women s history month books: *Women's History Month* Canada. Status of Women Canada, 1992

women s history month books: *Women's Writes 2018* Robin Buckallew, 2019-04-22 Originally begun as a project for Women's History Month, these stories are now being published as a collection. Short stories, plays, poems, and essays make up this month long work, one entry for every day of the month. This is the beginning of a challenge to write for women, about women, by a woman. The author has extensive history both with being a woman and with writing women, and shares her own journey with you, and brings along some old friends both real and imaginary. A woman who is a fish, worshipping a fish god? Check. A woman who leads a battle between penguins and kangaroos? Check. A woman who plays Jacob Marley to her best friend's Scrooge? Check. All these, and many more, are present. Don't miss roll call.

women s history month books: *Domestic Extremist* Peachy Keenan, 2023-06-06 Spot-on, often satirical, always insightful, contributing editor of *The American Mind* and mother of a brood, Peachy Keenan argues that the only way we can save our families, ourselves, and the world—even California!—is by embracing our inner domestic extremists, and sweeping failed notions of third wave feminism and identity politics nonsense into the garbage can of history. In *This House We Believe Parents Are the Bosses of Their Kids Babies Are Good, More Babies Are Better Two Sexes Are Plenty Your Career Is Overrated Feminism Is How the Unpopular and Undateable Cope with Life Mainstream American Culture Destroys Families We Are Going to Win* We're in a culture war, and Peachy Keenan is not taking prisoners. This raucous new book is her rallying cry for normal people stuck in the foxholes and appalled by the status quo. Mothers and fathers, regular American families, men and women, can win this battle together. But a lot of ground has been lost. For decades, we stood around and watched as feminists and progressives steamrolled through our institutions— those formerly robust, now comically inept, pillars of civilization like our government, our schools, and, crucially, our families. With matchless insight and devastating humor, Peachy Keenan makes the case for domestic extremism—turning away from the diseased offerings of the elites, the media, Hollywood, your child's school, and Big Tech, and embracing a more human way of life. The life-changing magic of domestic extremism will spark joy and help you build a legacy that will enrich the lives of your (many) descendants.

women s history month books: The Book of Gutsy Women Hillary Rodham Clinton, Chelsea Clinton, 2019-10-01 Now an eight-part docuseries on Apple TV+ Hillary Rodham Clinton and her daughter, Chelsea, share the stories of the gutsy women who have inspired them—women with the courage to stand up to the status quo, ask hard questions, and get the job done. She couldn't have been more than seven or eight years old. "Go ahead, ask your question," her father urged, nudging her forward. She smiled shyly and said, "You're my hero. Who's yours?" Many people—especially girls—have asked us that same question over the years. It's one of our favorite topics. HILLARY: Growing up, I knew hardly any women who worked outside the home. So I looked to my mother, my teachers, and the pages of Life magazine for inspiration. After learning that Amelia Earhart kept a scrapbook with newspaper articles about successful women in male-dominated jobs, I started a scrapbook of my own. Long after I stopped clipping articles, I continued to seek out stories of women who seemed to be redefining what was possible. CHELSEA: This book is the continuation of a conversation the two of us have been having since I was little. For me, too, my mom was a hero; so were my grandmothers. My early teachers were also women. But I grew up in a world very different from theirs. My pediatrician was a woman, and so was the first mayor of Little Rock who I remember from my childhood. Most of my close friends' moms worked outside the home as nurses, doctors, teachers, professors, and in business. And women were going into space and breaking records here on Earth. Ensuring the rights and opportunities of women and girls remains a big piece of the unfinished business of the twenty-first century. While there's a lot of work to do, we know that throughout history and around the globe women have overcome the toughest resistance imaginable to win victories that have made progress possible for all of us. That is the achievement of each of the women in this book. So how did they do it? The answers are as unique as the women themselves. Civil rights activist Dorothy Height, LGBTQ trailblazer Edie Windsor, and swimmer Diana Nyad kept pushing forward, no matter what. Writers like Rachel Carson and Chimamanda Ngozi Adichie named something no one had dared talk about before. Historian Mary Beard used wit to open doors that were once closed, and Wangari Maathai, who sparked a movement to plant trees, understood the power of role modeling. Harriet Tubman and Malala Yousafzai looked fear in the face and persevered. Nearly every single one of these women was fiercely optimistic—they had faith that their actions could make a difference. And they were right. To us, they are all gutsy women—leaders with the courage to stand up to the status quo, ask hard questions, and get the job done. So in the moments when the long haul seems awfully long, we hope you will draw strength from these stories. We do. Because if history shows one thing, it's that the world needs gutsy women.

