**women s history month 2024 ideas: The Routledge Handbook of Field Research** Daniel Hammett, Naomi Holmes, 2025-07-28 The Routledge Handbook of Field Research presents a comprehensive, go-to resource for staff and students in preparing for and thinking about the doing of field research, including both individual fieldwork and group field classes. Framed by rapidly evolving debates relating to environmental and social justice, decolonialism, the climate crisis, and post-truth society, as well as taking into account ethical, health and safety, and other practical considerations, researchers are faced with a complex and evolving set of factors when making decisions. Working from foundational questions relating to the need for and importance of field research, of where the 'field' is, through logistical and practical concerns, to complex debates around equality and diversity, power relations, sustainability and ethical conundrums, this book is not a simple, formulaic 'how to' guide. Instead, the handbook offers a more critical and reflective approach – acting more as a 'how to start to think critically about' text. In providing a comprehensive and cutting-edge overview of key debates and considerations in the planning, doing, and wrapping up of field research, the handbook shares examples and reflections from experienced field researchers and field class leaders as well as scenarios, debates, and critical questions to help guide field researchers through their research journey. While there is a rapidly expanding array of books on research methods and epistemologies, this handbook offers a unique contribution that addresses distinct gaps in the current literature. Through a strong emphasis on field class and group-based field research, this handbook offers a unique resource to support field class leaders in thinking through the design and doing of field classes, and adopts a pedagogical approach in 'asking difficult questions' of the reader rather than offering 'the answer'. In so doing, we promote a deeper, reflective engagement with the complexities of the research journey. The Routledge Handbook of Field Research includes contributions from over 50 leading authors, culminating in an essential resource for both experienced field researchers and field class leaders as well as newcomers to lone and group-based field research.

**women s history month 2024 ideas: Teaching Women's History** Kelsie Brook Eckert,

2024-07-04 Teaching Women's History: Breaking Barriers and Undoing Male Centrism in K-12 Social Studies challenges and guides K-12 history teachers to incorporate comprehensive and diverse women's history into every region and era of their history curriculum. Providing a wealth of practical examples, ideas, and lesson plans – all backed by scholarly research – for secondary and middle school classes, this book demonstrates how teachers can weave women's history into their curriculum today. It breaks down how history is taught currently, how teachers are prepared, and what expectations are set in state standards and textbooks and then shows how teachers can use pedagogical approaches to better incorporate women's voices into each of these realms. Each chapter explores a major barrier to teaching an inclusive history and how to overcome it, and every chapter ends with an inquiry-based lesson plan on women or using women's sources which stands counter to the way curriculum is traditionally taught, a case in point that tasks readers to realize how women have been integral to every period of history. With expert guidance from an award-winning social studies teacher, this guidebook will be important reading for middle and high school history educators. It will also be beneficial to preservice teachers, particularly within Social Studies Education and Gender Studies. **women s history month 2024 ideas: AI for Community** Iran Davar Ardalan, Amir Banifatemi, Fernando Gonzalez, Myles Ingram, Reza Moradinezhad, Lucretia Williams, 2025-06-16 AI for Community explores the transformative potential of technology to bridge cultural divides and responsibly preserve cultural heritage, while thoughtfully considering how to ensure fairness without any ideological or cultural bias. It acknowledges the need for careful scrutiny of traditions so that artificial intelligence (AI) systems can promote comprehensive cultural understanding. This approach underscores the promise of AI as a tool for human flourishing. Authored by a multigenerational, multicultural team, this book presents real-world examples and ethical insights that are timely, actionable, and deeply human-centered. It introduces pioneering projects like the Indigenous Knowledge Graph, which documented ancestral wisdom; Howard University's Project Elevate Black Voices, funded by Google, which enhanced speech recognition for African American Vernacular English (AAVE); and Laleh AI, which posthumously preserves the insights of a progressive female Islamic thinker. Also, initiatives like UNESCO's work on cultural heritage preservation and NVIDIA's collaboration with Te Hiku Media to safeguard the Māori language showcase AI's vital role in reviving endangered languages. This book interweaves Community Voices sections between chapters, featuring interviews that explore the role and implementation of AI in new arenas. Each chapter is also supported by online resources, accessible as podcasts, videos, and articles, that provide multimedia ways to deepen understanding of culturally aware AI. AI for Community highlights how community-driven language preservation, storytelling, and inclusive design can empower cultures and protect their heritage. This book is a vital resource for those seeking to create AI that respects and uplifts communities.

