics, social change and geopolitics.