women s history month books: Every Book Is a Social Studies Book Jeannette Balantic, Andrea S. Libresco, Jonie C. Kipling, 2011-02-01 This text offers a teacher and student-friendly collection of lessons and activities that help educators use picture books to engage younger students in meaningful social studies activities and bring this critical subject back in elementary schools. In order for today's children to succeed as adults, they need a solid foundation of life skills inculcated at a young age. Social studies is key to building this critical knowledge, yet less attention is being paid to social studies in elementary schools as this subject becomes more essential. The authors of this text have a solution: use picture books as dual-purpose texts that fulfill more than just language arts needs, and take the time dedicated to those lessons to simultaneously teach social studies. Each chapter of this text is organized around one of the National Council for the Social Studies' Ten Thematic Strands, covering diverse and engaging topics ranging from community and individuality to science and technology. This book serves as a vital resource for classroom teachers, methods professors, staff developers, and curriculum writers who prioritize keeping social studies a part of the elementary school curriculum.

women s history month books: The Black History Bowl: Mini Biographies of African Americans Cadmus S. Hull, 2018-12-07 When I spoke at book signings for my first book, I found that people, in general, knew very little about many of the African Americans that I had on the display

board. Thus, this second book in The Black History Bowl series was written to make people aware of the contributions that African Americans have made to American and World history. The African American history quiz that is included in the book is divided into eight (8) sections. Each section begins with a worksheet. The worksheet is followed by short biographies of the African American history contributors. There is an answer sheet at the end of each section. In addition, note sheets have been included with each biography for you to use to take notes when researching and gathering information. Additional information on each African American can be found on the web site that is listed at the bottom of the page after the biography. Also, included in this book is information on some points of interest that I think are important to the knowledge base of the average American. The information includes the African American holiday of Kwanzaa, the NAACP's Spingarn Medal, and information on Juneteenth (the actual day when all slaves were freed). In addition, this book includes a section for Women's History Month which highlights African American women from my first book. A timeline of African American history is also included. It is hoped that you will enjoy reading the book as you continue to enrich your knowledge of the contributions that African Americans have made to history. Dr. C. Sam Hull earned an Associate Degree in Education from Cumberland County College and further pursued his academic corridor to Glassboro State College (GSC), now Rowan University. Glassboro State College would continue Sam's educational tour leading to both a Bachelor's Degree and a Master's Degree. Armed with a Bachelor's in Elementary Education and Master's in Student Personnel Services and School Administration, Sam's educational path led him to Nova University where he achieved his ultimate goal of a Doctorate in School Leadership. Dr. Hull's achievements as an educational leader have been well documented through numerous contributions to the education field. Currently, Dr. Hull is a member of the New Jersey Association of School Administrators and Cumberland County Principals and Supervisors Association. Fairfield Board of Education enjoyed the fruits of this dedicated and committed educator for twenty-nine years. Dr. Hull retired June 30, 2004, after 33 years in education. A little known black history fact is that Dr. Hull was Cumberland County's first black Superintendent of Schools. Dr. Hull enjoys writing books, reading, and traveling. In addition, Dr. Hull keeps busy by serving as a Clinical Teaching Supervisor for Fairleigh Dickinson University and Grand Canyon University, serving on the Cumberland County College Foundation Board and as the Managing Member of his family-owned tutoring program for children in kindergarten through eighth grade.

women s history month books: Turning the Page Rachel Slaughter, 2021-03-05 There is a dearth of multicultural literature in schools since few schools offer a curriculum that promotes multicultural education. However, by the year 2050, ethnic minority children will make up the majority of the United States public school classrooms. Multicultural literature is the building block of a multicultural education which reflects our nation's diversity and helps all students learn by providing help to bridge the cultural gap, and promote racial awareness. Teachers often find it difficult to identify or find quality multicultural literature that adheres to the standard curriculum. Turning the Page: The Ultimate Guide for Teachers to Multicultural Literature helps educators find and evaluate multicultural books that are suitable for the classroom and align with the standard curriculum. The book includes a peer-reviewed metric that shows teachers how to substitute biased books with multicultural literature that endorse the same themes. Second, the book includes reviews, lesson plans, and curated book lists of multicultural books. Finally, the book offers a stepwise plan on how to create a task force of school stakeholders who can implement a comprehensive, multicultural program. In 2018, The National Association for Multicultural Education released standards for multicultural education to encourage school staff to become culturally competent and linguistically diverse. Turning the Page: The Ultimate Guide for Teachers to Multicultural Literature moves educators in that direction.

women s history month books: Linking Picture Book Biographies to National Content Standards Liz Deskins, Christina H. Dorr, 2015-11-23 Presenting beautifully illustrated picture book biographies, this book pairs narrative nonfiction biographies rich in language and illustrations with national content standards in the social studies, science, and the arts. The current focus on

promoting nonfiction reading at all ages has brought to attention the value of narrative nonfiction in the form of new picture book biographies. But which of the thousands of these types of titles will have maximum teaching impact and be interesting to students? This book identifies the best of the best in new picture book biographies that are rich in language and illustrations and best support national content standards in science, social studies, and the arts. Written by authors with a combined experience of more than 50 years in teaching as well as extensive knowledge of children's literature and the review of such books, the book provides—in a single resource—the best in recently published picture book biographies that rely on primary and secondary sources, the best in storytelling styles, and the most engaging illustrations. The unit and lesson ideas within can be used as is or modified as needed. The selected biographies enable connections between the stories of individuals' lives in history and required areas of study.

