woodlawn community development corp: *HUD Scandals* Irving Welfeld, 2017-07-05 Mention the Department of Housing and Urban Development and the word scandal comes to mind. When it comes to recent history, the association is quite accurate; in 1989-90 congressional panels were investigating -abuses, favoritism, and mismanagement- at HUD; in 1954 HUD's predecessor, the Federal Housing Administration, was targeted by the FBI for involvement in fraudulent home-improvement schemes; in the 1970s HUD was scrutinized for lax lending standards, blatant overappraisals, and shoddy housing. In this ground-breaking volume, Irving Welfeld, a senior analyst with HUD, describes and explains these sensational episodes as well as a series of hidden blunders that have cost taxpayers billions of dollars. In this thorough, firsthand account, Welfeld provides not only soundly documented history, but analyses of events that arrive at different interpretations than Congress reached in its investigations. Throughout, his readings ask hard and probing questions: Where were the overseers--the media, Congress, the General Accounting Office, the Office of Management and Budget? To what extent is poor management the root cause of HUD's failures? Will tighter regulation help in keeping out corruption? After his comprehensive survey of the scene, Welfeld goes the final step and offers solutions: a set of programs that would minimize secrecy on the part of federal administrators and the temptation to abuse the public trust. Most importantly, the programs outlined here will enable HUD to more effectively fulfill its mission to see that there is decent affordable housing for all Americans. *HUD Scandals* will be of interest to scholars of public administration, political scientists, and analysts of housing issues.

woodlawn community development corp: *Urban Neighborhoods in a New Era* Clarence N. Stone, Robert P. Stoker, 2015-09-18 For decades, North American cities racked by deindustrialization and population loss have followed one primary path in their attempts at revitalization: a focus on economic growth in downtown and business areas. Neighborhoods, meanwhile, have often been left severely underserved. There are, however, signs of change. This collection of studies by a distinguished group of political scientists and urban planning scholars offers a rich analysis of the scope, potential, and ramifications of a shift still in progress. Focusing on neighborhoods in six cities—Baltimore, Chicago, Denver, Los Angeles, Phoenix, and Toronto—the authors show how key players, including politicians and philanthropic organizations, are beginning

to see economic growth and neighborhood improvement as complementary goals. The heads of universities and hospitals in central locations also find themselves facing newly defined realities, adding to the fluidity of a new political landscape even as structural inequalities exert a continuing influence. While not denying the hurdles that community revitalization still faces, the contributors ultimately put forth a strong case that a more hospitable local milieu can be created for making neighborhood policy. In examining the course of experiences from an earlier period of redevelopment to the present postindustrial city, this book opens a window on a complex process of political change and possibility for reform.

woodlawn community development corp: Activists in City Hall Pierre Clavel, 2013-02-15 In 1983, Boston and Chicago elected progressive mayors with deep roots among community activists. Taking office as the Reagan administration was withdrawing federal aid from local governments, Boston's Raymond Flynn and Chicago's Harold Washington implemented major policies that would outlast them. More than reforming governments, they changed the substance of what the government was trying to do: above all, to effect a measure of redistribution of resources to the cities' poor and working classes and away from hollow goals of growth as measured by the accumulation of skyscrapers. In Boston, Flynn moderated an office development boom while securing millions of dollars for affordable housing. In Chicago, Washington implemented concrete measures to save manufacturing jobs, against the tide of national policy and trends. *Activists in City Hall* examines how both mayors achieved their objectives by incorporating neighborhood activists as a new organizational force in devising, debating, implementing, and shaping policy. Based in extensive archival research enriched by details and insights gleaned from hours of interviews with key figures in each administration and each city's activist community, Pierre Clavel argues that key to the success of each mayor were numerous factors: productive contacts between city hall and neighborhood activists, strong social bases for their agendas, administrative innovations, and alternative visions of the city. Comparing the experiences of Boston and Chicago with those of other contemporary progressive cities—Hartford, Berkeley, Madison, Santa Cruz, Santa Monica, Burlington, and San Francisco—*Activists in City Hall* provides a new account of progressive urban politics during the Reagan era and offers many valuable lessons for policymakers, city planners, and progressive political activists.

2018-10-03 In 2012, Chicago's school year began with the city's first teachers' strike in a quarter century and ended with the largest mass closure of public schools in U.S. history. On one side, a union leader and veteran black woman educator drew upon organizing strategies from black and Latinx communities to demand increased school resources. On the other side, the mayor, backed by the Obama administration, argued that only corporate-style education reform could set the struggling school system aright. The stark differences in positions resonated nationally, challenging the long-standing alliance between teachers' unions and the Democratic Party. Elizabeth Todd-Breland recovers the hidden history underlying this battle. She tells the story of black education reformers' community-based strategies to improve education beginning during the 1960s, as support for desegregation transformed into community control, experimental schooling models that pre-dated charter schools, and black teachers' challenges to a newly assertive teachers' union. This book reveals how these strategies collided with the burgeoning neoliberal educational apparatus during the late twentieth century, laying bare ruptures and enduring tensions between the politics of black achievement, urban inequality, and U.S. democracy.