**women s history month 2024 ideas: 200 Themes for Devising Theatre with 11-18 Year Olds** Jason Hanlan, 2024-02-22 Shortlisted for Outstanding Drama Education Resource at the 2025 Music & Drama Education Awards A unique resource for drama teachers providing 200 stimuli and age-appropriate individual topics within those to help inspire and guide young people in devising performance. It contains useful information on devising techniques, workshops, schemes and lesson ideas for introducing devising and guidance on how to analyse the work and give feedback. Following on from his successful book *200 Plays for GCSE and A-Level Performance*, author Jason Hanlan has once again solved one of drama teachers' most frequently encountered problems: how to unlock the best devised performance with their students. Devising as a group requires a level of collaboration, which - without a strong framework - often descends into wild flights of fancy and a myriad of dead ends. Excellent ideas can be lost or diluted in an often-awkward attempt to tie it all together to fit a narrative. The main body of this book is a unique numbered listing of 200 stimuli, designed to both inspire and focus the mind, with an example of a possible topic and 'ways in' that would be suitable for each level: Civil rights Each stimuli is given its own page dedicated to

exploring its possibilities as a piece of devised theatre for different age groups, and offering suggestions for plays, films and books to look at; artefacts and images to examine; ideas to consider; and further research you can draw on.

**women s history month 2024 ideas: Illinois Register** , 1987

**women s history month 2024 ideas: *Women of Ideas*** Dale Spender, 2024-11-20 Originally published in 1982, with characteristic energy, humour and learning Dale Spender traces three hundred years of women's ideas. She uncovers not only the ways and words of women, but the methods of men. While men control knowledge, she argues, they are in a position to take women's ideas. If they like them, they use them; if they don't, they lose them. Every fifty years women are required to reinvent the wheel, for every generation of women is initiated into a world in which women's traditions have been denied and buried. Providing convincing evidence that women's absence from the record as creative intellectual beings is not women's fault, but men's, Dale Spender claims at least 150 women from the past and suggests how such erasure can be avoided in the future. Given that men take what they want from women's ideas, Dale Spender advocates that women withdraw their labour, that they go on a knowledge strike, for if women cannot control the knowledge they produce, at least they can ensure that it cannot be used as evidence against them. Exposing the inadequacies of much modern (male) scholarship, the author provides the readers with the opportunity to share in her own discoveries, excitement, and 'mistakes' in the process of researching and writing this book. The result is that *Women of Ideas: And What Men Have Done to Them* is an ambitious and provocative book which will be used as a reference for many years to come, and which is also, from beginning to end, a stimulating read.

**women s history month 2024 ideas: The Many Stories of Our Beloved Community** Rukia Monique Rogers, 2024-03-19 Envision love, equity, and community in early childhood education. Join author Rukia Monique Rogers for an intimate and inspiring look at the values, practices, and relationships of the Highlander School in Atlanta, Georgia, rooted in the vision of the beloved community as espoused by Reverend Dr. Martin Luther King Jr. Sharing abundant stories from the school, the book is an invitation to reflect on your own practices and to reimagine early childhood programs, believing in the full human potential for care, love, and justice and nurturing our connections with the Earth and each other, with children as our co-conspirators. We hope you will walk beside us in this important journey.

**women s history month 2024 ideas: Seeing Like a Rover** Janet Vertesi, 2015-04-22 In the years since the Mars Exploration Rover Spirit and Opportunity first began transmitting images from the surface of Mars, we have become familiar with the harsh, rocky, rusty-red Martian landscape. But those images are much less straightforward than they may seem to a layperson: each one is the result of a complicated set of decisions and processes involving the large team behind the Rovers. With *Seeing Like a Rover*, Janet Vertesi takes us behind the scenes to reveal the work that goes into

creating our knowledge of Mars. Every photograph that the Rovers take, she shows, must be processed, manipulated, and interpreted—and all that comes after team members negotiate with each other about what they should even be taking photographs of in the first place. Vertesi's account of the inspiringly successful Rover project reveals science in action, a world where digital processing uncovers scientific truths, where images are used to craft consensus, and where team members develop an uncanny intimacy with the sensory apparatus of a robot that is millions of miles away. Ultimately, Vertesi shows, every image taken by the Mars Rovers is not merely a picture of Mars—it's a portrait of the whole Rover team, as well.