women s history month books: *The Lab Book* Darren Wershler, Lori Emerson, Jussi Parikka, 2022-03-22 An important new approach to the study of laboratories, presenting a practical method for understanding labs in all walks of life From the “Big Science” of Bell Laboratories to the esoteric world of séance chambers to university media labs to neighborhood makerspaces, places we call “labs” are everywhere—but how exactly do we account for the wide variety of ways that they produce knowledge? More than imitations of science and engineering labs, many contemporary labs are hybrid forms that require a new methodological and theoretical toolkit to describe. The Lab Book investigates these vital, creative spaces, presenting readers with the concept of the “hybrid lab” and offering an extended—and rare—critical investigation of how labs have proliferated throughout culture. Organized by interpretive categories such as space, infrastructure, and imaginaries, The Lab Book uses both historical and contemporary examples to show how laboratories have become fundamentally connected to changes in the contemporary university. Its wide reach includes institutions like the MIT Media Lab, the Tuskegee Institute’s Jesup Wagon, ACTLab, and the Media Archaeological Fundus. The authors cover topics such as the evolution and delineation of lab-based communities, how labs’ tools and technologies contribute to defining their space, and a glossary of key hybrid lab techniques. Providing rich historical breadth and depth, The Lab Book brings into focus a critical, but often misunderstood, aspect of the contemporary arts and humanities.

women s history month books: *Gender Issues and the Library* Carol Smallwood, Lura Sanborn, 2017-11-20 With the legalization of same-sex marriage and the explosion of LGBTQ news coverage in recent years, gender studies is a subject of intense interest in popular media and a part of the curriculum at many colleges. Libraries realize the importance of supporting the field yet many have difficulty finding resources and programming ideas. This book provides case studies and a range of innovative solutions for better meeting patron needs. Twenty-seven chapters are arranged into sections covering Research and Library Instruction, History and Herstory, Programming, Collections and Beyond, and Resources.

women s history month books: *How and Why to Read and Create Children's Digital Books* Natalia Kucirkova, 2018-12-03 How and Why to Read and Create Children's Digital Books outlines effective ways of using digital books in early years and primary classrooms, and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps and personalised reading, Natalia Kucirkova combines theory and practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts, Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children’s strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children’s reading for

pleasure. *How and Why to Read and Create Children's Digital Books* is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of creating and sharing. Praise for *How and Why to Read and Create Children's Digital Books* 'This is an exciting and innovative book – not least because it is freely available to read online but because its origins are in primary practice. The author is an accomplished storyteller, and whether you know, as yet, little about the value of digital literacy in the storymaking process, or you are an accomplished digital player, this book is full of evidence-informed ideas, explanations and inspiration.' Liz Chamberlain, Open University 'At a time when children's reading is increasingly on-screen, many teachers, parents and carers are seeking practical, straightforward guidance on how to support children's engagement with digital books. This volume, written by the leading expert on personalised e-books, is packed with app reviews, suggestions and insights from recent international research, all underpinned by careful analysis of digital book features and recognition of reading as a social and cultural practice. Providing accessible guidance on finding, choosing, sharing and creating digital books, it will be welcomed by those excited by the possibilities of enthusing children about reading in the digital age.' Cathy Burnett, Professor of Literacy and Education, Sheffield Hallam University

women s history month books: *Encyclopedia of Diversity in Education* James A. Banks, 2012-05-17 The diversity education literature, both nationally and internationally, is broad and diffuse. Consequently, there needs to be a systematic and logical way to organize and present the state of research for students and professionals. American citizens need to understand the dynamics of their increasingly diverse communities and institutions and the global world in which we live, work, and lead. With continually evolving information on diversity policies, practices, and programs, it is important to have one place where students, scholars, teachers, and policymakers can examine and explore research, policy, and practice issues and find answers to important questions about how diversity in U.S. education—enriched with theories, research and practices in other nations—are explained and communicated, and how they affect institutional change at both the K-12 and postsecondary levels. With about 700 signed entries with cross-references and recommended readings, the *Encyclopedia of Diversity in Education* (4 volumes, in both print and electronic formats) will present research and statistics, case studies, and best practices, policies, and programs at pre- and postsecondary levels. Diversity is a worldwide phenomenon, and while most of the entries in the *Encyclopedia* will focus on the United States, diversity issues and developments in nations around the world, including the United States, are intricately connected. Consequently, to illuminate the many aspects of diversity, this volume will contain entries from different nations in the world in order to illuminate the myriad aspects of diversity. From A-to-Z, this *Encyclopedia* will cover the full spectrum of diversity issues, including race, class, gender, religion, language, exceptionality, and the global dimensions of diversity as they relate to education. This four-volume reference work will be the definitive reference for diversity issues in education in the United States and the world.
